>FCC invites comments on two Amateur Radio rule
>making petitions (Oct 31, 2006) -- The FCC has
>invited comments on two Amateur Radio-related
>petitions for rule making. Both petitioners seek
>changes in the FFCC's Part 97 Amateur Service
>station identification rules, specifically
>§97.119(a). That rule now requires stations to
>identify "at the end of each communication, and
>at least every ten minutes during a
>communication . . ." RM-11346, filed December 9,
>2005, by Murray Green, K3BEQ, would raise the
>required ID interval to 30 minutes as well as at
>the end of each communication. A second
>petition, RM-11347, filed May 19, 2006, by Glenn
>Zook, K9STH, would revise §97.119(a) to more
>closely resemble the old FCC §12.82(a)
>Transmission of call signs rule. Zook proposes
>requiring radio amateurs to transmit the call
>sign(s) of stations with which they are in
>communication plus their own call sign at the
>start and end of each single transmission or of
>a series of transmissions between stations in
>communication "each transmission of which is of
>less than three minutes' duration," at least
>every 10 minutes during a series of
>transmissions between stations in communication,
>and at least every 10 minutes during any single
>transmission more than 10 minutes long. Comments
>on these petitions are due by November 29.
>Interested parties may file using the FCC's
>Electronic Comment Filing System (ECFS).

From the NY Times

Signing in as a Human

By J. D. BIERSDORFER
Published: November 16, 2006
Q. Why do some Web sites make you copy and type in a bunch of hard-to-read twisted letters and numbers when you try to sign up for an account or log in?

A. That distorted set of characters on screen is called a "captcha," a name that is really a crunched acronym for Completely Automated Public Turing Test to Tell Computers and Humans Apart. ("Turing" refers to the 20th-century mathematician Alan Turing, whom many consider the father of modern computer science.)

As you might be able to guess from the name, the captcha is there to make sure it is a live person trying to sign in to the page and not an automated script or spam bot knocking. It's much easier for the human to scan and copy the correct letters than for a piece of roaming code. There is more information on the topic at www.captcha.net.

Hi all,

Here are some of the over 18,000 e-bay listing for the PS3 new Sony game. The listings were at 8:30 PM today. About 15 minutes ago one went for $6100 w/59 bids.

Some were listed with the new 100 GB DVD. Also some were pre-buy think meaning they had many coming and would reserve one for the said price.

Since the game was released today the auction must have started a week ago just in time for the arrival. Aint America great.

hi all,

Don't know if this is a hoax, but better to be safe.

Unless you know about an attachment never open one. Some have .zip
and .com extensions. .zip contains a zipped file or program that is
most often made to do something evil. A .com is probably not an
internet, but a program. DOS used .com as the extension along
with .exe for excutable programs.

Virginia state police speak in plain English
By ASSOCIATED PRESS
Published November 19, 2006

ADVERTISEMENT
RICHMOND, Va. - Anyone who ever played cops-and-robbers as a kid knows that "10-4" and other codes beginning with 10 are radio cop-speak for "okay," or "officer down" or "burglary in progress."

But now it looks as if it's over-and-out for 10-codes.

The Virginia state police and some local police departments are dropping them and switching to plain English.

Among the codes that have been shelved in favor of their English translation are the mundane 10-23 (arrived at the scene), the blood-pumping 10-47 (chase in progress) and the grim 10-82 (dead body).

The change comes as the Homeland Security Department presses local law enforcement authorities to improve communications so that different agencies can work together without confusion during an emergency.

The 10-code system dates to the 1920s, when police radios had only one channel and officers needed to relay information succinctly. Over time, departments developed their own 10-codes.

A 10-50 to a Virginia state trooper, for example, means an auto accident. In Maryland, it means an officer is down.

The potential for confusion became all too clear during such disasters as the Sept. 11 attacks and Hurricane Katrina, when Virginia state police went to Mississippi's Gulf Coast to help out.

The York-Poquoson Sheriff's Office switched to plain talk two years ago. The city of Hampton is thinking about it. More departments are expected to follow in the next year or two.

For the Virginia state police, the switch to a "common language protocol" took effect Nov. 1, but it's clear that the change is not going to occur overnight.

The codes are second nature to many officers, some of whom have been using them for decades. Some officers even speak to each other in 10-code off the radio.

Asking for backup or telling a dispatcher that an arrest is about to be made will still be done in code to avoid tipping off anyone who might be listening to radio traffic.

A list of standardized plain-English terms is being sent to all troopers to make sure they sound professional on the radio.

"You don't want to say 'broke-down car.' It doesn't sound professional," said Lt. Col. H.C. Davis of the Virginia state police. "You don't want to say 'Dead skunk in the road.' You want to say, 'There's an animal carcass.' "

77. Skywarn

Yahoo group: sarcmail
Date: 2006-11-23 11:37:26 UTC
From: LT Ron Wright
Topic: 77 Message: 77

December 2nd is the National SKYWARN recognition day. In honor of the
occasion, the NWS
will be holding an open house at their Ruskin Office from 10:00 am to 4:00
pm.

The address of the Ruskin NWS (off Route 674) is:

National Weather Service
WFO Tampa Bay area
2525 14th Ave SE
Ruskin, Florida 33570
(813) 645-2323

Skywarn classes are also available. Reserve a spot with Sr. Forecaster Nick
Petro at
(813) 645-2323 extension 333.

Amateur Radio Operators are invited to operate on HF at WX4TOR at the Ruskin
office between 8:00 am and 7:00 pm. Nick N3OET will be the 'control'
operator so this is an ideal time for TECH class license holders to get on
the air. Contact Sr. Forecaster Nick Petro to reserve your radio 'air-time'
at this special event station.

hi all,

Know the Tampa Bay Hamfest, the largest in this area, is Dec 2-3.

At the Hamfest there will be Skywarn classes on Sunday Dec 3rd at 12-1
for Basic and 1-2 for Advanced.

Golden oppurtunity for anyone wanting to become a Skywarn Spotter or
get your needed refresher course which needs to be done every 3 years
to maintain your training and registeration with NWS as a spotter.

79. e-mail sign off

Yahoo group: sarcmail
Date: 2006-11-26 14:29:12 UTC
From: LT Ron Wright
Topic: 79 Message: 79

From part of an article in the NY Times

What's in an e-mail sign-off? A lot, apparently. Those final few words above your name are where relationships and hierarchies are established, and where what is written in the body of the message can be clarified or undermined. In the days before electronic communication, the formalities of a letter, either business or personal, were taught to every third-grader; sign-offs ☐ from "Sincerely" to "Yours truly" to "Love" ☐ came to mind without much effort.

But e-mail is a casual medium, and its conventions are scarcely a decade old. They are still evolving, often awkwardly. It is common for business messages to appear entirely in lower case, and many rapid-fire correspondences evolve from formal to intimate in a few back-and-forths.

Although salutations that begin messages can be tricky ☐ there is a world of difference, it seems, between a "Hi," a "Hello" and a "Dear" ☐ the sign-off is the place where many writers attempt to express themselves, even when expressing personality, as in business correspondence, is not always welcome.

In other words, it is a land mine. Etiquette and communications experts agree that it is becoming increasingly difficult to say goodbye.

80. fox hunt

Yahoo group: sarcmail
Date: 2006-11-26 15:53:32 UTC
From: LT Ron Wright
Topic: 80 Message: 80

hi all,

A fox hunt is being planned for the Tampa Bay area. The suggested date now is Saturday Jan 20th probably in Tampa or Pinellas County. We on 64 are planning it. Hopefully this will be one of many.

Fox Hunts are great fun and provide a group the pleasure of getting together and using our rigs in a contest setting.

Many have come up with inovative ways of finding a fox. The ARRL publishes an excellent book on the subject. There is lots more than just using a beam to get a heading. Like using ones body to shield the tracking rig so a heading when up close or using dobbler antennas for DFing. And there are lots of ways to run a fox hunt. Some do it where indivuals work by themselves and some times as a group sharing information coordinating on another frequency, usually on another band; many ways to do it.

Our first one will probably just be someone, the fox, who goes to a location withing a given few square mile area and transmit for a short period of time at intervals like every 2 minutes for 30 seconds and all DF the signal. In later runs we could have the fox switch frequency requiring all to find him. Others could be where the fox is moving.

Of course this info can be useful in real situations. I had a friend in Indianapolis, Paul, W4VDU, who was very good at it. His name got arround and one day a local police officer had his mike stuck tying up the police frequency. Paul was called and within a short time found the offender. Turns out he was in a donut shop having coffee. Did not make him look good, but did make the hams look good. A real story that really happened.

I am going to set up couple of polls to get suggestions. We have couple of months. Don, KG4COQ wants to be the first fox.

More information to come.

The Air Is Free, and Sometimes So Are the Phone Calls That Borrow It
Darcy Padilla for The New York Times
Gary Schaffer, at the window of his home in San Francisco, as a caller uses his Wi-Fi connection.

E-MailPrint Reprints Save

By MATT RICHTEL
Published: November 27, 2006
SAN FRANCISCO, Nov. 26 ☐ Gary Schaffer looked out his window here last week to discover a reporter standing on his lawn, pirating his wireless Internet access to test a new mobile phone.

Skip to next paragraph

Darcy Padilla for The New York Times
New types of mobile phones, like this model from Belkin, can locate and tap in to the growing number of wireless access points to the Internet, just as laptops with Wi-Fi do. Once connected, the user can make phone calls as usual, but signal strength can vary.
The phone, made by Belkin, is one of several new mobile devices that allow users to make free or low-cost phone calls over the Internet. They are designed to take advantage of the hundreds of thousands of wireless access points deployed in cafes, parks, businesses and, most important, homes.

The technology's advocates say that as long as people are paying for high-speed Wi-Fi access in their homes, they should be able to use it as a conduit for inexpensive calls and an alternative to traditional phone service.

But, in a twist that raises some tricky ethical and legal questions, the phones can also be used on the go, piggybacking on whatever access points happen to be open and available, like that of Mr. Schaffer.

A retired business teacher, Mr. Schaffer seemed affably cautious about the idea of having his bandwidth borrowed.

"If you're a friend, I'd say, let's give it a try," he said. "If you're a stranger, probably not, unless you had to make an emergency call."

The call made from Mr. Schaffer's lawn went through but was quickly disconnected, apparently because of a weak signal. Mr. Schaffer did not seem to feel he owed any apology for the spotty coverage, though he did express concern for the person on the other end of the line.

"I know what it's like to have a call dropped," he said.

For all its limitations, the technology is starting to emerge commercially, with companies like Vonage, Skype (owned by eBay) and T-Mobile (a unit of Deutsche Telekom) now selling or supporting mobile devices that use Wi-Fi networks.

In some cases, the voice service is free. A Belkin phone that works with the Skype calling service costs about $180; calls to Skype users on computers are free, as are outgoing calls to domestic phone numbers, at least through the end of the year. Incoming calls from phones cost extra. Vonage charges $90 for a phone and $15 a month for 500 minutes of talk time.

One big hurdle is that the Wi-Fi radio frequency spectrum is unlicensed and not maintained by any one company, so call quality can be unreliable. Moving a few yards can require finding a new network to connect to. In other words, when you place free or low-cost calls ☐ especially on a stranger's network ☐ you sometimes get what you pay for.

"There are a lot of dropped calls," said Roger Entner, a telecommunications industry analyst with Ovum Research. But he said the new technology had at least one impressive ability: getting people to appreciate their old-fashioned cellular service.

"Everybody who tries a Wi-Fi phone will get down on their knees and thank the wireless phone people for the good job they've done on coverage," he said.

Wi-Fi is also a power-hungry technology that can cause phone batteries to die quickly ☐ in some cases, within an hour or two of talk time.

"When you turn on the Wi-Fi it does bring the battery life down," said Mike Hendrick, director of product development for T-Mobile. But he said the technology was improving rapidly.

T-Mobile is letting customers in Seattle participate in a test of phones that can switch between its mobile network and Wi-Fi. The company is betting that this flexibility will come in handy if the customer is out of the network's reach, offering another way to get online and stay connected.

More generally, the technology could threaten the dominance of traditional telecommunications networks by giving people an alternative pipe for their voice and data transmissions.

But some carriers are not convinced that the technology is ready for the market.

"We can totally understand that people want even more ubiquity from cellphones," said Jeffrey Nelson, a spokesman for Verizon Wireless. But Wi-Fi devices "aren't where they need to be," he said.

Mr. Hendrick of T-Mobile said the new phones were good enough to provide an alternative.

"If you can't get access because you're buried in the basement of a metal-encased building, you can go to an open wireless network," he said. Or it could be useful "if you're out in the suburbs, in the basement, and you have Wi-Fi in the house."

But what if you're just on somebody's lawn? How do people feel about a passer-by using their bandwidth to place free phone calls?

For his part, Mr. Schaffer said he would mind only if it had an adverse effect on him ☐ which in theory it could, if the voice data caused congestion on his network. There is no clear indication to a network's owner that a phone call is taking place, so most will not have the chance to object.

Not everyone is so open to walk-by talkers. "I don't like it," Kevin Asbra, another San Franciscan, said. "It's an abuse of the system. I pay my bills. Why should you call for free?"

His wife, Karen Seratti, begged to differ. A Web site usability tester, she says she regularly looks for open access points so she can check e-mail when she is traveling or away from the office.

"I walk around with my Mac all the time looking for access," she said. "When you have to send an e-mail, you have to send an e-mail."

Sometimes she must scavenge from within her own house, as when the family's Internet connection goes down. She offered a neighborly tip: "Walk into the alley ☐ you can find the network called Fido265."

Finding an open access point might prove challenging in some places, but not in San Francisco, where the spread of Wi-Fi networks has outpaced even that of yoga studios and organic produce shops.

In a walk through the Inner Sunset district, a phone's display showed that most wireless networks in range were protected, requiring a password for access.

There were, however, enough unsecured ones that it was possible to get online every half a block or so. Because the Wi-Fi phone looks like a standard cellphone, it is much less conspicuous than a laptop on the street. The proliferation of Wi-Fi laptops and, in turn, hunters of free Internet access has already raised questions about whether borrowers of bandwidth are breaking any laws.

"There's a big debate going on right now," said Jennifer S. Granick, executive director of the Center for Internet and Society at Stanford Law School. Ms. Granick said some people believed that using a connection without permission constituted unauthorized access to computers, which is a crime, while others disagree.

Traditional analogies are hard to come by, she said, adding that she does not believe using Wi-Fi is the same as trespassing, since the signals travel beyond property limits. "People say that you can't go inside somebody's house; but I say, you can sit outside and listen to the radio," Ms. Granick said.

She added that the situation was different when the owner of a wireless network chose to require a password. "If it's secured, it's marked as off-limits," she said.

Alex Milowski, an executive at a technology start-up who was out for a walk last week with his infant son, Max, said that it was fine for Wi-Fi phone users to jump onto an open network. Would he teach Max that swiping bandwidth without permission was O.K.?

"By the time he's worried about it, access will be free," Mr. Milowski said.

FCC "Omnibus" Amateur Radio R&O Published in Federal Register, Takes Effect December 15 (Nov 15, 2006 [REVISED Nov 22, 2006 11:49 ET]) -- Just a little over a month after the Federal Communications Commission released the Report and Order (R&O) in the so-called "Omnibus" Amateur Radio proceeding, WT Docket 04-140 (FCC 06-149) to the public, a revised version appeared today in the Federal Register. The changes in the R&O will take effect Friday, December 15, at 12:01 AM EST, 30 days after its publication.

Amateur Radio Exam Question Pools Altered to Agree with New Rules
(Nov 28, 2006) -- With numerous new FCC Part 97 rules soon going into
effect, the National Conference of Volunteer Examiner Coordinators'
(NCVEC) Question Pool Committee (QPC) has dropped two dozen questions
from the three Amateur Radio examination question pools. The deletions
will bring ham radio license exams offered starting December 15 into
line with rule changes spelled out in the recent FCC "omnibus" Report
and Order (R&O) in WT Docket 04-140. ARRL VEC Manager Maria Somma,
AB1FM, says ARRL VEC-sponsored examination sessions will go forward
without interruption.

Vista Is Ready. Are You?

By LARRY MAGID
Published: December 7, 2006
WINDOWS VISTA, the latest iteration of Microsoft's operating system, is finally here. It was officially released to corporate users last week and will be available to consumers on Jan. 30. But now that Vista is ready, will your computer be? And what will be involved in an upgrade?

Skip to next paragraph

Illustration by Dave Ember
Microsoft says Vista offers increased security, along with an improved search function, an excellent calendar program, improved networking and a sidebar with quick access to mini-programs called gadgets. With the right display adapter, some editions of Vista will also offer a new interface called Aero that lets you preview what is inside a running program by placing your cursor over its thumbnail in the task bar.

It will be possible for many PC users to spend $99 to $259 to purchase a Vista DVD to upgrade their existing Windows XP machines. But before you do that, you need to take a good look at your PC as well as your peripherals and software. If your system isn't quite compatible, it might be possible to make it ready for Vista with some additional memory or perhaps a new video card.

Even if your PC is Vista-ready, that doesn't mean you should buy the upgrade kit. For most users, especially those whose hardware isn't quite up to speed, it might make sense to wait until it's time for a new PC.

The easiest way to get Vista is to buy a new PC after Jan. 30. If you want a new PC sooner, make sure the hardware is Vista-ready and see if the vendor is offering a coupon for a free or low-cost upgrade when Vista comes out. It is essential to compare the cost of buying a new system against purchasing Vista and upgrading your current PC. By the time you add up the cost of Vista plus any required hardware, it might be make more sense to get a new machine.

One variable for those thinking of upgrading is Vista's system requirements, which vary by edition. Microsoft will offer a $99 Home Basic Edition that provides limited functionality but runs on more basic equipment. Unlike the higher-end versions, Home Basic won't support the new Aero interface.

The minimum configuration to run the Home Basic Edition of Vista is a PC with 512 megabytes of memory, at least an 800-megahertz processor and a graphics card that is DirectX9-compatible; this includes most graphics adapters sold in the last few years. In other words, a vast majority of PCs that have been purchased in recent years are able to run this stripped-down version of Vista ☐ but just because they're able doesn't necessarily mean it's worth the cost, effort and potential compatibility problems with existing software and peripherals.

Most consumers will find the $159 Home Premium edition more suitable. It includes the Aero interface along with Windows Media Center (to manage audio and video resources) and other features. The minimum hardware for the Premium edition is a gigabyte of memory and a one-gigahertz processor. You'll also need DirectX 9 graphics with a Windows Vista Display Driver Model (WDDM) driver and at least 128 megabytes of graphics memory and pixel shader 2.0. Pixel shader refers to the ability of your graphics processor to render the surface properties of an image including lighting, shadows and other visual qualities.

Your machine must also have at least a 40-gigabyte hard drive with 15 gigabytes of free space as well as a DVD-ROM drive and audio output. While you can never have too much memory, Microsoft's Vista group product manager, Greg Sullivan, said that one gigabyte was plenty. I've been running Vista on a 1.5-gigabyte machine and haven't had any memory-related problems.

If your machine has Windows XP, an easy way to find out if it's Vista-ready is to download the Windows Vista Upgrade Advisor from Microsoft's Vista Web site (www.microsoft.com/windowsvista/getready). The program, which is available now, will scan your PC to determine which edition of Vista, if any, can run on your machine.

Be sure to plug in all your external peripherals, like printers, scanners and external hard drives, as they, too, need to be evaluated by the upgrade tool. When the upgrade adviser scan is finished it will tell which edition it recommends. You don't necessarily have to buy the recommended edition. To the left of the screen is a list of other editions. Click on the ones you're considering and scroll down to see what changes you might have to make to run that edition.

From: LT Ron Wright
Topic: 91 Message: 91

From Joel, KI4SFT

I wrote a message to William Cross of the FCC since he was named as the contact for questions. I quote my message and his reply. Maybe I jumped the gun, but I wanted to find out what the FCC would say. Sorry if this is redundant.

Dear Mr. Cross:

I am a licensed amateur radio operator with an FCC Technician license. I took the Element 3 test for General Class licensing and passed it on 16 December 2006. I read your DOC-269012A1 R&O to eliminate the Morse Code requirement from General class licensing. My understanding from ARRL's explanation is that you can make it valid immediately upon filing it in the National Registry or postpone it for 30 days.

I have two questions:
1. When will the Order will become an FCC policy?
His reply: 30 days after publication in the Federal Register.

2. What steps will I need to follow to get my General Class License once the order is FCC policy?

His reply: Go to a VE team and have it do the paperwork. See the FAQ in the article on the ARRL website for details.

Sincerely,
Joel John, KI4SFT

92. ham population

Here is the analysis the numbers of individual FCC licensees covering the months of October, November and December 2006. I will post the numbers again at the end of December and at the end of every quarter from that point on.

Editorial:

It is rare when we see declines in the Extra Class but that is what happened in the 4th quarter of 2006. We also had a decline in the General Class. The Novice and Advanced are always declining because they are not tested for. On the other hand we saw a large increase in the Technician class during the quarter.

Since the FCC has dropped the code test requirement we would expect to see initial and likely ongoing gains in the Genera and Extra Classes. It could be that the bottom line number presented here (655,823) is about as low as it will get once the code is dropped. It will be interesting to see what the effect is.

Total active individual licenses as of May 14, 2000:
Novice - 49,329
Tech/+ - 334,254
General - 112,677
Advanced - 99,782
Extra - 78,750

Total all classes - 674,792

Total active individual licenses as of January 1, 2007:
Novice - 23,610 (-52.14%) (-25,719)
Tech/+ - 322,966 (-3.38%) (-11,288)
General - 131,160 (+16.40%) (+18,483)
Advanced - 69,891 (-30.00%) (-29,891)
Extra - 108,205 (+37.60%) (+29,455)

Total All Classes: 655,832 (-565 since the 3rd Quarter 2006 reporting period)

Total all classes (5/14/00) - 674,792
Total all Classes (4/21/03) - 687,860
Total all classes (9/6/04) - 674,788
Total all classes (10//1/06) - 655,832

Total loss of 18,960 since 5/14/2000 (Was 674,792)
Total loss of 18,956 since 9/6/2004 (Was 674,788)
Total Loss of 32,048 since 4/2003 (all time high of 687,860)

We lost:
683 Novice
704 General
866 Advanced
208 Extra
2,461 Total

We Gained:
1,896 Tech/+

- 565 Total

This is an overall 565 decline since the 3rd quarter reporting period and averages 188 per month for the quarter.

Numbers of US population and the number of hams at the start of each decade from 1930.

Year Population # Hams Growth Rate
1930 123,202,624 19,000
1940 132,164,569 56,000 194%
1950 151,325,798 87,000 55%
1960 179,323,175 230,000 164%
1970 203,211,926 263,918 15%
1980 226,545,805 393,353 49%
1990 248,709,873 502,677 28%
2000 281,421,906 682,240 36%
2007 300,000,000 655,832 -3.9%

Notes:
The base totals are from implementation of the then new licensing changes in May 2000. September 6, 2004 is the date I started measuring the changes. Over the two year period we are averaging a loss of about 9,195 licensees per year. The peak number was in April 2003.

The following message is forwarded to all WCF Clubs for maximum
distribution, at the request of aprssfl.net

Hi everyone,

The group of system operators that ran the Tier2 CWOP/APRS Internet
Weather
reporting servers have shut down as of today.

They gave the rest of us running servers us a whole 2 hours of notice
to
prepare for 3000 new connections.

The core APRS servers, to which I run "third" here locally out of
three
servers, is available to pickup the load of these missing servers
right now.

If you go to findu, using http://wx.findu.com/<yourcall> and find
your data
is not being updated, then you need to act immediately to ensure your
data
still makes it to the National Weather Service and Findu.

Check your programs settings you use to send your weather, and make
sure to
put the following list of servers in your list, removing any others:

Put "first.aprs.net", "second.aprs.net", and "third.aprs.net" for
your list
of available servers if you can take a list.

If you only have a option for one server, use "rotate.aprs.net", it
goes
thru all three.

You'll want to use port 14580.... (not 23)

This only affects stations running weather stations on APRS/CWOP that
are
NOT on 144.390 RF.

If you could please pass this along to every other local radio
amateur lists
you can, please do, it's important we keep the weather data flowing.

Seeya,
Dave
KG4YZY
Sysop, third.aprs.net (aka aprsfl.net)

White Star Line RMS Titanic

Is the most famous radio station in the world And is this the most famous radio transmission, The Titanic radio operators last transmissions and the tragedy that followed

Titanic's Wireless Room:

Equipment:
The Titanic's "wireless" equipment was the most powerful in use at the time. The main transmitter was a rotary spark design, powered by a 5 kW motor generator, fed from the ship's lighting circuit. The equipment operated into a 4 wire antenna suspended between the ship's 2 masts, some 250 feet above the sea.

There was also a battery powered emergency transmitter and a separate motor generator in the room next door. The equipment's guaranteed working range was 250 miles, but communications could be maintained for up to 400 miles during daylight and up to 2,000 miles at night.

Assistant Radio Operator Harold Bride
at the "Marconi Wireless" aboard the Titanic

Staff:
Titanic's Radio Room was operated by two Radio Officers (or, as they were known in those days, "Marconi Wireless Operators" or "Telegraphists").
In charge was 25 year old John George Phillips - better known as "Jack" or "Sparks", with 22 year old Harold Bride as the Deputy or Assistant Radio Operator.
"Touch the spark. . . Sound the tone" (a line from "Titanic" - the musical) sums up beautifully how the wireless apparatus operated these days. Because of this, all wireless operators were nick-named "Sparks".

A wireless operator employed by the Marconi Wireless Telegraph Co. Ltd., had to be between the age of 21 and 25 and able to send and recieve at least 25 words per minute in Morse. The age restriction was rarely enforced and most wireless operators started their seagoing career already at the age of 19 or 20. After passing their civil service examination, the wireless operators had to finish their training at the Marconi Training School in Liverpool.

After the five months final training, they were ready to be stationed on a vessel. In 1912, Jack Phillips could tap out 39 words per minute, ditto that for Harold Thomas Cottam ('Carpathia's' wireless operator), and Harold Bride's speed was 26 words per minute.

Marconi Wireless Operators often became snippy in regards to Non-Marconi operators - claiming they were "incompetent" and "didn't know how to use Morse properly" (the United States Navy bore the brunt of such attacks).

Both Radio Operators remained at their posts until about 3 minutes before the Titanic foundered, even after being released from their duties by Captain Smith.

Harold Bride remarked that water could be heard flooding into the wheelhouse as he and Jack Phillips abandoned the Radio Room. Jack Phillips was still sending as the power supply to the Radio Room failed.

The Titanic Radio Operators did great honor to their profession. Both Radio Operators earned very little for the amount of work they were required to do.
John George Phillips earned £4 and 5 shilling per voyage.
Harold Bride earned £2 and 2 shilling and sixpence per voyage.

Jack Phillips died of hypothermia on or near Collapsible Lifeboat B, his body was never recovered.

Harold Bride left the sea after WW1, and faded into obscurity. He died in Scotland in 1956.

Titanic's Radio Callsign:
As the dominant marine radio company of the time, the Marconi Wireless Telegraph Co. Ltd. allocated their own callsigns, most of which began with the letter M - these basically identified a Marconi installation, regardless of its location or the country of registration of the vessel in which it was installed.

Callsign allocation was eventually standardised at the London Radio Conference of 1912 (post Titanic), with prefixes being allocated on an international basis. UK coast stations and ships thenceforth used the letters G or M as the first letter of their callsigns. US ships and stations used K, N and W, German stations and ships used D, Italians I, French F, etc.

The Titanic was assigned the callsign "MUC" in January 1912. Some time after January, Titanic's callsign was changed to "MGY" - this was previously assigned to the US vessel 'Yale'.

Although Guglielmo Marconi's invention had been on ships since the turn of the century, its use was far from universal in 1912. The Titanic's wireless operators were Marconi Company employees and only indirectly responsible to the Captain and his Officers. Radio messages were very popular with the passengers and were regarded as important navigational aids, but there use still lacked regulation. The Titanic tragedy highlighted this fact, since several ice warnings had been received but not reported to the bridge.

One of the first standard radio distress calls to be sent from a ship occurred in 1903 and was Marconi's newly created "CQD." "CQ" was the signal to stop transmission and pay attention; adding the "D" meant distress. In 1906 the International Radio Telegraphic Convention in Berlin created the signal "SOS" as an alternative means of summoning assistance. The three letters were chosen solely for their simplicity in Morse Code. Three dots, three dashes and three dots were instantly recognizable, and could be transmitted by someone who had never used a wireless apparatus. In 1908 "SOS" officially superseded "CQD" as the regulation distress call, but Marconi operators rarely used the new signal. Only after Harold Bride radioed his now famous SOS from the sinking Titanic did the new signal become standard.

In 1909 a distress call sent out on wireless was responsible for the incredible rescue of over sixteen hundred passengers and crew aboard the White Star Liner 'Republic'. While the role of the wireless in the rescue of the "Republic" made headlines, it was one ship's failure to use its wireless that stood out in the Titanic disaster. Had the 'Californian' utilized her wireless to identify the mystery ship seen by her captain and officers, she would have inevitable heard the Titanic's distress call.

After the Titanic's disaster, ships were required to have a twenty-four hour radio watch. More emphasis was placed on navigation, so that crucial information such as ice warnings would not go unreported to the bridge. Unfortunately over fifteen hundred people had to die before the vital role of the wireless was fully understood...

Trials and Commissioning:
The Marconi equipment was delivered to the Titanic in time for the sea trials on April 2nd prior to her maiden voyage
Phillips and Bride spent the day completing the installation and adjusting the equipment. They exchanged test calls with coast stations at Malin Head (North coast of Ireland), callsign MH and Liverpool (actually known as "Seaforth"), callsign LV.
By this stage the "wireless" was in almost constant use, with the sea trial reports flowing from Captain Smith to Bruce Ismay (Managing Director of the White Star Line) at the company offices in Liverpool.

By April 3rd
the equipment was adjusted and working correctly - Phillips and Bride exchanged messages with coast stations at Teneriffe (2,000 miles away) and even Port Said (more than 3,000 miles distant).

Both Radio Officers left the ship at Southampton for a short period. Phillips signed back on articles on April 6th when he returned briefly to check the spare parts. Bride returned on board at 23.30 p.m. on April 9th.

Watch Hours:
Both men were up early on sailing day, April 10th, conducting final testing of the equipment. They arranged watches by personal agreement: Phillips, First Radio Operator, took the 20.00 - 02.00

watch, whilst Bride, Assistant Radio Operator, was on duty between 02.00 - 08.00. There were no fixed watch hours during the day: the men relieved each other to suit mutual convenience, however a continuous watch was maintained.

Location of the "Marconi Room":
The "Marconi Room" was situated on the Boat-Deck (i.e.: the same deck as the Bridge), at the after end of the superstructure containing the Bridge and Officer's quarters - it was about 40 feet aft from the Bridge, connected via the corridor which ran down the port side of the Officer's quarters.

The "Marconi Room" was in the centre of the accommodation - it did not have an outside facing porthole. Natural light was provided via a skylight in the deckhead (ceiling).

The Radio Operators sleeping accommodation was in a separate room to starboard of the "Marconi Room" - connected to the operating room by an interconnecting door. The Radio Operators shared the Officer's toilet/washroom facilities across the corridor.

The "Marconi Room" was connected to the ship's 50 line telephone exchange. However, it appears that there was no direct telephone connection to the Bridge.

This problem was rectified on Titanic's sister ships 'Olympic' and 'Britannic' after the Titanic disaster - a speaking tube was installed which connected the "Marconi Room" to the Bridge.

Passenger Traffic:
As the Titanic's departure preparations were completed, both Radio Operators prepared for the daily onslaught of passenger communications directed to and from "ADVISELUM", the wireless code word assigned to the Titanic for passenger's personal traffic.

Passengers sent their telegrams at the Inquiry Office, on the starboard side of the forward First-Class entrance. The handwritten messages were paid for at the desk, at the rate of 12 shillings and sixpence for the first 10 words, and 9 pence per word thereafter (a substantial sum in 1912, although not for a First-Class passenger).

Telegrams were sent to the Radio Room by pneumatic tube. At the end of the day, a balance was struck between the Purser's clerk and the Radio Operators regarding the number of chargeable words sent.

Incoming passenger messages were received by hand by the duty Radio Operator, and typed on a telegram form by the other Radio Operator. Passenger traffic was sent from the Radio Room to the Inquiry Desk using the pneumatic tube.

Messages concerning navigation were delivered directly to the Bridge. Similarly, messages for the Captain were delivered by the Radio Operators to the Captain's cabin, down the starboard passage of the

Officer's quarters.

In the 4 1/2 days between leaving Southampton and the collision with the iceberg on that "Fatal Night", the Titanic's Radio Operators received and sent 250 passenger telegrams.

Titanic's First Radio Operator - John George Phillips

John George - "Jack" or "Sparks" (because he sent morse so fast) - Phillips was born on April 11th, 1887 in Godalming in Surrey, UK.

First Radio Operator
John George Phillips
After leaving Godalming Grammar School, he passed the Civil Service examinations and began work as a telegraphist at the local post office.

Phillips left Godalming in March 1906 to attend the Marconi Company's Wireless Telegraphy training school at Seaforth Barracks in Liverpool. After finishing his training in August 1906, he was posted as Junior Radio Officer on the White Star Line vessel 'Teutonic'. For the next 2 years he served on the 'Lusitania', 'Mauretania', 'Campania' and 'Oceanic'.

In 1908, he was transferred to the Marconi Transatlantic station at Clifden on the Irish coast where he worked as an operator transmitting and receiving messages to and from the Marconi sister station at Glace Bay, Nova Scotia - this was the first Transatlantic wireless operation.

After leaving Clifden in 1911, Phillips returned to sea on the 'Adriatic'. In March 1912 he was sent to Belfast to take up the post of Chief Radio Officer on the new White Star liner Titanic. Phillips died in that "Fatal Night", a few days after his 25th birthday. Because he had been awake the previous night repairing the radio equipment Phillips was too exhausted to survive in the icy water. He died of hypothermia on or near Collapsible Lifeboat B, his body was never recovered.

Titanic's Assistant Radio Operator - Harold Sidney Bride
Harold Sidney Bride was born to Arthur and Mary Ann (Rowe) Bride on January 11th, 1890 in Hull, England.

Assistant Radio Operator
Harold Sidney Bride

He joined the Marconi School and received his first appointment in July of 1911. He first worked aboard the 'Hoverford', 'Lafranc', ' Anselm', and then on the 'Lusitania'. Bride joined the Titanic - like John George Phillips - at Belfast.
Harold Bride survived that "Fatal Night" in Collapsible Lifeboat B. Despite the fact that Bride was recovering in the 'Carpathia's' infirmary from crushed and frostbitten feet after the Titanic's

sinking he insisted to assist her only wireless operator - Harold Thomas Cottam - by sending a list of known survivors to New York and was carried up to the wireless shack where he was promoted to Senior Operator and the two Harolds were given total control over what was and was not sent to New York.

After the Titanic disaster he received a hero's welcome when he returned home to Beckenham, and worked as a telegrapher in a London post office. He returned to the sea in 1913 as a wireless operator aboard the SS 'Medina'.
World War I found him as a wireless operator on the tiny steamer, 'Mona's Isle'. He later embarked on a career as a salesman. Harold Bride married Lucy Downie at Stranraer, Wigtownshire, Scotland, on April 10th, 1920.

The couple moved to Scotland and had three children. Bride was an avid churchgoer and rarely spoke of the Titanic. He died of bronchial complications on April 29th, 1956.

The Final Wireless Transmissions aboard the R.M.S. Titanic

Manned by John George Phillips and Harold Bride, the Titanic's wireless room had been doing steady business since the ship had left port. The machine went down on Saturday evening, April 13th, and had not been repaired until nearly 5.00 a.m., Sunday, April 14th.

Prior to April 14th, 1912, the Titanic had recieved several ice warnings, from the ships 'Caronia', 'La Touraine', 'Amerika', and 'Rappahannock'. The message from the 'Caronia' had been posted in the officer's chart room. Wireless operator Harold Bride shut down the telegraph for a while on April 14th, 1912 to let the machine cool, and missed an ice warning from the 'Californian'.

While these are not every wireless message to go from or to the Titanic, they are the most pertinent to the tragedy which befell the ship:

1.40 p.m.
14 April 1912
S.S. Baltic to R.M.S. Titanic:
"Captain Smith, Titanic. Have had moderate variable winds and clear fine weather since leaving. Greek steamer Athinai reports passing icebergs and large quantity of field ice today in latitude 41.51 N, longitude 49.52 W. Last night we spoke (with) German oil tanker Deutschland, Stettin to Philadelphia, not under control, short of coal; latitude 40.42 N, longitude 55.11 W. Wishes to be reported to New York and other steamers. Wish you and "Titanic" all success".

7.30 p.m.
14 April 1912
S.S. Antillian to R.M.S. Titanic:
"6.30 p.m., apparent time, ship; latitude 42.3 N, longitude 49.9 W.
Three large bergs five mile to southward of us".

9.30 p.m.
14 April 1912
S.S. Mesaba to R.M.S. Titanic and All Eastbound Ships:
"Ice report: In latitude 42 N to 41.25 N, longitude 49 W to 50.3 W.
Saw much heavy pack ice and great number of large icebergs, also
field ice. Weather good, clear".

9.35 p.m.
14 April 1912
R.M.S. Titanic to S.S. Mesaba:
"Recieved, thanks".

9.38 p.m.
14 April 1912
S.S. Mesaba to R.M.S. Titanic:
"Stand by".
(Stanley Adams, on the S.S. 'Mesaba', was waiting for the Titanic to
indicate the message had been given to the captain. Jack Phillips did
not respond, but continued to send passenger messages to Cape Race.)

11.00 p.m. (approx)
14 April 1912
R.M.S. Californian to R.M.S. Titanic:
"Say, old man, we are stopped and surrounded by ice".

11.10 p.m. (approx)
14 April 1912
R.M.S. Titanic to R.M.S. Californian:
Keep out! Shut up, shut up! I am busy, I am working Cape Race.

11.15 p.m. (approx)
14 April 1912
R.M.S. Titanic to Cape Race, Newfoundland:
"Sorry, please repeat. Jammed".

Between 11.35 and 11.45 p.m. (most likely the latter) Captain Smith
informed Phillips and Bride that the ship had hit an iceberg, and to
prepare a distress call. The captain returned at 12.15 a.m. and told
them to send it.

12.15 a.m.
15 April 1912
R.M.S. Titanic to Any Ship:
"CQD Titanic 41.44 N 50.24 W"
(CQD was the contemporary distress signal, though soon, the new
distress signal would be put to use for the very first time).

12.17 a.m.
15 April 1912
R.M.S. Titanic to Any Ship:
"CQD CQD SOS Titanic Position 41.44 N 50.24 W. Require immediate assistance. Come at once. We struck an iceberg. Sinking".
(SOS was the first use of the new distress signal. So far, two ships had responded to the Titanic's distress call. They included the 'Frankfurt', nearly 170 miles away, and the 'Olympic', nearly 500 miles away.)

12.20 a.m.
15 April 1912
R.M.S. Titanic to R.M.S. Carpathia:
"Come at once. We have struck a berg. It's a CQD, old man. Position 41.46 N 50.14 W"

12.21 a.m.
15 April 1912
R.M.S. Carpathia to R.M.S. Titanic:
"I say old man, do you know there is a batch of mesages coming through for you from MCC (MCC indicated Cape Cod) ?"

12.22 a.m.
15 April 1912
R.M.S. Titanic to R.M.S. Carpathia:
"CQD CQD"

12.25 a.m.
15 April 1912
R.M.S. Carpathia to R.M.S. Titanic:
"Shall I tell my captain? Do you require assistance?"

12.26 a.m.
15 April 1912
R.M.S. Titanic to R.M.S. Carpathia:
"Yes, come quick!"

12.32 a.m.
15 April 1912
R.M.S. Carpathia to R.M.S. Titanic:
"Putting about and heading for you".

12.40 a.m.
15 April 1912
R.M.S. Titanic to R.M.S. Carpathia:
"SOS Titanic sinking by the head. We are about all down. Sinking. . ."

From 12.40 a.m. until the final message was sent from the Titanic sometime between
2.15 a.m. and 2.25 a.m. the Titanic, the 'Carpathia' and other ships kept a steady stream of messages, updating their progress and Titanic's condition.

The Titanic continued to send out general CQD and SOS messages, in the chance that there might be a closer ship.

12.45 a.m.
15 April 1912
Titanic calls 'Olympic', (sister ship - 500 miles away en route to England) "SOS" (first use of SOS by Titanic - Bride jokingly suggests to Phillips that it may be his last chance to use the new distress call).

12.50 a.m.
15 April 1912
Titanic calls CQD and says, "I require immediate assistance. Position 41.46 N. 50.14 W." Received by 'Celtic'.

12.53 a.m.
15 April 1912
'Caronia' to MBC ('Baltic'), "MGY (Titanic) CQD in 41.46 N. 40.14 W. Wants immediate assistance".

1.00 a.m.
15 April 1912
MGY (Titanic) gives distress signal. DDC ('Cincinatti') replies. MGY's (Titanic) position 41.46 N. 50.14 W. Assistance from DDC ('Cincinatti') not necessary as MKC ('Olympic') shortly afterwards answers distress call.

1.00 a.m.
15 April 1912
Titanic replies to 'Olympic' and gives her position as 41.46 N. 50.14 W., and says, "We have struck an iceberg".

1.02 a.m.
15 April 1912
Titanic calls 'Asian' and said, "Want immediate assistance". 'Asian' answered at once and received Titanic's position as 41.46 N. 50.14 W., which was immediately taken to the bridge. Captain Smith instructs operator to have Titanic's position repeated.

1.02 a.m.
15 April 1912
'Virginian' calls Titanic but gets no response. Cape Race tells 'Virginian' to report to his Captain that the Titanic has struck iceberg and requires immediate assistance.

1.10 a.m.
15 April 1912
Titanic to MKC ('Olympic'), "We are in collision with berg. Sinking Head down. 41.46 N. 50.14 W. Come soon as possible".

1.10 a.m.
15 April 1912

Titanic to MKC ('Olympic'), Captain says, "Get your boats ready. What is your position?"

1.15 a.m.
15 April 1912
'Baltic' to 'Caronia', "Please tell Titanic we are making towards her".

1.20 a.m.
15 April 1912
'Virginian' hears MCE (Cape Race) inform MGY (Titanic) "That we are going to her assistance. Our position 170 miles N. of Titanic".

1.25 a.m.
15 April 1912
'Caronia' tells Titanic, "Baltic coming to your assistance".

1.27 a.m.
15 April 1912
'Olympic' sends position to Titanic, "1.24 a.m. G.M.T. 40.52 N. 61.18 W", and asks "Are you steering southerly to meet us?" Titanic replies, "We are putting the women off in the boats".

1.30 a.m.
15 April 1912
Titanic tells 'Olympic', "We are putting passengers off in small boats." "Women and children in boats, can not last much longer".

1.35 a.m.
15 April 1912
'Olympic' asks Titanic what weather she had. Titanic replies, "Clear and calm".

1.35 a.m.
15 April 1912
'Baltic' hears Titanic say, "Engine room getting flooded." (Captain Smith had just visited the Titanic's radio room and advised this to Phillips and Bride).

1.35 a.m.
15 April 1912
'Mount Temple' hears DFT ('Frankfurt') ask, "Are there any boats around you already?" No reply.

1.37 a.m.
15 April 1912
'Baltic' tells Titanic, "We are rushing to you".

1.40 a.m.
15 April 1912
'Olympic' to Titanic, "Am lighting up all possible boilers as fast as (we) can".

1.40 a.m.
15 April 1912
Cape Race says to 'Virginia', "Please tell your Captain this: "The 'Olympic' is making all speed for Titanic, but her ('Olympic's') position is 40.32 N. 61.18 W. You are much nearer to Titanic. The Titanic is already putting women off in the boats, and she says the weather there is calm and clear. The 'Olympic' is the only ship we have heard say, "Going to the assistance of the Titanic. The others must be a long way from the Titanic".

1.45 a.m.
15 April 1912
Last signals heard from Titanic by 'Carpathia', "Come as quickly as possible old man: our engine-room is filling up to the boilers".

1.45 a.m.
15 April 1912
'Mount Temple' hears 'Frankfurt' calling Titanic. No reply.

1.47 a.m.
15 April 1912
'Caronia' hears Titanic though signals unreadable still.

1.48 a.m.
15 April 1912
'Asian' heard Titanic call SOS. 'Asian' answers Titanic but receives no answer.
DFT ('Frankfurt') calls Titanic and says, "What is the matter with u ?"

1.50 a.m.
15 April 1912
Titanic says to 'Frankfurt', "You are a fool, stdbi - stdbi - stdbi and keep out".
'Caronia' hears 'Frankfurt' working to Titanic. 'Frankfurt' according to position 172 miles from MGY (Titanic) at time first SOS sent out.

1.55 a.m.
15 April 1912
Cape Race says to 'Virginian', "We have not heard Titanic for about half an hour. Her power may be gone".

2.00 a.m.
15 April 1912
'Virginia' hears Titanic calling very faintly, her power being greatly reduced.

2.10 a.m.
15 April 1912
'Virginian' hears 2 V's signalled faintly in spark similar to Titanic's (Phillips adjusting his transmitter to compensate for the dying power supply from the engine room).

2.17 a.m.
15 April 1912
Virginian hears Titanic, call "CQ" (call to all ships) , but unable to read him. Titanic's signals end very abruptly as power suddenly switched off.
(Phillips had actually intended to send "CQD DE MGY", however at this point there is a loss of all power to the radio room - water can be heard flooding the wheelhouse - Phillips says to Bride "Come on, let's clear out". Bride climbs to the roof of the officer's quarters and assist with launching collapsible Lifeboat B - Phillips disappears aft).

Sometime between 2.15 a.m. and 2.25 a.m.
15 April 1912
The final wireless message sent from the Titanic:
R.M.S. Titanic to R.M.S. Carpathia:
"SOS SOS CQD CQD Titanic. We are sinking fast. Passengers are being put into boats. Titanic."

Bride and Phillips left the wireless room after that message, after being urged to leave their post by Captain Smith. They made their way to the Boat-Deck and began trying to help the other men in the releasing of collapsible Lifeboat B. While neither of them immediately made it onto a lifeboat, both were rescued from the sea. Bride's feet were so severely frozen he could not walk. Phillips died of hypothermia on or near Collapsible lifeboat B, his body was never recovered.

2.17 a.m.
15 April 1912
'Virginian' called Titanic and suggested he should try emergency set, but heard no response.

2.20 a.m.
15 April 1912
'Virginian' to 'Olympic', "Have you heard anything about Titanic?" 'Olympic' says, "No. Keeping strict watch, but hear nothing more from Titanic. No reply from her".

2.20 a.m. (approx)
15 April 1912
This was the official time the Titanic foundered in 41.46 N. 50.14 W. as given by the 'Carpathia' in message to the 'Olympic'.

Between 2.20 a.m. and 9.00 a.m. April 15th, the 'Carpathia' and the other ships kept a steady stream of messages, updating their progress to reach the Titanic's last known position in order to rescue the survivors of the sinking in that "Fateful Night".

2.35 a.m.
15 April 1912
Mount Temple hears MPA ('Carpathia') send, "If you are there we are firing rockets".

2.40 a.m.
15 April 1912
MPA ('Carpathia') calling MGY (Titanic).

2.58 a.m.
15 April 1912
SBA ('Birma') thinks she hears Titanic so sends, "Steaming full speed for you. Shall arrive you 6.00 in morning. Hope you are safe. We are only 50 miles now".

3.00 a.m.
15 April 1912
MPA ('Carpathia') calling MGY (Titanic).

3.28 a.m.
15 April 1912
'La Provence' to 'Celtic', "Nobody has heard the Titanic for about 2 hours".

4.24 a.m.
15 April 1912
SBA ('Birma') says, "We are 30 miles S.W. off Titanic".

6.40 a.m.
15 April 1912
'Parisian' hears weak signals from MPA ('Carpathia') or some station saying Titanic struck iceberg. 'Carpathia' has passengers from lifeboats.

6.40 a.m.
15 April 1912
'Asian', with German oil tank in tow for Halifax asked what news of MGY (Titanic). Sends service (message) later saying heard MGY (Titanic) V. faint working.

7.40 a.m.
15 April 1912
'Mount Temple' hears MPA ('Carpathia') report rescued lifeboats.

8.07 a.m.
15 April 1912
'Baltic' sends following to 'Carpathia', "Can I be of any assistance to you as regards taking some of the passengers from you? Will be in position about 4.30 p.m. Let me know if you alter your position".

8.10 a.m.
15 April 1912
'Baltic' in communication with MPA ('Carpathia'), "Exchanged traffic re passengers, and get instructions to proceed to Liverpool".

8.15 a.m.
15 April 1912
'Baltic' turns round for Liverpool, having steamed 134 miles W. towards Titanic.

8.40 a.m.
15 April 1912
'Mount Temple' hears MPA ('Carpathia') call "CQ" (message to all ships) and say, "No need to std. Bi (stand by) him. Advise my Captain (sic), who has been cruising round the icefield with no result. Ship reversed".

8.45 a.m.
15 April 1912
'Olympic' sent MSG (message) to Owners, New York via Sable Island saying, "Have not communicated with Titanic since midnight".

8.55 a.m.
15 April 1912
'Carpathia' replies to 'Baltic', "Am proceeding to Halifax or New York full speed. You had better proceed to Liverpool. Have about 700 passengers on board".

9.00 a.m.
15 April 1912
'Carpathia' to 'Virginian', "We are leaving here with all on board about 700 passengers. Please return to your Northern course".

The 'Carpathia' is now heading for New York where she will arrive at 9.00 p.m. on the evening of April 18th with aboard the 705 survivors.

Note:
Apparently the SOS sent by the Titanic was also picked up by a radio ham (Mr. Moore) at Gelligroes, near Blackwood Monmouthshire , who reported hearing the SOS to the local police who were sceptical at the time.
Mr. Guglielmo Marconi himself visited Gelligroes to see the radio equipment Mr. Moore had made. Mr. Moore then worked for many years for Mr. Marconi.

Mr. Moor's relatives still live in the area. and the radio equipment can still be seen at Gelligroes Mill.

This is dedicated to the eternal memory of the R.M.S Titanic and to all those who needlessly died one cold night in April 1912, and to the hero radio operators onboard all the ships especially the

H.M.S Titanic

From: LT Ron Wright
Topic: 98 Message: 98

Hi all,

Doug DeMaw, W1FB, was one of the founding fathers of QRP building and design. He authored several hundred articles for QST, and several books that are still used daily by QRPers throughout the world. NorCal has decided to honor Doug with a tribute that we think he would have enjoyed, the "Back to the Future" project. We will update a series of projects that were first presented over 20 years ago with modern available parts, and also will provide circuit boards to fit those parts for those who wish to build these designs. The first of these projects is the Tuna Tin 2, designed by Doug himself. The "Back to the Future" project is hereby dedicated to the memory of Doug DeMaw, W1FB, enjoy.

100. FCC rule changes

Yahoo group: sarcmail
Date: 2007-01-24 12:42:27 UTC
From: LT Ron Wright
Topic: 100 Message: 100

[Federal Register: January 24, 2007 (Volume 72, Number 15)]
[Rules and Regulations] [Page 3081-3082]

From the Federal Register Online via GPO Access [wais.access.gpo.gov]
[DOCID:fr24ja07-22]

FEDERAL COMMUNICATIONS COMMISSION 47 CFR Part 97 [WT Docket No. 04-140, WT Docket No. 05-235; FCC 06-178]

Amateur Service Rules AGENCY:

Federal Communications Commission. ACTION: Final rule.

SUMMARY: In this document, the Commission amends its Amateur Radio Service rules to remove the requirement that an individual must pass a Morse code telegraphy examination to qualify for a General Class or an Amateur Extra Class amateur radio service operator license.

The Commission also revises the frequency segment of the 80 meter amateur service High Frequency (HF) band on which amateur stations are authorized to be automatically controlled when transmitting RTTY and data emission types, and it make other conforming amendments to the amateur service rules.

DATES: Effective February 23, 2007.

FOR FURTHER INFORMATION CONTACT: William T. Cross, Wireless Telecommunications Bureau at (202) 418-0620, or TTY (202) 418-7233. SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order and Order on Reconsideration, in WT Docket Nos. 04-140 and 05-235; FCC 06-178, adopted December 15, 2006 and released December 19, 2006. The complete text of this document is available for inspection and copying during normal business hours in the FCC's Reference Information Center, 445 12th Street, SW., Room CY-A257, Washington, DC. Alternative formats (Braille, large print, electronic files, audio format) are available for people with disabilities by sending an e-mail to FCC504@fcc.gov or, calling the Consumer and Government Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (TTY). The Order also may be downloaded from the Commission's Web site at http://www.fcc.gov/ .

1. In this Report and Order and Order on Reconsideration the Commission adopts changes to its part 97 rules to revise the examination requirements for obtaining a General Class or Amateur Extra Class amateur radio operator license, revises the operating privileges for Technician Class licensees to include the operating

privileges that are authorized to Novice Class licensees, and authorizes automatically controlled digital stations to operate in the 3585-3600 kHz frequency segment. The overall effect of this action is to further the public interest by encouraging individuals who are interested in communications technology, or who are able to contribute to the advancement of the radio art, to become amateur radio operators; and eliminating a requirement that is now unnecessary and may discourage amateur service licensees from advancing their skills in the communications and technical phases of amateur radio. The changes adopted in this Report and Order and Order on Reconsideration were proposed in the Notice of Proposed Rulemaking at 70 FR 51705, August 31, 2005. Over 3800 comments on the proposed rule changes were received and changes to the proposed rules based on these comments are included in this Report and Order and Order on Reconsideration.

2. Specifically, the Commission (1) removes the five wpm telegraphy examination from the examination requirements for the General Class and Amateur Extra Class operator licenses;

(2) revises the operating privileges for Technician Class licensees to include the High Frequency operating privileges that are authorized to Novice Class and Technician Plus Class licensees; and

(3) authorizes automatically controlled digital stations to transmit in the 3585-3600 kHz segment of the 80 m band. The effect of these revisions are to eliminate unnecessary requirements from the amateur service license examination system and to provide licensees with greater flexibility in the utilization of amateur service frequencies. I. Procedural Matters A. Paperwork Reduction Act Analysis 3.

This document does not contain any new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. Therefore, it does not contain any new or modified ``information collection burden for small business concerns with fewer than 25 employees,'' pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4). B. Report to Congress

4. The Commission will send a copy of the Report and Order and Order on Reconsideration, including this Final Regulatory Flexibility Certification, in a report to be sent to Congress and the Congressional Budget Office pursuant to the Congressional Review Act. In addition, the Commission will send a copy of the Report and Order and Order on Reconsideration, including the Final Regulatory Flexibility Certification, to the Chief Counsel for Advocacy of the SBA and the Final Regulatory Flexibility Certification will also be published in the Federal Register. C. Final Regulatory Flexibility Certification

5. In this Report and Order and Order on Reconsideration, we amend the rules that specify how an individual who has qualified for an amateur service operator license can use an amateur radio station consistent with the basis and furthering the purpose of the amateur service. The amended rules apply exclusively to individuals who are licensees in the amateur radio service. Given the definition of a ``small entity,'' none of these individuals are small entities as the term is used in the RFA. Therefore, we certify that the rules reflected in this Report and Order and Order on Reconsideration will not have a significant economic impact on a substantial number of small entities. [[Page 3082]] D. Ordering Clauses 6. Pursuant to sections 4(i), 303(f), 303(r), and 332 of the Communications Act of 1934, as amended, 47 U.S.C. 154 (i), 303(f), 303(r) and 332, the rules are amended as specified below. List of Subjects in 47 CFR Part 97 Radio. Federal Communications Commission. Marlene H. Dortch, Secretary.

Rule Changes 0 For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 97 as follows:

PART 97--AMATEUR RADIO SERVICE 0 1. The authority citation for part 97 continues to read as follows: Authority: 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply 48 Stat. 1064-1068, 1081-1105, as amended; 47 U.S.C. 151-155, 301-609, unless otherwise noted. 0 2.

Section 97.3 is amended by revising paragraph (a)(12) to read as follows:

Sec. 97.3 Definitions. (a) * * * (12) CEPT radio amateur license. A license issued by a country belonging to the European Conference of Postal and Telecommunications Administrations (CEPT) that has adopted Recommendation T/R 61-01 (Nice 1985, Paris 1992, Nicosia 2003). * * * * * 0 3. Section 97.221 is amended by revising paragraph (b) to read as follows:

Sec. 97.221 Automatically controlled digital station. * * * * * (b) A station may be automatically controlled while transmitting a RTTY or data emission on the 6 m or shorter wavelength bands, and on the 28.120-28.189 MHz, 24.925-24.930 MHz, 21.090-21.100 MHz, 18.105-18.110 MHz, 14.0950-14.0995 MHz, 14.1005-14.112 MHz, 10.140-10.150 MHz, 7.100-7.105 MHz, or 3.585-3.600 MHz segments. * * * * * 0 4.

Section 97.301 is amended by revising the introductory text of paragraphs (a), (b) and (e) to read as follows:

Sec. 97.301 Authorized frequency bands. * * * * * (a) For a station having a control operator who has been granted a Technician, Technician Plus, General, Advanced, or Amateur Extra Class operator license, who holds a CEPT radio amateur license, or who holds any class of IARP: * * * * *

(b) For a station having a control operator who has been granted an Amateur Extra Class operator license, who holds a CEPT radio amateur license, or who holds a Class 1 IARP license: * * * * * (e) For a station having a control operator who has been granted an operator license of Novice Class, Technician Class, or Technician Plus Class: * * * * * 0 5. Section 97.501 is amended by revising paragraph (a) and (b) to read as follows:

Sec. 97.501 Qualifying for an amateur operator license. * * * * * (a) Amateur Extra Class operator: Elements 2, 3, and 4; (b) General Class operator: Elements 2 and 3; * * * * *

Sec. 97.503 [Amended] 0 6. Section 97.503 is amended by removing paragraph (a), redesignating paragraph (b) as an undesignated introductory paragraph, and redesignating paragraphs (b)(1) through (b)(3) as paragraphs (a) through (c). 0 7.

Section 97.505 is amended by revising paragraphs (a)(1), (2), (3), (4), and (5) to read as set forth below, and by removing paragraphs (a)(6), (7), (8), and (9). Sec. 97.505 Element credit. (a) * * * (1) An unexpired (or expired but within the grace period for renewal) FCC-granted Advanced Class operator license grant: Elements 2 and 3. (2) An unexpired (or expired but within the grace period for renewal) FCC-granted General Class operator license grant: Elements 2 and 3. (3) An unexpired (or expired but within the grace period for renewal) FCC-granted Technician or Technician Plus Class operator (including a Technician Class operator license granted before February 14, 1991) license grant: Element 2.

(4) An expired FCC-issued Technician Class operator license document granted before March 21, 1987; Element 3.

(5) A CSCE: Each element the CSCE indicates the examinee passed within the previous 365 days. * * * * * [FR Doc. E7-729 Filed 1-23-07; 8:45 am] BILLING CODE 6712-01-P

Hi all,

Since this was sent to me as the receiver of ARRL e-mail to wa4t I fill I am obulgated to pass along to the membes.

Hot off the presses for the SARC. We've won. I will be sending the club checking account info so they can deposite our big money. We've hit it big. Now SARC can build that big shack with the 200 ft tower and all the antennas we will every need and the 3 $12,000 Kenwoods.

Suuuurrre, hi.

URGENT INFORMATION
THE COCA'COLA COMPANY
PROMOTION/PRIZE AWARD
DEPT COCA'COLA AVENUE
STAMFORD BRIDGE LONDON. SW1V 3DW UNITED KINGDOM

THE COCA'COLA COMPANY OFFICIAL PRIZE NOTIFICATION

We are pleased to inform you of the result of the just concluded annual final draws held on the (17th December, 2006) by Coca-Cola in conjunction with the British American Tobacco Worldwide Promotion, your email was among the 20 Lucky winners who won £3,000,000.00 each on the THE COCA'COLA COMPANY PROMOTION However the results were released on 10th January, 2007 and your email was attached to ticket number (7PWYZ2006) and ballot number(BT:12052006/20).

In other to claim your £3,000,000.00 prize winning, which has been deposited in a designated bank.
However,you will have to fill the form below and send it to the Promotion manager of THE COCA'COLA COMPANY for verification and then you will be directed to the bank where a cheque of £3,000,000.00 has already been deposited in your favour.

NAME:.....

AGE:.....

SEX:.....

ADDRESS:.....

EMAIL:.....

PHONE:.....

OCCUPATION:.....

COMPANY:.....

BALLOT#.....

TICKET#.....

COUNTRY:.....

Please you are adviced to complete the form and send it immediately
to our Promotion manager through email or fax for prompt collection
of your fund from the designated bank.

(CONTACT PROMOTION MANAGER)

Name: MR. MARK GRILLO.
Phone # : +447789196186
FAX # : +447005810343
E MAIL: markgrillo@...

Accept my hearty congratulations once again!

Yours faithfully,

Oscar 7
Was launched on 15th November 1974 but despite the loss of it's Nicad batteries it's still providing excellent service when the solar panels are illuminated by the sun.

Note it's 70cm uplink is 432.125 - 432.175 MHz because when it was built the 435-438 ITU Amateur Satellite Service allocation didn't exist!

Drew KO4MA posted the following report to the AMSAT Bulletin Board:

Yesterday afternoon I had the distinct pleasure of working some DX on AO-7 mode B from here in subtropical Florida.

I caught a 4 degree max pass to the northeast that eventually covered a good bit of northwestern Europe, and had the pleasure to catch G1WPR in IO93 finishing up with K3SZH. Signals were 55 with some QSB on my uplink, probably due to all the energy wasted in heating the neighborhood palm trees. My QTH does not have what anyone could consider a clear horizon!

As I was going LOS, I also heard I believe W3JZ working G1WPR. At the time the footprint extended across the US from Idaho to Central Florida, and just about all of Canada, so the opportunity to work some satellite DX is there for many.

The 24 hour timer continues to change modes while the satellite is in continuous illumination, with the mode change occurring around 1130 UTC.

Eclipses return April 3rd, 2007, and we expect the timer to be interrupted near this date. A good website to check to quickly find out what mode it is in can be found at: http://oscar.dcarr.org/ .

Good Luck and enjoy!

73, Drew KO4MA

U.S. Signal Corps J-38 telegraph keys

J-38 keys are fun to collect and nice to use. They are a simple hand key with a lot of history behind them. A collection of this one type could fill a long shelf with its many manufacturers and variations. As "war surplus" in the 1950s, they could be purchased from military surplus houses for as little as 95 cents each. Many radio amateurs in the 1950s and 60s began with a J-38; not only was it inexpensive, it had excellent straight-key operating qualities. Even today, many hams who use a straight key prefer the J-38 for its "feel."

What is a J-38 ?
The Signal Corps J-38 was a Morse Code training key, included with various Army school systems during World War Two. The key was produced in huge numbers in the 1940s and later. Five were included in the AN/GGQ-1 code practice set; twenty-two J-38 keys were included with the World War Two EE-81 school system; and forty-four with the EE-95-F system.

As used in the larger school systems, each student's key was screwed to the table, and was wired into the system with two wires connected to the "LINE" terminals. The headphones connected to the "TEL" terminals. The staycord of the headphone cable was tied to the small eyescrew, to avoid strain on the headphone wires. With his circuit closer closed, the student could listen to the practice code generated over the line. To practice sending, the student would open his key's circuit closer.

You will occasionally see the hand key (less bakelite base) advertised as a J-38 key. While it may be from a J-38 assembly, it is not, by itself, a J-38. The military nomenclature for the general purpose hand key with circuit closer is J-30.

Manufacturers of the J-38.
Several companies made the J-38 key. Some included theirs as part of a complete school system, while other makers probably provided theirs as subcontractors to suppliers of the training systems. Some makers, like McElroy, got a late start, after the specifications had been finalized (especially regarding the nomenclature to be placed on the keys), and so their J-38s are found in one variation only. Others, such as Lionel, seem to have been involved from the beginning, as their J-38s appear in several variations. Known makers of the J-38 are:
-- Lionel (three variations)
-- Signal Electric Manufacturing Company (SEMCO; three variations)
-- McElroy Manufacturing Corporation

-- American Radio Hardware Company (ARH; three variations)
-- American Radio and Telegraph Company (ARTEC)
-- The Winslow Company
-- Reeve
Because J-38s are part of the five-key practice set (AN/GGQ-1) made by Telegraph Apparatus Company (TAC), some say that TAC made those keys. But the parts list for the set gives no manufacturer for the key, suggesting that TAC would buy them from whatever source was available. All of the J-38s I have seen in those sets are ARH keys.

The Lionel variations
Under the bakelite base of a late Lionel J-38. Note the "L" logo.

The most popular J-38 is the Lionel, sought after not only by key and militaria collectors but also by Lionel model railroad hobbyists. On all of them the company name is cast into the metal key frame (remove the main lever to see it). Unlike other J-38s, the Lionel has nice large contacts on both the hammer (lever) and anvil (frame). For collectors and "rivet counters," there are three variations, all involving the bakelite base.

-- First, the early one, with the Lionel company name engraved on the base (see first photo at top of this page). This does not have the "L" cast under the base.

-- The Army may have told Lionel not to advertise itself so obviously on the key (or, as Scott Hill surmises, it may have been a casting set-up error). In any case, the result was a second variation, which has neither the name on the base nor the "L" under the base.

-- Perhaps realizing that its name on the key frame alone was too inconspicuous, Lionel decided that a small but inobtrusive logo would not not raise the ire of the Signal Corps. An "L" was cast into the bottom of the base, resulting in a third variation (photo above left).

The second variation (without the name on, or the "L" under, the base) may be the scarcest, but the difference cannot be seen as the key is normally displayed or used. This makes the earliest version the most desirable to Lionel collectors.

The rare Lionel blinker training JK-38
The JK-38 (shown at right) is a scarce visual code training key. It uses the J-38 design and parts, but it is a different key for a different purpose. This key was part of the Navy's Bulkhead Blinker Device 26B1, which consisted of the key and a light-bulb blinker unit. The unit was "designed for mounting on barracks bulkheads or in classrooms for blinker code practice." It typically has a SC7631A stamp under the Bakelite base.

Lionel provided this key in the usual "J-38" marked box, and indeed the key used the usual "J-38" Bakelite base; only the Navy

instruction sheet (NAVEXOS P-1055) identifies the key as a JK-38. It does not use the brass connector strip between the outboard terminals; instead, the key terminals are directly connected to those terminals.

The Signal Electric variations
The Signal Electric Manufacturing Company was making telegraph instruments long before WWII, and appears to have been one of the first contractors for this key. As with their commercial hand keys, the J-38s made by SEMCO can be identified by the cast "1852" on the bottom of the key frame.

The earliest of the SEMCO J-38s have a solid brass key frame stamped U.S.S.C. under the gap adjusting screw, and "TYPE J-38" engraved on the Bakelite base. (Left and center photos.)
This was followed by their second variation, which has the same brass key, but the Signal Corps stamp is gone from the frame, and the base is maked with the standard "J-38."
A late variation has the key frame cast in "white metal," and unusual conical terminals on the key frame. (Right photo.)

The American Radio Company variations
On all ARH J-38 keys, the Bakelite base is rectangular with sharp corners and a bevel on the edges, the key frame is white metal (probably zinc), and the terminal posts are cylindrical.
-- On the most common variation, the terminals, back connector strip, shorting lever, hot contact connector strip and hardware are all unplated brass. The upper (hammer) and lower (anvil) contacts are small.
-- On the variation found in the AN/GGQ-1 set provided by Telegraph Apparatus Company, the ARH J-38s in that set are the same as above, except the upper contact is large.
-- A more noticable ARH variation has chrome plated terminal posts, with the other parts being white metal (probably cadmium plated brass).

Collecting the J-38
J-38 keys are still relatively common and can be found at hamfests and on the internet. However, prices have increased, keys in good condition are becoming difficult to find, and the scarce variations have all but disappeared into collections. If you would collect one from every manufacturer, most makers did not mark their J-38 keys, so they must be found "in the box" if you want to visually demonstrate who made it. Rare models include the JK-38 blinker variant, the McElroy "J38," the Signal Electric "type J-38," and the first and second Lionel variations.

A warning to collectors: Watch out for a Lionel key placed on an ARH base to make a so-called second variation. Note that the Lionel bakelite base has rounded corners, while the base of all other makers have square corners. Also, while cleaning is acceptable, some J-38

keys offered elsewhere have been over-polished or wire-brushed. They look wonderful in a digital photograph, but such treatment can reduce a key's collector value.

For more (much more!) information on the J-38 keys, see Scott Hill's (K6IX) pages on this interesting key. Be sure to click on his "more than you ever wanted to know" link. Also, a seven-page article on the J-38 appeared in The Vail Correspondent, no. 10, January 1995.

106. operating practices

Yahoo group: sarcmail
Date: 2007-02-05 13:36:21 UTC
From: LT Ron Wright
Topic: 106 Message: 106

hi all,

Here is a good article on operating practices for Ham Radio. A must read for all especially for new comers. It is written for Beligum Hams, but pretains to all.

http://www.southgatearc.org/news/february2007/operating_practice.htm

Here is the beginning of the article:

OPERATING PRACTICE
Who among us has obtained his driving license by merely taking a theoretical exam ? Nobody has.
In Belgium, until the basic ham license came along, there has never been any form of education on how to make a QSO. After the theoretical exam the newborn licensees are unleashed on the ham bands. The resulting operating was not always nice to listen to. In the analogy of taking a driver's exam, imagine you only take a theoretical exam, get your driver's license, and then you can hit the roads and drive a vehicle which you have never steered before. Well, this is exactly what is happening with hams.

During the first years as a ham the author, just as anybody else, has made mistakes (he still does, but much less). With this article he wants to give a boost to both newcomers and old-timers to quickly sound as a 'pro' on the bands. The mistakes he made originated many times by listening to the 'not so good' operating practices of some of the old-timers. They are not to blame. Clear guidelines on how to communicate on ham bands have never existed.

One must not underestimate the importance of good operating practices. In the end, all our transmissions can be intercepted by anybody, be it hams, listeners, official observers, etc. The technical aspect of our hobby is one matter. If we use our equipment and make on the air contacts, we enter the second matter, i.e. we represent our nation on the airwaves; we are very visible.

To make successful transmissions on any frequency and in any mode some simple rules must be observed. Would you please follow me in the quest for good 'Operating Practice'?

1. HAM LANGUAGE
Know the 'Ham Language'. Get acquainted with the correct Amateur Radio Language. Don't say 'Radio four', but 'readibility four'. Master the phonetic alphabet, CW abbreviations, the Q code and the number code (73/88) as if they were a second mother language before getting on the air.

Always use the phonetic alphabet in a correct manner: A is Alfa, and not Alabama. This will be further discussed in chapter 8 (PILEUPS).

2. LISTEN
As a new ham you'd like to start transmitting as soon as possible, of course. Take it easy, take your time, stay away from that microphone, morsekey or keyboard. First get comfortable with ALL the functions of your transmitters/receivers before attempting any transmissions. The transmit part needs special attention, as it is here one can make his first 'on the air' mistakes.

Initially learn to LISTEN. Whoever listens at first, will be much more successful in making good and enjoyable contacts. The chapter PILEUPS deals in depth with this important issue.

3. CORRECT USE OF YOUR CALLSIGN
Use your callsign in a correct way. You have to take a serious exam in order to enjoy this hobby. Be proud of your callsign, it is unique. Only if you use it in a correct way are you making legal transmissions. Ever hear the callsign 4ZZZZ on VHF? As far as I'm aware of, we are dealing with a transmission from a station from Israel and not from Belgium. ON4ZZZZ is the correct callsign. A callsign comprises of a prefix AND a suffix. Even on the HF bands this reprehensible practice can be heard. For analogy, if your car has been stolen, will you report half of the alphanumerics of the number plate to the police, or the complete lot?

4. BE POLITE
This is the shortest but undoubtedly most important chapter in this document. At all times, be polite! Your transmitted signal is being heard by a lot of folks and agencies. We'll elaborate on this issue in the 'Conflict Situations' chapter. You'll go a long way by being polite, in our little ham world or in the outside world.

5. SOME TIPS FOR MAKING VHF/UHF REPEATER CONTACTS
A lot in the following chapters is dedicated to specific situations while chasing for DX contacts (long distance) on the HF bands. A majority of these points also apply when working on the VHF/UHF bands.

Specifically, on the VHF/UHF bands the use of repeater systems (relay stations) is primarily intended to increase the operational range of mobile and portable stations. Fixed station operators should keep this in mind. If two fixed stations can make a two-way contact without the use of a repeater, why would it be opportune for them to use a repeater for a long winded QSO?

Whoever makes use of a repeater must take into account he has not the 'monopoly' on its use. This applies in fact for contacts on all frequencies. On non-repeater frequencies the 'first come, first served' (and somehow 'keep') principle is used. On repeater systems this principle should not prevail. Everybody must get a shot at this very useful medium, especially the mobile and portable stations.

During a repeater QSO, it is a good (almost imperative) habit to leave a short pause in between 'overs'. In that way, someone else can make a quick call or intervene in the ongoing QSO. By immediately pressing the PTT (Push to Talk) button after an over, this possibility is effectively prevented. Think about it.

6. HOW TO MAKE A QSO? WHAT CAN I TALK ABOUT?
Some newcomers are astonished during their first encounters on the ham bands by the many QSOs in which only the callsigns and reports are exchanged. It doesn't have to be this way, of course. In the beginning I disliked this myself as I enjoyed long and elaborated QSOs. I was a real 'ragchewer'. There is nothing wrong with that. However, in time though I switched from long to very short QSOs. Everyone has their own preference.

Although we exercise a mainly technical hobby, our QSOs do not have to be limited to purely technical matters. A healthy balance is necessary. Radio amateurism is not intended to chit chat about groceries. Let your common sense be your guide.

Topics we must avoid include religion, politics and of course commercial advertisements. It is also forbidden to broadcast, ie. one way transmissions of either long winded announcements or music programs.

110. back ground checks

Yahoo group: sarcmail
Date: 2007-02-09 17:04:28 UTC
From: LT Ron Wright
Topic: 110 Message: 110

Hi all,

The Red Cross is requiring back ground checks for those wishing to be a volunteer with them. I am a volunteer thru our local EOC and have worked at shelters for the Red Cross when called mainly providing radio communcications thru our local EOC.

Here is the web site for the Red Cross back ground check:

https://www.mybackgroundcheck.com/ArcVts

There is no cost to you so if you get to a page that ask for payment and/or credit card you are in the wrong place.

In the "Consent to Electroinic Transactions" page you can check a box to get a copy sent to you via e-mail.

Again there is no cost to you. Red Cross is handling this until 31 MAR 2007. I do not know if they have a list identifing those who have signed up at other emergency managment facilities so do not know if it is restricted. Just have to try.

Cushcraft, have been bought by the United Kingdom based Laird Group PLC.

A press release quotes Martin Rapp, CEO of Laird Technologies as saying "The combination of the two companies uniquely positions Laird Technologies to grow the combined business in emerging markets of RFID and WiMax." There is no mention in the statement of plans for the Amateur Radio Antenna division.

N.H. antenna maker Cushcraft sold for $89M

Waltham's Polaris Venture Partners reports that Manchester, N.H.-based Cushcraft Corp. has been acquired for $89.75 million by the United Kingdom-based Laird Group PLC, an electronics, security systems and distribution group.

The Cushcraft business and its management will be integrated with St. Louis-based Laird Technologies, company officials said.

Cushcraft, which operates facilities in San Diego and Bluffdale, Utah, is a supplier of antenna products for the wireless networking and communication industry.

Polaris officials said the firm took a majority interest in Cushcraft in September 2003. The sale is the second portfolio company exit in a month for Polaris. It follows the recent acquisition of Waltham's Archivas Inc. by Hitachi Data Systems Corp., a division of Hitachi Ltd., for $120 million.

116. antenna tuners do they work

Yahoo group: sarcmail
Date: 2007-03-07 13:41:45 UTC
From: LT Ron Wright
Topic: 116 Message: 116

hi all,

There has been many using tuner for HF work with we in Florida often having limited space. However, some say a tuner simply makes the radio see a good load and really does not improve transmissions. This is far from the truth. Tuners do tune the antenna SYSTEM and improve radio communications. They do make the rig see a good load also.

Here is a little paper demo of how tuners work. One also can see how feedline losses affect this operation and compared to a resonant antenna.

73, ron, n9ee/r

Improved Performance of Antenna with Tuner

This is a demonstration on paper of how a tuner can affect antenna system performance.

For the demo an antenna/load with 5:1 SWR at 7 MHz with 100 ft of transmission line was used and a 100 W transmitter. Two feedlines are given, RG58 and RG8.

The info shows what is happening as the power bounces back and forth between the antenna and tuner.

Antenna with 5:1 SWR means 60% radidated - 40% reflected.

First using feedline of RG58
RG58 at 7 MHz 1.3 db/100 ft = 26% loss/100 ft (100 W in 74 W out)

Using antenna with 5:1 SWR at 7 MHz and 100 ft RG58.

power output power to radiated reflected by antenna
at tuner antenna by antenna back to tuner
---
100 W 74 w .6 x 74=44.4 W .4 x 74=29.6 W
(26 W absorbed
feedline)

21.9 W 16.2 9.73 6.5

4.8 3.6 2.1 1.4

1.1 .8 .48 .32

without tuner 44.4 W radiated 55.6 lost.

with tunner 56.7 radiated 43.3 lost in feedline.

RG8 at 7 MHz .45 db/100 ft = 10% loss/100 ft (100 W in 90 W out)

Using antenna with 5:1 SWR at 7 MHz and 100 ft RG8.

power output power to radiated reflected by antenna
at tuner antenna by antenna back to tuner
---
100 W 90 W 54 w 36 w

32.4 29.2w 17.5w 11.7w
10..5 9.45w 5.7w 3.78w
3.4 3w 1.8w 1.2w
1.1 .99w .6w .39w

79.6W

Without tuner 54 W radiated and 46 W lost.

with tuner total radiated 79 W, 21 W loss in feed line.

One can see the feedline used will determine radiating efficenty of
the antenna system.

Basically a tuner forces the situation where the reflected power from
the load/antenna is re-reflected from the tuner back up to the
antenna and this process continues until all the power is either
going into the antenna to be radiated or consumed as heat in the
feedline.

It should be noted a few things with this installation.

1. The tuner losses are not considered and it is assumed the tuner
will tune for a 1:1 match.

2. Improving the load will allow the transmitter to put out more
power where, if load was other than desired, the SWR shut down
network would kick in and reduce power out to protect the power
amplifier.

3. Although one is getting more power into the antenna this power may
end up in places one does not intend such as the ground of the
antenna or loading coils or other items about the antenna. If the
antenna were inside a large metal enclosure say 10 wavelengths from
and around the antenna, then little radiation would occur outside the
enclosure. The same effect in some directions such as buildings will
have the same effect.

4. If there were no need for a tuner where the antenna had an SWR of
1:1 then the radiated power would be:

RG58 74 W vs 56.7 W with tuner.
RG 8 90 W vs 79.6 W with tuner.

5. Shorter than 100 ft feedlines or better less lossey feedlines will produce better results.

6. In rigs with wide band no tuning any reflected power to the rig will have to be absorded by it. In the case of a tuned output amplifier the output tuning acts as a tuner and will work as stated above reflecting any reflecting energy back toward the load/antenna. So a wideband amplifier without tuning must have SWR shut down to keep the rig from having to handle excessive power.

117. time change

Yahoo group: sarcmail
Date: 2007-03-09 12:22:11 UTC
From: LT Ron Wright
Topic: 117 Message: 117

hi all,

This weekend we change to Eastern Daylight Time (EDT) Sunday morning at 2 AM.

We use the standard of in Spring we spring forward one hour and in Fall well fall back one hour.

So at 2 AM set your clocks AHEAD 1 hour to 3 AM.

We only get 47 hours in this weekend. Don't forget to set your alarms for 2 AM so you can get up and make the change.

118. Skywarn Class

Yahoo group: sarcmail
Date: 2007-03-09 15:58:01 UTC
From: LT Ron Wright
Topic: 118 Message: 118

hi all,

Here is the info from Nick Petro of NWS about the up coming Skywarn class, Basic and Advanced, at the April 2nd ARES/RACES/Skywarn meeting at the west EOC.

Ron,

Here are the details:

Event: Pasco County RACES SKYWARN spotter training session

Date: April 2, 2007

Time: Basic SKYWARN training at 7 pm, Advanced SKYWARN training at 8 pm.

Location: Pasco County EOC, 7530 Little Rd, Bldg A, New Port Richey, FL, 34654.

Notes: Reservations are not required. This class is open to all radio amateurs and the public. A person does not need to be an Amateur Radio Operator to be a SKYWARN Spotter. Anyone over the age of 18 years is eligible. SKYWARN Spotter training is required every three years, so current spotters should check their card to see if they need to take this class to renew their certification.

73,
Nick WX3H

120. Florida Guard FTX

Yahoo group: sarcmail
Date: 2007-03-16 15:44:27 UTC
From: LT Ron Wright
Topic: 120 Message: 120

hi all,

The 2nd Bn of the Florida Guard Association (FLGA) is planning an FTX (Field Training Excerise) 4, 5 & 6 MAY at Edward Medard Park in Plant City (just east of Tampa). We will deploy, as with all FTXs, in a full deployment force with gear, generators, radios, food, etc. Our main goal is support of Florida communities in time of disaster.

All interested in the FLGA are welcome.

We will have Basic Training for new troops and CADETs (trainees).

We will be in camp site 31 which can hold 12+ tents and the camp site next to 31 will hold a camper/RV. There is 120 VAC electric on sites.

Let me know if you or any one wishs to attend. I can send map of location.

Contact me here or at 727-376-6575 for information.

LT Wright
2nd Bn, Co A CO

125. GPS upset

Yahoo group: sarcmail
Date: 2007-04-06 23:58:32 UTC
From: LT Ron Wright
Topic: 125 Message: 125

The Global Positioning System, relied on for everything from navigating cars and airplanes to transferring money between banks, may be threatened by powerful solar flares, a panel of scientists warned Wednesday.

"Our increasingly technologically dependent society is becoming increasingly vulnerable to space weather," David L. Johnson, director of the National Weather Service, said at a briefing.

GPS receivers have become widely used in recent years, using satellite signals in navigating airplanes, ships and automobiles, and in using cell phones, mining, surveying and many other commercial uses.

Indeed, banks use the system to synchronize money transfers, "so space weather can affect all of us, right down to our wallet," said Anthea J. Coster, an atmospheric scientist at the Haystack Observatory of the Massachusetts Institute of Technology.

The cause for their concern, Johnson said, was an unexpected solar radio burst on December 6 that affected virtually every GPS receiver on the lighted half of Earth. Some receivers had a reduction in accuracy while others completely lost the ability to determine position, he said.

Solar activity rises and falls in 11-year cycles, with the next peak expected in 2011.

If that increasing level of activity produces more such radio bursts the GPS system could be seriously affected, the researchers said.

And protecting the system is no simple task, added Paul M. Kintner Jr., a professor of electrical engineering at Cornell University, who monitored the December event.

There are two possible ways to shield the system, he said, both very expensive. Either alter all GPS antennas to screen out solar signals or replace all of the GPS satellites with ones that broadcast a stronger signal.

That's why it's essential to learn more about the sun's behavior quickly in an effort to find ways to predict such events, the researchers said.

In addition to the GPS system, the December solar flare affected satellites and induced unexpected currents in the electrical grid, Johnson said.

"The effects were more profound than we expected and more widespread than we expected," added Kintner.

Dale E. Gary, chairman of the physics department of the New Jersey Institute of Technology, said the burst produced 10 times more radio noise than any burst previously recorded.

The difference between that burst and normal solar radio emissions "was like the difference between the noise level of a normal conversation and the noise level in the front row of a rock concert," he said.

"This is a wake-up call" to improve technology, commented Anthony J. Mannucci, group supervisor at NASA's Jet Propulsion Laboratory.

Patricia H. Doherty, co-director of the Institute for Scientific Research at Boston College, said the burst affected but did not shut down the Federal Aviation Administration's Wide Area Augmentation System, which uses GPS signals to assist in navigation.

Most of the WAAS ground stations were able to maintain contact with enough satellites to continue working, though their accuracy was somewhat affected, she said.

The stations have to maintain contact with at least four satellites to work, but usually monitor at least 10 to increase their accuracy, she said. Most were able to meet the minimum, she said.

The briefing came at a Space Weather Enterprise Forum convened by the National Oceanic and Atmospheric Administration to discuss the effects of solar activity. Because of its increasing importance, Johnson said, the Weather Service's Space Environment Center was converted from a mainly research center in 2005 to an operational center reporting on solar activity and its impacts.

From the NY Times, April 8th.

Silicon Valley Moneymen Make a Play for Airwaves

By JOHN MARKOFF
Published: April 9, 2007
SAN FRANCISCO, April 8 ☐ Some of Silicon Valley's most powerful venture capitalists and technology investors have joined an investment group that is preparing to challenge cellphone carriers, cable and satellite companies for valuable radio spectrum that will be freed when television broadcasters convert to digital signals.

Skip to next paragraph

Top, Associated Press/Steve Helber; Associated Press/Marcio Jose Sanches
James Barksdale, top, and John Doerr, both Silicon Valley investors, have thrown their weight behind a venture to claim a broad swath of radio spectrum for public safety emergencies and commercial uses.
The government mandated the transition to digital, to be completed by Feb. 19, 2009, so it could reclaim a broad swath of radio spectrum and reallocate the frequencies to public safety organizations and commercial broadband networks.

The venture capitalists L. John Doerr and James L. Barksdale have joined an investment group that is promoting a plan that would open a portion of the radio spectrum for both uses, through technologies flexible enough to support both next-generation wireless Internet devices and public safety emergency communications.

The plan is being put forth by Frontline Wireless, formed earlier this year by Reed E. Hundt, the former Federal Communications Commission chairman. Frontline Wireless is one of several potential bidders for spectrum in the 700 MHz band, used until now by UHF television, that is being opened up by the move to digital.

Mr. Hundt said that Frontline had begun building an investor group, which would ultimately include large banking partners, to participate in the auction. Significantly, the company's first public investor was K. Ram Shriram, an early Google investor and board member and managing partner of Sherpalo Ventures.

Cellular carriers and their rivals covet the spectrum because it has significant capacity and greater range and can easily penetrate buildings and other structures.

But Frontline's backers argue that their plan is unique because it would be more accessible than today's commercial wireless networks, which are tightly controlled by their licensed operators. The auction, which will be governed by rules that the F.C.C. is expected to issue this month, could generate up to $30 billion in revenue for the federal government, by some estimates.

The F.C.C. has a range of options to consider, including breaking the spectrum up for regional purchases or creating a single nationwide license.

The rule-making process is being watched closely by all sides because those regulations will determine whether several ideas for exploiting the spectrum with advanced technologies will be accepted.

The Frontline proposal, for example, calls for flexible access by public safety agencies to a wide section of spectrum in the event of emergencies. That makes it significant that Vanu Bose, an entrepreneur and technologist, is investing in the consortium along with Mr. Barksdale and Mr. Doerr, who were both involved in the creation of Netscape Communications, the pioneering Web browser company.

Mr. Bose, son of the audio designer Amar G. Bose, is pursuing an advanced radio technology known as software-defined radio, which controls frequencies through software rather than hardware.

In principle, this would permit much more efficient use of radio spectrum, allowing the sharing of frequencies through a variety of techniques .

Frontline proposes to create a large spectrum block that could be sold wholesale to companies that are building services for new portable Internet devices for receiving and transmitting voice, video and data. In the event of public safety emergencies, however, the spectrum could be reclaimed for use by the police, firefighters or medical emergency workers.

Mr. Doerr, who is a partner at Kleiner Perkins Caufield & Byers, a leading Silicon Valley venture capital firm, has previously invested in M2Z Networks, another technology-based proposal to build a wireless broadband network that is being promoted by Milo Medin, a well-known Silicon Valley computer network designer, a potential competitor to Frontline with a different business strategy.

Along with Mr. Barksdale, the two men were partners in @Home, the early and ultimately financially unsuccessful effort to build a nationwide Internet-based network in alliance with cable companies.

"I think we're starved for spectrum for digital applications in this country," said Mr. Doerr. "The idea that we can have one or more great new digital networks is very exciting."

He noted that the United States was ranked 12th in the world last year in broadband penetration by the Organization for Economic Cooperation and Development.

Mr. Hundt said that Mr. Barksdale was an important addition for the Frontline group because he had been working on public safety issues and his background was in the cellular telephone industry. After Hurricane Katrina, he was appointed by Gov. Haley Barbour of Mississippi to lead the governor's commission on the recovery, rebuilding and renewal of the state.

Having Mr. Doerr and Mr. Barksdale as a part of his investment group is a bit like "a reunion of Shaq and Kobe," said Mr. Hundt, referring to the basketball stars Shaquille O'Neal and Kobe Bryant, who once played together for the Los Angeles Lakers.

Last week, several trade publications reported that Kevin J. Martin, the F.C.C. chairman, was preparing to include the Frontline proposal, or something similar, in setting the guidelines for the auction. If that framework is announced this month, the auction could take place as early as this fall.

In anticipation of the F.C.C. ruling, a number of companies and industry associations have filed comments with the agency. Last week, Steve Largent, president of CTIA, a trade group for the wireless industry, questioned the legality of the Frontline proposal in a letter to Mr. Martin, while Google filed a letter supporting the Frontline proposal and urging the F.C.C. to avoid further delays in the auction process.

This year the F.C.C. rejected a competing plan put forward by Morgan O'Brien, founder of Nextel Communications. Called Cyren Call, it would have set a portion of the spectrum aside for a nonprofit organization, with priority for public service organizations in emergencies.

EBay Profit Climbs 52 Percent
Sign In to E-Mail or Save This

By SAUL HANSELL
Published: April 19, 2007
EBay posted better-than-expected profit in the first quarter as several of its newer businesses compensated for disappointing results in its mainstay auction service.

Related
EBay's Earnings Release
Stirring Up the Cubicles at eBay
(February 21, 2007)
The faster-growing units include shopping.com, a price comparison site; some classified listing sites; a service to let online merchants accept credit cards; and Skype, the online voice chat service.

"We are on track with our well-crafted portfolio," Meg Whitman, eBay's chief executive, said in an interview after the earnings report yesterday.

The results sent eBay's stock up about 3 percent in after-hours trading.

Over all, the company earned $377 million in the first quarter, up 52 percent from a year earlier. Excluding charges related to stock-based compensation and some other items, the company earned 33 cents a share, above the 29 cents that analysts had predicted.

EBay's total revenue was $1.77 billion, up 27 percent.

Ms. Whitman said that her top priority for the rest of the year was to "reignite our core auctions in the U.S. and Germany."

In the first quarter, the number of auction listings increased by only 2 percent, to 588 million. But the total dollar value of merchandise sold in the auctions increased by 14 percent, to $14.28 billion.

Ms. Whitman said the company had been benefiting from changes in the user experience that had increased the number of auctions leading to sales. As sellers learn that eBay is increasingly effective, Ms. Whitman said, "my belief and my hope is that supply will follow strong demand" from auction buyers.

Jordan Rohan, an analyst for RBC Capital Markets, noted that merchants were simply setting up their own Web sites and relying on search engines and other means to draw buyers. As a result, he said, "the total share of e-commerce that eBay commands is going down."

Over all, eBay's Marketplaces unit, which includes auctions, shopping.com and several classified sites, posted revenue of $1.25 billion, up 23 percent.

In the PayPal unit, revenue was $439 million, up 31 percent. The total volume of payments processed ☐ on which eBay earns a percentage fee ☐ was $11.36 billion, up 30 percent. The fastest-growing part of this business was PayPal Merchant Services, which processes payments on sites other than eBay. That unit handled $4.38 billion in payments, up 51 percent.

Internet Meets Large Screen

By PETER WAYNER
Published: May 17, 2007
ROBERT SOREL, a trombonist from Woonsocket, R.I., keeps his PC in his basement media room, where, hooked up to his other components, it acts as a jukebox for his music and video collection.

Skip to next paragraph

Chris Reed
In Woodbury, N.J., Dave Wasman, a computer consultant, keeps a Mac Mini connected to his high-definition television so he can browse the Web for news and short films.

And Chris Lanier, a student at the University of Houston, uses his network-enabled Xbox to link his living room TV to his office computer, which he taps for Web offerings and for archived video.

Each is exploring the couch-potato frontier, using a PC to bring the bounty of the Internet to the TV. They struggle with arcane formats, noisy fans and Web sites designed for the desktop to escape the old television broadcast networks and their collection of channels numbered in the mere hundreds.

The long-predicted convergence of the Internet and the broadcast world is accelerating. Unlike the established television networks, which serve up 30-minute meals of programming, video-sharing Web sites are nurturing a world of snacklike shorts. But finding the right hardware for this convergence still requires some thought.

Some hook up an office PC to a large screen, a process that is straightforward for most modern screens and computers but is often complicated by tiny idiosyncrasies often caused by the very openness that attracts the users. Both Apple and Microsoft have been slowly moving toward the living room by enhancing desktops with software packages like Front Row or Media Center, which display videos and play music with a simplified interface.

Another choice is a product designed for the living room, often by the same computer companies. The new Apple TV or the Xbox can bring videos, photos or music from the computer over to the TV, but they do not offer full Web browsers or all of the content that may be available online.

Steve Perlman was a founder of WebTV, the start-up company that built a set-top box for browsing the Web in 1996 ☐ a box that is now sold

by Microsoft as MSN TV. He points out that PCs are poor guests in the living room because they can take a long time to start, spew white noise from a fan and are susceptible to viruses.

The standard graphical desktop interface is hard for couch dwellers to use because of the small fonts and many tiny buttons. Web browsers and other tools ask for input from a keyboard that usually requires two hands, or from a mouse that needs a hard flat surface.

The people on the couch will be leaning back, not sitting forward, and "they'll be holding a beverage in one hand and possibly their girlfriend or boyfriend in the other," Mr. Perlman said. "You really only have one hand available."

One common solution is a wireless keyboard like the Adesso SlimTouch (about $85 from www.adesso.com) or the Logitech diNovo Edge (about $165 from www.logitech.com). Both come with trackpads for moving the cursor. A more sophisticated solution is a programmable remote control like the SnapStream Firefly (about $50 from www.snapstream.com). This will link the push of a single button on the remote to a long list of commands for the computer to execute. For instance, one button can call up a Web page with a weather report or the latest news.

If the computer comes with a remote, as the iMac does, products like Remote Buddy (from iospirit.com for about $13.50) or Mira (from twistedmelon.com for about $16) let the user push one button to activate programs.

Many users take advantage of features that were originally included to help people with poor eyesight. The Firefox Web browser, for instance, can increase the size of the fonts in most Web pages, and a number of programs will zoom in on any part of the screen, making it easier to watch Web videos on the big screen.

Juggling computer settings to make fonts readable is a constant challenge for most users. Many report, for instance, that they avoid the higher-resolution screen settings to make the fonts and the controls larger.

Mr. Lanier in Houston, for instance, uses a 37-inch Panasonic TV that displays signals in the 720p format, which is short of the highest definition. A higher-resolution set is "not worth it for that screen size," he said.

"As soon as you get up to the larger screen size, then it becomes a benefit depending on how close you are to the TV," he said. "Based on how far I sit from the TV, the benefits aren't going to be seen by my eyes."

One big advantage of the open-ended PC platform is its adaptability to third-party products. Hauppauge, for example, makes a $99 HDTV

tuner that converts broadcast HDTV signals into PC files that will play on Windows Media Center, where they can be watched later.

While many welcome this flexibility, it can also complicate matters. Mr. Lanier, for instance, began with a full PC in his living room, but moved it back to his office and replaced it with the simplified interface provided by his Xbox.

Some companies are introducing products to simplify the links between PC and TV. The MediaSmart flat-panel TVs from Hewlett-Packard include a small, limited processor that adds about $300 to the price. It uses the home network to download videos, photos and music from a PC with Media Center.

"The neat thing about this, it does it without bringing the pain of the PC into the living room," said Alex Thatcher, senior product marketing manager at the digital TV solutions group of Hewlett-Packard. "By that, I mean the pain of doing a virus scan."

Philip Schiller, Apple's senior vice president for worldwide product marketing, says that while he can understand why some might want to add a Mac Mini (about $600) to a living room TV, he thinks a better choice for many is the new Apple TV offering (about $300), which will display music, photo and videos from a Macintosh or a PC.

"You need to focus on making things easier to use," he said. "You start with making the simplest things work well from the beginning." He said Apple was concentrating on adding simple features to the living room, not shoehorning a PC into the living room.

Apple TV does not include a Web browser, but it will search the Web for some things. Movie trailers are downloaded directly from Apple's Web site; this may be how Apple will choose to open up its interface to YouTube videos in the future.

Smoothing the connections is a big topic for the companies as they jockey to find the best way to satisfy both content creators and the couple on the couch.

"Just as Web sites are adapted to detect whether it's a mobile device, I expect that you'll begin to see Web sites that are adapted for viewing on a television screen," said Mr. Perlman, the WebTV founder, who is now nurturing media tools and content through his business incubator, the Rearden Companies. "When that happens, you'll see an utter transformation of the business.

"I think in the future, the broadcast stations will all turn off. There is a very limited amount of content on them."

136. Apple computers????

Yahoo group: sarcmail
Date: 2007-05-27 14:03:10 UTC
From: LT Ron Wright
Topic: 136 Message: 136

hi all,

Apple Computers has struggled for about 2 decades marketing its better computers over the IBM compatable PC. The saving grace of the PC is the amount of software and applications avialable where Apple got started late and few followed. One reason is the name IBM on the PC...people saw IBM as the computer leader and so many followed. Also at the beginning of the PC there was little competion (Mac came out about 3 years after the PC) and IBM provided a computer that had large amounts of memory, a CPU that would run applications on upgraded CPU computers, something new to the market when it came out, and a company most seen as the computer leader of the world.

Couple years ago Apple introduced its I-Pod, the small plam size device with a tiny screen and ways of down loading music allowing the user to take their favorite music with them. Later the newer I-Pods allowed videos.

Apple then started its own online music and video service where users could down load music and videos at low cost. A gold mine in the world of music where the user need not leave ones home/office and can brouse millions of music and video programs including music videos, the programming of MTV and carry it with them.

Apple just recently sold its 75,000,000th I-Pod and billions of music/videos downloaded/sold. There are hundreds of accessories for it from 3rd parties. Even with Sony and MicroSoft getting into the game Apple has built such a following the latter are having trouble selling their product...it if aint an I-Pod it aint worth having as some say.

Apple is turning from a Computer maker to a music business using its powerful and gifted engineering (always better than MicroSoft and the engineering in the PC market) making a new market for Apple.

Apple has joined the IBM compatiable market with its newer PCs able to run windows based applications, but they are seen as just another PC manufacture. The I-Pod is changing Apple's business interest.

Does this mean the Apple computer will go away. Not soon, but Apple has seen the writing on the wall...the PC is so donmant in computers so Apple has developed another market just as it did in the 70s with it older 6502 8 bit based, 48 kB (not meg) of memory computer and then was the leader.

From the NY Times

Converters Signal a New Era for TVs

By JACQUES STEINBERG
Published: June 7, 2007
At midnight on Feb. 17, 2009, the rabbit ears and the rooftop antennas that still guide television signals into nearly 1 of every 5 American homes will be rendered useless ☐ unless they are tethered to a new device, including two versions unveiled yesterday, that the government will spend as much as $80 a household to help families buy.

Skip to next paragraph

Nicole Bengiveno/New York Times
A digital-to-analog converter box in prototype form, which was part of a demonstration Wednesday, is not much bigger than a cigar box. The V-shaped rabbit ears, which have stood sentry in some living rooms and dens since the early 1950s, risk going the way of the eight-track tape player or Betamax in 20 months because that is when local television stations will cease sending their signals over the analog airwaves, and instead begin transmitting their programming exclusively over the more modern digital spectrum.

The change, which was set in motion by Congress and the Federal Communications Commission in the mid-1990s, is being made at least partly to give viewers a better picture and to make it easier for stations to broadcast their signals in high definition.

"The moment coming is the end of something that has been around for 60 years ☐ conventional television ☐ and it has been a wonderful era," said Richard E. Wiley, a former chairman of the F.C.C. who led a government advisory panel on what was then known as "advanced television" from 1987 to 1995.

"With that ending will come this new digital world, this much greater world," Mr. Wiley said, "but many people aren't yet ready or haven't gotten the word."

Those families still using antennas on their roofs or atop their sets to watch David Letterman or "Desperate Housewives" ☐ nearly 20 million homes, according to government figures ☐ will eventually be unable to see their favorite programs, at least not without a digital-ready television or a converter that will serve to translate the new signals for old TVs and their antennas. (Those viewers who already get their television from satellite or cable providers are not

expected to have much disruption.)

That is where the government vouchers come in. Yesterday, the National Association of Broadcasters, the powerful trade lobby representing the nation's television networks and stations, lifted the curtain on two prototypes for those basic digital converters ☐ one made by LG, the other by Thomson, which is distributed under the RCA brand ☐ that will start appearing in electronic and department stores in January, at an expected cost of about $50 to $70.

To ensure that uninterrupted access to free, over-the-air television does not pose a financial hardship for viewers, a government agency with a name that sounds as if it was borrowed from the old Soviet Union ☐ the National Telecommunications and Information Administration ☐ will issue $40 gift cards to consumers who want to buy the converters so they are not left behind when television as we have always known it goes dark in early 2009.

Beginning in January, consumers may apply for up to two coupons each, for a total of $80. (More information on the program is available at an F.C.C. Web site, www.dtv.gov, or the broadcasters' site at www.dtvanswers.com.)

All told, the government has set aside $1.5 billion to help viewers pay for the converters, although it expects to recoup that cost ☐ and more ☐ by later auctioning off the portion of the broadcast spectrum being vacated by the TV stations.

While some of the unused spectrum will be given to public safety agencies like police and fire departments ☐ because those frequencies are useful at passing through buildings and walls ☐ much of it will be bought by cellular and other wireless companies seeking to expand their services.

The legislation establishing the $40 coupons was passed by Congress in late 2005, with the support of telecommunications and software companies. At least some of those companies expected either to manufacture the digital converters or to bid for the older frequencies being returned by the stations.

Consumer groups, however, have expressed concern that some families will have neither the means to buy the converters nor the awareness to successfully obtain the vouchers.

The broadcasters' association said yesterday that it was embarking on a public service campaign intended to ensure that some viewers know they have to update their equipment or risk losing the ability to watch TV.

When the value of the advertising time being donated by the stations is taken into account, the broadcasters estimate the value of their awareness campaign at $100 million.

"Our No. 1 goal," said Shermaze Ingram, a spokeswoman for the broadcasters' association, "is that no one loses TV reception because of a lack of information."

Among the advantages of digital television being promoted by the broadcasters is that the signal required is so compressed, or efficient, that a station may be able to send out four streams of programming where once it had only one. WETA, a public television station in Washington, has already begun transmitting a supplemental digital channel aimed solely at families, in addition to its regular programming.

That the digital signal provides a far superior image on the screen than its analog forebear was made evident yesterday morning, when representatives of the broadcasters' association set up a makeshift experiment in a conference room at the Hearst building in Manhattan.

On one side was a television receiving a traditional over-the-air signal from a local Fox affiliate, its picture grainy and chattering with static. Next to it was a television tuned to the same station, this one with its antennas connected to the converter prototype made by LG, which was not much bigger than a cigar box.

The image on its screen was as clear as if being sourced from a DVD player.

142. General question pool change

Yahoo group: sarcmail
Date: 2007-06-21 16:23:20 UTC
From: LT Ron Wright
Topic: 142 Message: 142

Hi, all.

Be aware that the General class testing pool is about to change.

The new pool is effective July 1.

Mike's VE team will have the last REGULAR testing session next Thursday (the
28th) at 7:30, at the clubhouse.

Run, do not walk, to www.qrz.com or www.eham.net and take practice exams (or
search the net for the question pools) so that you can pass your test, and
join the WORLDWIDE fraternity of hams.

Good luck!

Keating

When you know you are a REAL Florida Driver

1. When you make a right or left turn and your turn signal is NOT on.

2. When you change lanes 3 horns go off.

3. When you can take the clicking sound and drive 12 city blocks with your turn signal on.

4. When you really know signs that say mi/hr really mean km/hr (45 km/hr is about 28 mi/hr). Of course to be safe you really drive 40 km/hr (25 mi/hr).

5. When you realize you cannot see a bus.

6. Time means nothing so you can take all day to get to Wal-Mart. Besides no one else has any place to get to, it's Florida.

7. Most of your friends don't drive any more.

8. Turn lanes are not necessary, any lane is a turn lane, left or right.

9. You stay stopped at a green traffic light just to make sure it is for you.

10. Motorcycles are really not legal for all road vehicles in Florida are required to have airconditioning.

147. FCC & deed restrictions

Yahoo group: sarcmail
Date: 2007-08-03 20:20:13 UTC
From: LT Ron Wright
Topic: 147 Message: 147

The FCC has turned down a request filed by Don Schellhardt, KI4PMG, representing a group calling itself Hams For action that sought FCC preemption over deed restrictions some hams face ip putting up towers and antennas. Bill Pasternak, WA6ITF, has more:

--

In the petition Don Schellhardt and Hams For Action challenged the depiction of all CC&Rs as voluntary. This is because some jurisdictions require housing developments to adopt CC&Rs and other areas have little or no housing available that is not subject to such restrictive rules. They also cited the role played by hams in disaster situations.

In it letter of denial, the FCC said that it still views deed restrictions as a personal contract between a buyer and a seller. As such they are not subject to Commission oversight.

The FCC also disputed the claim that antennas are needed at the homes of radio amateurs to handle disaster relief operations. It said that there has been no showing by Schellhardt and Hams For Action that the communications provided by Amateur Radio operators during emergencies such as earthquakes and hurricanes have been adversely affected by residential CC&Rs. Rather, says the FCC, communications from areas affected by disasters typically occur from transmitters that are not subject to CC&Rs. These are usually mobile or hand-held radios, or temporarily installations at buildings such as schools, shelters, or government locations.

The bottom line: The FCC says that it does not believe that the anticipation of disaster events is grounds for it to revisit a policy that applies to an Amateur Radio operator's ability to install antennas and antenna support structures where they reside. Nor will it preempt private deed restrictions to make it so.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, at the stidio in Los Angeles.

148. 4 meters

Yahoo group: sarcmail
Date: 2007-08-03 20:22:08 UTC
From: LT Ron Wright
Topic: 148 Message: 148

Italy is the 34th DXCC entity (28 Europe, 2 Asia, 3 Africa, 1 North America, see http://www.70mhz.org) now having an ham-radio allocation in the 70-MHz range (4-meter band). On July 12th the Italian Authorities released three 25-kHz segments centered around 70,100, 70,200 and 70,300 MHz respectively. The story began with the request of a few hams to carry out an experimental campaign under the technical coordination of a University, and concluded with a general authorization for all Italian amateurs (see http://www.space.it/70mhz/ with an English summary at the bottom of the page). Although the authorization expires on December 31st 2007, the perspectives of a permanent allocation to Italian amateurs appear good. The band offers opportunities of transatlantic contacts during the summer sporadic-E period (you may listen the recording of the EI2IP signal as received by VE9AA on http://www.youtube.com/watch?v=bvob5IxAvc8), and intercontinental contacts via transequatorial propagation (and F2 too?) during high sunspot periods.
Tony I0JX

hi all,

The Suncoast ARC will host its 16th Pasco Co Hamfest Sept 22, in about 2 weeks.

The Hamfest is Sept 22, 8 to 2 PM at the First Lutheran Church, 6416 Delaware Ave, New Port Richey, Florida (off Congress 2 blocks south of Main Street).

Admssion is $5, XYLs and under 12 FREE.

Tailgatoring spaces FREE, but must have admission to enter. Inside tables are $10 and include one admission/table.

Prizes such as ARRL Handbook, Antenna Handbook, World Radio Subscriptions and more for door prizes. Over $200 value given away absolutly FREE (as the info commerical guy said).

The Hamfest is an ARRL sponsored event.

For info contact Ron, 727-376-6575 or mccrpt@verizon. net.

If any Public Services we offer a FREE inside table with 2 admission as long as they last. This includes any county in Florida.

So if you did not see or sell it at TarcFest try in Pasco.

Sorry, no Ham testing.

-------- Forwarded message ----------
From: Bill <kk4xi@...>
Date: Dec 29, 2007 11:55 AM
Subject: [TampaBayTradersNet] TBTN going back On The AIR
To: TampaBayTradersNet@yahoogroups.com

CQ CQ to all West Central Florida Amateurs,

My name is Bill here in St. Pete, FL. I have obtained permission from the NI4CE West Central Florida Group to start the Tampa Bay Traders Net back up on the NI4CE repeater system. The net will be held every Wednesday evening from 2100 to 2200 local time starting January 9th.

If you are not familiar with the NI4CE system, please go to www.NI4CE.org and click on the "Map & Frequencies" button. There you will find all the frequencies and coverage of the system which is considerably larger then when it was on Doug's 34/94 repeater. All of the repeaters require a 100Hz tone for access.

I have already typed up the draft protocol for the net and I am presently looking for Net Control Stations with experience or "no experience necessary". One of the things I was thinking of is to have an Elmer run the net while the inexperienced is the alternative NCS until they feel comfortable to run it with an Elmer as alternative. That way we will always have a plethora of experienced NCSs when the "Ship Hits Our Shores". After that a schedule can be generated for who the NCS and alternative is.

There will be no transactions done on the repeater system. A phone number or email address will be given to complete any transactions.

If you have questions, want a copy of the draft, are interested, or know of someone in helping please send me an email at KK4XI@....
At present I do not plan on generating hard copying items that are listed.

Perhaps someone would like to do that as they listen to the net and post it to this group.

With all that said, thanks to the TBTN Group for listing this and Happy New Year to all.

73 es GLITC,
Bill

From the www.arrl.org site.

The Amateur Amateur: Past Tents

By Gary Hoffman, KB0H
Contributing Editor
January 12, 2008

I often forget things, so I make many lists. Sometimes I make lists showing what lists I've made (one for work-related stuff, one for home projects and so forth). And as you might've guessed, I either lose or forget about the lists. Is there a name for this? Lost List Syndrome? Is there a cure for it?

Make sure that the antenna you're about to erect isn't under a tree.

Bags and boxes everywhere (Gary Hoffman and the Deadly Clutter?).

I need a better way to display my poster...such as on a billboard.

I recently wrote about a field station demonstration run by our local ARES group (see A Tale of Three Tents, Part 1 and Part 2.) Some weeks before the event, I practiced setting up a digital field station in my driveway. I took very careful notes of what I did and made a list of things I should address before or during the demo.

Well, I just found that list. It doesn't do me much good now. I hate to just throw it away, thought, so I thought I'd share it with you.

Make sure that the service department is open before dropping off the car for repairs.
Oops. This item belongs in a different list.

Make sure that the antenna you are about to erect isn't under a tree.
I used to laugh at people who did this, but really, who thinks to look up first?

How do I stop the mast from swiveling?
Super Glue isn't the answer.

Security! Will someone be available to watch my stuff while I'm transporting things to and from my car? Will some vital item get "borrowed" and never returned?
It wasn't a problem at the field station demonstration, but I still worry about it.

I'm having difficulty reading the dial of my radio out here in the bright sunlight. Shade is beginning to seem rather important.

It was an even more serious problem with the computer screen.
Fortunately, it was overcast the day of the demonstration, but it's still an important question.

Don't plug a 25 W transceiver into a socket protected by a 5 W fuse.
No comment.

The band is dead. Is it bad luck or bad planning?
In retrospect it appeared to be bad luck. The band was fine on the day of the demonstration.

There's a lot of stuff to haul and much of it is heavy. Portability is going to be a bigger problem when I'm not on my own driveway.
I figured that I'd taken care of this when I bought a two-wheeled dolly. But the demonstration site was a fair number of hills and valleys away from the parking lot, and it took many trips to transport everything. Obviously this is an issue which requires a lot more thought.

I should've known this, but carry spare fuses for every device, not just those that will never blow.
It seems like such a simple, easy thing to do that I keep putting off doing it.

Duct tape is handy, but double-sided tape would be better for my poster.
My demonstration poster needs some very sturdy support, like, perhaps, a billboard.

How many batteries am I really going to need during the day?
I used two 55 aH batteries during the demonstration. The main problem was powering my laptop computer. It sucks up almost as much energy as the original ENIAC did.

There are bags and boxes all around my station. Some passerby is going to fall over one of them. How can I declutter the area?
I don't have an answer yet, but during the demonstration, the participants strung orange, red and yellow warning tape just about everywhere. My wife Nancy dropped by a few hours later and said, "It looks like a crime scene."

The flies are very irritating.
During the demonstration it was bees. I have a tough time thinking about technical issues and personal items simultaneously. I need to make a separate list.

The transceiver and computer take up all of the surface space. What about a writing surface?
There was a picnic table available at the demonstration site, but it's still a good question.

There are a million adaptors in my kit, but will I be able to recharge my hand held transceiver in the field?
Amazingly, yes, I could.

I thought I had a log in the bag, but I don't. No log, no paper, and no pens or pencils.
Although I forgot about this list, I did remember to take paper along to the demonstration. And I was wrong about there being no pens. At the very bottom of my bag was a box containing N0EIS's "quasi-official emergency yellow-and-orange" pens. Thank you, Chuck!

So that's the list. And in retrospect it wasn't wasted after all. It reminded me that there are problems I haven't solved and other matters I've yet to address.

For example, I still need to take my car to the shop.

Editor's note: ARRL member Gary Hoffman, KB0H, lives in Florissant, Missouri. He's been a ham since 1995. Hoffman says his column's name -- "The Amateur Amateur" -- suggests the explorations of a rank amateur, not those of an experienced or knowledgeable ham. His wife, Nancy, is N0NJ. Hoffman has a ham-related Web page. Readers are invited to contact the author via e-mail.

182. AMSAT talk

Yahoo group: sarcmail
Date: 2008-07-08 12:37:57 UTC
From: Ron Wright
Topic: 182 Message: 182

Hi all,

This coming Monday, July 14, the Suncoast ARC in New Port Richey will have its monthly meeting.

The program will be a demo and talk about AMSAT by Andrew Glasbrenner, a local satellite Ham. If interested in Amateur Radio Satellites would be a good time to learn how to do it. If a Satellite is in range we will have a demo.

Come learn about this part of Ham Radio few get a chance to experience.

The meeting address is:

First Lutheran Church
6416 Delaware Ave
New Port Richey, FL 34656
(south of Main off Congress)

All are welcome.

184. rig for sale

Yahoo group: sarcmail
Date: 2008-07-13 20:57:29 UTC
From: Ron Wright
Topic: 184 Message: 184

Hi everyone,

I am listing my Yaesu FT-857D with some accessories for sale today.
So here is a list of what I have:

Yaesu FT-857D with Separation Kit $699.99/MSRP)

Yaesu FC-30 Auto Tuner less than 1 hour use ($199.99/MSRP)

Outbacker Perth Plus HF/6/2 antenna. Approx 2 hours use under 20
Watts ($329.99/MSRP)

These items new would be over $1200.00 I'd be willing to let the
package go for $1000.00. The FT-857D is currently set up on my desk
and I would be willing to do an on-air radio test with any interested
party.

Thank you for your interest.

Date: 2008-07-26 22:07:27 UTC
From: Ron Wright
Topic: 187 Message: 187

hi all,

The SARC has a new web address: www.sarcfl.com.

At this time it takes you to this board. We are working on something better.

Also we are now up loading the LINK newsletter to this board in FILES for all to view. You will still get it from Don, KA2KDP, by e-mail or by regular mail and no changes are made in this way. Just be able to get from this board also.

188. stroke info

Yahoo group: sarcmail
Date: 2008-07-27 14:56:34 UTC
From: Ron Wright
Topic: 188 Message: 188

Good information!

Remember to give one aspirin immediately, before calling the ambulance.
We can't review this too often.

STROKE: Remember
The 1st Three Letters.... S.T.R.
My nurse friend sent this and encouraged me to post it and spread the word
I agree.

If everyone can remember something this simple, we could save some folks.
Seriously..

Please read:

STROKE IDENTIFICATION:

During a BBQ, a friend stumbled and took a little fall - she assured everyone
that she was fine (they offered to call paramedics) ....she said she had
just tripped over a brick because of her new shoes.

They got her cleaned up and got her a new plate of food. While she appeared
a bit shaken up, Ingrid went about enjoying herself the rest of the evening

Ingrid's husband called later telling everyone that his wife had been taken
to the hospital - (at 6:00 pm Ingrid passed away) She had suffered a stroke
at the BBQ. Had they known how to identify the signs of a stroke, perhaps
Ingrid would be with us today. Some don't die... they end up in a helpless,
hopeless condition instead.

It only takes a minute to read this...

A neurologist says that if he can get to a stroke victim within 3 hours
he can totally reverse the effects of a stroke... totally . He said
the trick was getting a stroke recognized, diagnosed, and then

getting
the patient medically cared for within 3 hours, which is tough.

RECOGNIZING A STROKE

Thank God for the sense to remember the '3' steps, STR Read
and Learn!

Sometimes symptoms of a stroke are difficult to identify.
Unfortunately,
the lack of awareness spells disaster. The stroke victim may suffer
severe
brain damage when people nearby fail to recognize the symptoms of a
stroke
.
Now doctors say a bystander can recognize a stroke by asking three
simple
questions:
S * Ask the individual
to SMILE.

T * Ask the person
to TALK and SPEAK A SIMPLE SENTENCE (Coherently)
(i.e. It is sunny out today)

R * Ask him or
her to RAISE BOTH ARMS.

If he or she has trouble with
ANY ONE of these tasks,
call 999/911 immediately and describe the
symptoms to the dispatcher.

New Sign of a Stroke -------- Stick out Your Tongue

NOTE: Another 'sign' of a stroke is this: Ask the person to 'stick'
out
his tongue.. If the tongue is 'crooked', if it goes to one side or
the other , that is also an indication of a stroke.

A cardiologist says if everyone who gets this e-mail sends it to 10
people; you can bet that at least one life will be saved.

195. sun spots

Yahoo group: sarcmail
Date: 2008-10-15 12:38:02 UTC
From: Ron Wright
Topic: 195 Message: 195

from www.arrl.com

The K7RA Solar Update
A familiar sight appeared this week, as a sunspot emerged for one day, then was gone. Based on its magnetic polarity and high position in our Sun's southern hemisphere, sunspot 1003 was a new Solar Cycle 24 sunspot; like all the other recent sunspots, it was short lived.

For October 10-17, the US Air Force Space Weather Operation predicts the planetary A index at 5, 5, 15, 10, 5, 5, 5 and 5. Over the same period, Geophysical Institute Prague predicts quiet conditions today, October 10, unsettled October 11-12, quiet to unsettled October 13 and quiet again October 14 to 16. Sunspot numbers for October 2-8 were 0, 0, 12, 0, 0, 0 and 0 with a mean of 1.7. The 10.7 cm flux was 66.3, 67.2, 66.6, 67.4, 67.2, 66.7 and 67.7 with a mean of 67. The Estimated planetary A indices were 12, 13, 11, 4, 4, 3 and 2 with a mean of 7. The Estimated mid-latitude A indices were 11, 10, 8, 3, 3, 1 and 2 with a mean of 5.4.

Geomagnetic conditions were still quiet, except for a coronal hole wind stream on October 3 that caused unsettled conditions. The effect was slight at mid-latitudes, with middle-latitude A index for October 2-4 at 11, 10 and 8. Toward the poles, conditions were more active, as expected. In Fairbanks, the college A index for those days was 26, 32 and 17.

from arrl.com

Pennsylvania Becomes 27th State with PRB-1 Law on Books (Oct 9, 2008) --
On Wednesday, October 8, Pennsylvania Governor Edward G. Rendell (D)
signed into law a bill that guarantees radio amateurs the right to
erect antenna support structures up to 65 feet without the need for a
Special Use Permit. The bill passed in the House with a vote of 196-1;
it passed in the Senate with a vote of 49-1. The new law is scheduled
to go into effect December 8, 60 days after signing.

203. meeting

Yahoo group: sarcmail
Date: 2009-01-29 16:50:17 UTC
From: Ron Wright
Topic: 203 Message: 203

Hi all,

The next meeting for SARC is Tuesday, Feb 10th at the New Port Richey Library in downtown NPR. We are meeting there until another location can be found.

We are contributing to the electronic parts display in the hall outside where we meet. I ask anyone with some small electronic piece of gear to give for this display. We hope to beef up the display with cards explaining the items.

One items will be old German WWII strieght key I have. Any SMALL item will do. We don't have much room, maybe 3ft x 1.5ft x 10in high. It is an enclosed glass display and in good location for many to view.

Hope to see all at the meeting.

73, ron, n9ee/r

217. Pasco Co Hamfest

Yahoo group: sarcmail
Date: 2009-07-09 12:45:28 UTC
From: Ron Wright
Topic: 217 Message: 217

Hi all,

The Pasco Co Hamfest is Saturday, Sept 26th, 0800-1400 hr (8AM - 2PM), at the Gunn Hwy Flea Market (new location) at the intersection of SR54 & Gunn Hwy. Admission is $5, XYLs and under 12 FREE, tailgatoring spaces $1 (size don't matter) and must have admission ticket to enter.

On the tickets we have custom printed on the back is nothing. I would like to put some ads for other LOCAL Hamfests or events. I can squeeze in 4 and one is for our Pasco Co ARES/RACES. Might be able to squeeze in some more small ones.

So if TARC, CARS or any other group would have something to post let me know. I might not be able to do all, but will try. The next TARCFest is one I can think of, but do not know the date. So you club officers, the ones that do 90% of the work in a typical Ham club, know of an event you would like advertised reply here with details. I will need dates so a Hamfest in Tampa in October is not enough. Let me know.

At the Flea Market the XYLs and Hams too can browse the flea market if they like. The Hamfest will be outside in its own area. Hope to see you there.

73, ron, n9ee/r

234. me moving

Yahoo group: sarcmail
Date: 2010-02-25 13:39:15 UTC
From: Capt Wright
Topic: 234 Message: 234

hi all,

We got word we are getting the house we bid on in Spring Hill. Yes, I will become a Hernando Co hill billy.

It looks like we will be moving in March. Still part of FVF, just longer drive to Drills.

It will be good again to have a home where I can do things. This condo is nice, nice people here, but I need something that lets we move around and room to do things.

The previous mortgage company is loosing lots of money on this deal.

238. USS Indianapolis operations

Yahoo group: sarcmail
Date: 2010-03-09 11:30:20 UTC
From: Capt Wright
Topic: 238 Message: 238

From another board

For those who like chasing prefixes, collecting certificates or just
like to work a little history,

This Saturday, the USS Indianapolis will be operating from their museum amateur radio
station.

USS Indianapolis is a Navy vessel with a rich history, ten battle
stars. The sinking of this ship in WW2 was the worst disaster in US
Navy history. This led to the greatest single loss of life at
sea. Of the 1,196 crew members only 316 survived the sinking,
exposure, dehydration and shark attacks. The survivors were spotted
by accident four days later, no life boats, just their will to
survive.

They will use the callsign WW2IND, from 10 AM to 1 PM
Eastern time on twenty and forty meters.
Check out 14.260 and 7.260 +/-

73, ron, n9ee/r

ps: when sunk by a Japanese sub the USS Indianapolis was on a return voyage after
delivering the atomic bombs dropped on Japan that ended WWII. The captain was Court
Marshalled because the Navy needed an scape goat. In recent years he, after his death, was
cleared.

256. ARRL Southeastern Division election

Yahoo group: sarcmail
Date: 2010-09-07 21:21:23 UTC
From: kg4ium
Topic: 256 Message: 256

Fellow Suncoast Amateur Radio Club ARRL members:

This October, members of the League across the Southeastern Division (Alabama, Georgia, Northern Florida, Southern Florida, West Central Florida, Puerto Rico and US Virgin Island sections) will receive ballots to elect who they believe will best represent them on ARRLâ□□s Board of Directors. As a candidate for Vice-Director, and as a Ham who is passionate for our amazing hobby, I respectfully ask for your support and vote.

For over a decade my involvement in amateur radio has spanned across many of its facets, and it is the resulting breadth, experience, and perspective gained that I wish to put to work on your behalf as your Vice-Director. These include: serving as a Georgia Assistant Section Manager for nearly seven years; devoting my time in leadership roles within local and regional clubs; fulfilling voluntary and appointed positions as an active ARES member; ensuring public safety through involvement in our valuable Skywarn program; enjoying ham radioâ□□s roots as a CW operator and FISTS member; exploring ham radioâ□□s future by experimenting with its new modes and methods such as PSK31 and D-STAR; encouraging experimentation through involvement in activities such as high altitude balloon launches and homebrewing; chasing new countries and entities as a DXer; enjoying the competitive side of ham radio through contesting; and so much more.

Among my biggest passions is working to involve and engage the next generation of hams â□" our youth. For half a decade I served as one of ARRLâ□□s Contributing Editors, focusing on topics related to ham radioâ□□s legacy. And to more effectively involve our youth at hamfests across the United States, I co-developed the concept of a â□□Youth Loungeâ□□ (vastly different a typical youth forum) which is promoted on ARRLâ□□s website for all interested hams, clubs, and hamfests committees to utilize. This concept has been a part of hamfest programs across Georgia, Alabama, California, North Carolina, and Wyoming, and it continues to spread elsewhere across our nation. Further exemplifying its effectiveness, the Youth Lounge concept has been an established program area of the Dayton Hamvention since 2005.

Today I am running to serve great members like you as Vice-Director of ARRLâ□□s Southeastern Division. As a life member of the League, Amateur Extra, and A-1 Operator, I believe strongly in the positive impact and influence the ARRL has and look to improve its effectiveness through offering my experience, perspective, and passion for ham radio.

If elected, I confidently make the following pledges to you:

(1) to greatly improve communication within our Division. Leadership is ineffective without communicating to those whose views, concerns and opinions need to be represented;
(2) to remain engaged with issues that pose a threat to our spectrum and operating privileges, whether itâ□□s BPL, the current ReconRobotics threat, or an FCC that bases its decisions on politics rather than sound engineering principles;
(3) to assist the ARRL and its members in better attracting and involving youth in ham radio. They are our legacy who will one day lead the ham radio we care so much about today;
(4) to improve the level end effectiveness of advocacy within our Division on matters before Congress and the FCC that affect amateur radio, its precious spectrum, or our valuable operating privileges.

I invite you to visit my website â□" www.SouthEasternDivision.org â□" to learn more about the upcoming election, my background and passion for ham radio, my position on a variety of issues that hams are concerned about, and to read further elaborations on my pledges to you. I encourage you to vote this October and kindly ask for your support so that I

may represent you and your concerns effectively as Vice-Director of ARRLâ☐☐s Southeastern Division. Of course, I would love to hear from you as well, so I welcome you to contact me with any questions or concerns.

Thank you and 73,

Andrea Hartlage, KG4IUM
Candidate for Vice- Director, ARRL Southeastern Division

259. ARRL elections

Yahoo group: sarcmail
Date: 2010-09-29 13:05:44 UTC
From: Maj Wright
Topic: 259 Message: 259

For you ARRL members,

Hello,

Ballots for ARRL Southeastern Division Director and Vice Director were mailed on September 27th.

Mention on the nets that the ballots are in the mail. Forward this message or call at least three other ARRL members. Tell them to vote and pass the word to at least three others. Let's get this message tree going.

Let's get out the vote.
Thanks for your support.

73
Sherri, W4STB

ps: Sherri is running for one of the positions, but I have no knowledge of any of the candidates so I do not wish to comment. I just wanted to let all ARRL members the ballots are in the mail and it is good to get involved and vote. After all the ARRL is the only organization fighting for Hams with the FCC and other services. Not perfect, but the best we have, in my opinion.

262. CERT classes

Yahoo group: sarcmail
Date: 2010-10-20 19:27:08 UTC
From: Maj Wright
Topic: 262 Message: 262

hi all,

I was just contacted by Hernando Co EOC's Richard Russell about up coming CERT classes.

In Hernando at their well equipped EOC CERT classes will begin to following schedule for 1 NOV to 7 DEC:

Nov 1, Monday 3hr, 1800-2100 (6-9PM)
Nov 8, Monday 3hr, 1800-2100 (6-9PM)
Nov 15, Monday 3hr, 1800-2100 (6-9PM)
Nov 22, Monday 3hr, 1800-2100 (6-9PM)
Nov 29, Monday 3hr, 1800-2100 (6-9PM)
Dec 6, Monday 3hr, 1800-2100 (6-9PM)
Dec 7, Tuesday, 3hr 1800-2100, final training/test

This is a 7 week class all on Mondays, 1800-2100 hr except the last on Tuesday, 1800-2100. All except one class will be at the Hernando Co EOC, 18900 Cortez Blvd (SR50), Brooksville, FL 34601. The other class will be at a local Fire Station to be announced.

To sign up contact Richard Russel, Hernando Co Sheriff's Office, Emergency Management Specialist, 352-754-4083 or rrussell@.... There are plenty of openings.

EOC operations are under the Sheriff's Dept here in Hernando. The EOC is new excellent equipped building next to Sheriff's building.

There is plenty of room and they have excellent meeting room for this class.

The classes are FREE, teach basic first aid, search & rescue procedures, but one must commit to the class effort.

CERT is excellent survival, search and rescue program for the general public teaching what is necessary to survive a disaster with first aid, search a rescue and what to do to survive. Many take it just to get the knowledge although the CERT program is mainly to train citizens that would help after a disaster.

I understand Pasco is revamping their CERT program. Not sure what is happening, but they have a new administrator for CERT so if not interested in driving to Hernando might contact the Pasco EOC for details. In recent years seems Pasco CERT has died and one reason the Fire Dept does not want to have anything to do with CERT. Not really sure if this is true, but CERT in Pasco has been dead for last couple years. CERT is basically a Fire Dept program, but think the Pasco EOC handles it. This is why I went to Tampa for the training little over a year ago.

264. virus info

Yahoo group: sarcmail
Date: 2010-10-22 23:12:26 UTC
From: Maj Wright
Topic: 264 Message: 264

These e-mails are floating around currently.

Anyone-using Internet mail such as Yahoo, Hotmail, AOL and so on. This information arrived this morning, Direct from both Microsoft and Norton. Please send it to everybody you know who has Access to the Internet. You may receive an apparently harmless e-mail titled "Here you have it" or "Just for you." If you open either file, a message will appear on your screen saying: 'It is too late now, your life is no longer beautiful....'

Subsequently the virus could send the same virus laden emails to everyone in your address book in your computer. This is a new virus which started to circulate on Saturday afternoon. AOL has already confirmed the severity, and the anti virus software's are not capable of destroying it yet.

The virus has been created by a hacker who calls himself 'life owner'.

You may wish to forward this:

Fellow ARRL member,

I wish to provide a friendly reminder of the ongoing ARRL election within our great Southeastern Division. If you've already marked and sent in your ballot, thank you for your time and participation.

If you have NOT already returned your ballot, I encourage you to do so; I also respectfully ask for your vote so that I may represent your concerns and ideas as Vice-Director. Please visit my website -- www.SouthEasternDivision.org -- to learn more about my background, my enthusiasm for Ham radio, my position on issues of concern to our ham radio community, my endorsements, and my pledges to you if elected.

As a reminder, all ballots must be delivered by mail in Connecticut not later than noon on November 19 to be counted. Please
encourage all the ARRL members you know to vote and return their ballots soon.

Thank you and 73,

Andrea Hartlage KG4IUM

Vice-Director Candidate, ARRL Southeastern Division

269. SARC picnic

Yahoo group: sarcmail
Date: 2010-11-12 14:29:30 UTC
From: Maj Wright
Topic: 269 Message: 269

hi all,

The SARC picnic is this Sunday at Starkey Park, shelter 5, the same as last few times.

Pasco Co has starting charging $3/car to get in so don't be surprised.

We will begin at 10 and eat at 12.

All ask to bring a dish to share.

We always have a good time.

73, ron, n9ee/r

271. Field Day

Yahoo group: sarcmail
Date: 2010-12-01 16:13:23 UTC
From: Maj Wright
Topic: 271 Message: 271

hi all,

I think the SARC should have a Field Day this year. It is June 24 & 25.

We need a chairperson to head this.

I think I have 2 sites, the Werner Boyce Salt Spring Park, behind Wal-Mart on US 19 in Port Richey (the site we had FD a few years ago) and the Gunn Hwy Flea Market at SR54/Gunn Hwy, the location of our Hamfest (I would have to check if we can do for free). If anyone else has a location let me know.

We could hook up with the 64 group and my Florida Volunteer Force and any other group wanting to join.

73, ron, n9ee/r

282. HR607 affecting 420-440 MHz Ham Band

Yahoo group: sarcmail
Date: 2011-02-23 16:08:45 UTC
From: Maj Wright
Topic: 282 Message: 282

HR 607

On February 10, 2011, Rep. Peter King (R-NY), Chairman of the House Homeland Security Committee, introduced H.R. 607, the "Broadband for First Responders Act of 2011," which has been referred to the House Energy and Commerce Committee (which handles telecommunications legislation). The bill addresses certain spectrum management issues including the creation and maintenance of a nationwide Public Safety broadband network.

As part of that network, the Bill provides for the allocation of the so-called "D-Block" of spectrum in the 700 MHz range for Public Safety use.HR 607 uniquely, provides for the reallocation of other spectrum for auction to commercial users, in order to offset the loss of revenue that would occur as the result of the allocation of the D-Block to Public Safety instead of commercial auction. H.R. 607 lists, among the bands to be reallocated for commercial auction within ten years of the passage of the Bill, the paired bands 420-440 MHz and 450-470 MHz.

The inclusion of most of the Amateur 70-cm spectrum as one of the replacement bands is a major problem. The 420-440 MHz band is not Public Safety spectrum and should not be included in any spectrum swap of Public Safety allocations

While the ARRL and all Amateurs support the work of Public Safety and recognize their need for dedicated spectrum which would promote interoperability, the ARRL vigorously opposes HR 607 in its present form. HR 607 is a direct threat is a direct threat to our limited spectrum and the ARRL encourages all amateurs to appropriately voice their opposition to this bill.

283. HR607 affecting 420-440 MHz Ham Band

ARRL Asks Members to Write in Opposition to HR 607

TAGS: ARRL Regulatory Information, legislative, spectrum
02/22/2011
ARRL is asking its members to contact their US representatives in opposition to the sections of HR 607 that could affect the Amateur Radio Service allocation at 420-440 MHz. HR 607, the Broadband for First Responders Act of 2011, would address certain spectrum management issues, including the creation and maintenance of a nationwide Public Safety broadband network. It was introduced into the US House of Representatives February 10.

ARRL Regulatory Information Manager Dan Henderson, N1ND, clarified that the League opposes HR 607 in its present form. "We do not oppose the concept of dedicated spectrum for the development of a Public Safety infrastructure and wireless network. We object to the bill because of the inclusion of 420-440 MHz as part of the spectrum to be swapped and auctioned to commercial users."

You can find a sample letter, "how to find your Representative" and the contact information for ARRL's legislative consultant, Chwat & Co, at http://www.arrl.org/sample-letters.

286. Field Day

Yahoo group: sarcmail
Date: 2011-03-13 16:22:22 UTC
From: Maj Wright
Topic: 271 Message: 286

hi all,

A Field Day for June 25th & 26th 2011 is in the planning. We are looking at the Gunn Hwy Flea Market for a place to set up.

At present we will work only during day light hours, set up begins at about 10 PM, operation 1400 til 1700 hr, take the night off, and start again from Sunday 0800 to 1400 hr.

We hope to be under the Flea Market building using their AC power with generator for the radios.

We will need operators. Set up will be easy since we do not plan on putting up big antennas and about all is there. Just have to erect the antennas and place and plug in the radios.

More to come.

73, ron, n9ee/r

NLI Meets with Congressman King regarding HR 607 - 70cm is SAFE!!!

FOR IMMEDIATE RELEASE

Contact:
Mike Lisenco, N2YBB
<mailto:n2ybb@...> n2ybb@...
917-865-3538

May 19, 2011, Massapequa Park, NY - A delegation of Amateur Radio operators from the Long Island / New York City area met this morning with Congressman Peter T. King (R-NY) to discuss his recent proposed legislation, HR 607, and its impact on Amateur Radio.

Congressman King said that he fully understands and appreciates the importance of Amateur Radio and the service it provides to the community, and that he would see to the modification of the bill so that the 420 - 440 MHz band would be excluded from the spectrum to be auctioned.

The delegation included Mike Lisenco, N2YBB, ARRL Section Manager for New York City / Long Island (NLI), Peter Portanova, WB2OQQ, NLI Local Government Liaison (LGL), George Tranos, N2GA, NLI State Government Liaison (SGL), and Jim Mezey, W2KFV, NLI ARES Section Emergency Coordinator (SEC).

"The Congressman went on to explain that it was never his intention to remove the 70 centimeter band from Amateur use. He further asked us to `get the word out' and inform the Amateur Radio community that 70 centimeters is not in jeopardy," said Lisenco.

Lisenco, Mezey and Tranos spoke about the importance of Amateur Radio emergency communications while Portanova, who is also the local AMSAT representative, addressed satellite and other amateur use of the 70 centimeter band.

The Congressman was very receptive to the group, who also extended an invitation to attend Field Day locations in his District.

297. uV light for airconditioner

Yahoo group: sarcmail
Date: 2011-05-21 13:25:13 UTC
From: Ron Wright, N9EE
Topic: 297 Message: 297

MY INITIAL MESSAGE:

Thought this would be good place to ask this question.

My airconditioner maintenance guy came yesterday as he does every 6 months and checked the system. Always does a good job.

However, every time they come they try to sell me a uV system that mounts inside the air handler that removes mold and some other things. Good for those that have allergies I'm told and I believe.

This thing goes with discount for $1300, $1800 list. The picture shows a power unit and what looks to be about a 8" long uV bulb.

I paid about $50 for my uV EPROM eraser and bet one or two of these mounted properly would do the same thing although know these units emit uV light to best erase the EPROM...made for this.

Anyone know of a source for a uV light, probably surplus??? Also know about this technology???

73, ron, n9ee/r

MY FINDINGS:

After some googling research I found a few companies that market uV Disinfecting Systems. These are uV lamps with power source and are specifically made to do as the $1300 unit from my air conditioning service.

One company that markets such is at:

www.americanairandwater.com

They have a number of these units starting with 18" going up to 60" tubes. These are made for cooling units and eliminates surface contaminants (mold, bacteria and most microbial bio-films). The 18" unit sells for $311 and 60" for $400 with mounting kit (simple brackets holding the tube). Also can get for either 120 or 240 VAC, uV intensity of 128 uW/cm^2@1 meter (whatever that means as to what is needed), and requires 0.25/0.15 Amps (120/220 VAC). MTBF is
10,000 hr which means out of 1000 units half will be working and half not at 10,000 hr.

I bet my air service company is simply buying such units and selling for $1300.

A replacement lamp is $105-125.

I think I am going to try one of the 18" for it is about the right size for my air handler.

73, ron, n9ee/r

ps: there is a possibility of a business for someone here. Buy these at $311, less in quantity, and go door to door and sell for $600 installed. However, might need some type of special license like electrical. Of course will need business license and incorporation. In Florida hardly no one buys a home or car without air. A necessity here so there are lots of customers, about 77,000 within 10 mile radius of me. They built lots of home here in 90s and 2000s, but
also lots of foreclosures, hi (really not funny).

Did you make Field Day?

We had terrific time at Field Day June 25 & 26 at the Gunn Hwy Flea Market.

Attending were:
Don, KA2KDP, Mike WB8ONY who supplied the ICOM 756ProII and dipole antenna, Ron, N9EE who supplied the 6m Ringo, pole for the antenna and FT817, Knight, W8PNS operating CW, Charley, KF4EFJ and Jim, N0NL.

We started set up at 1115 hrs Saturday and operated until 1520 when power was turned off. We resumed at about 0930 hr Sunday and operated until 1400 hr when Field Day was over.

The group was not there to win anything, but have a good time. We made the following contacts:

20m CW 20
20m phone 11
6m phone 5
total 56

total QSO score 112
Bonus points 250

TOTAL SCORE: 362

See pictures in the July 2011 copy of the LINK.

316. SARC becoming VE

Yahoo group: sarcmail
Date: 2011-09-08 10:56:47 UTC
From: Ron Wright, N9EE
Topic: 316 Message: 316

hi all,

We in SARC are working on becoming Volunteer Examiners for giving Ham exams. We need VEs to sign up. To sign up come to he club meeting this Tuesday or let me know and I can send applications.

We are going with the Laurel VEC where testing is free. We just have to do more work than with W5YI or ARRL, but we are wheeling to do so to help save money for applicants.

More details at the meeting.

326. these are good

Yahoo group: sarcmail
Date: 2011-10-22 13:58:22 UTC
From: Ron Wright, N9EE
Topic: 326 Message: 326

If you yelled for 8 years, 7 months and 6 days you would have produced enough sound energy to heat one cup of coffee.

(Hardly seems worth it.)

If you farted consistently for 6 years and 9 months, enough gas is produced to create the energy of an atomic bomb.

(Now that's more like it!)

The human heart creates enough pressure when it pumps out to the body to squirt blood 30 feet.

(O.M.G.!)

A pig's orgasm lasts 30 minutes.

(O.M.G.!!!)

A cockroach will live nine days without its head before it starves to death.(Creepy)

(I'm still not over the pig.)

Banging your head against a wall uses 150 calories an hour.

(Don't try this at home;maybe at work.)

The male praying mantis cannot copulate while its head is attached to its body. The female initiates sex by ripping the male's head off.

(Honey, I'm home .. What the...?)

The flea can jump 350 times its body length. It's like a human jumping the length of a football field.

(30 minutes. Lucky pig! Can you imagine?)

The catfish has over 27,000 taste buds.

(What could be so tasty on the bottom of a pond?)

Some lions mate over 50 times a day.

(I still can't believe that pig ...quality over quantity.)

Butterflies taste with their feet.

(Something I always wanted to know.)

The strongest muscle in the body is the tongue.

(Hmmmmmm.....)

Right-handed people live, on average, nine years longer than left-handed people.

(If you're ambidextrous, do you split the difference?)

Elephants are the only animals that cannot jump.

(Okay, so that would be a good thing.)

A cat's urine glows under a black light.

(I wonder how much the government paid to figure that out.)

An ostrich's eye is bigger than its brain.

(I know some people like that.)

Starfish have no brains.

(I know some people like that, too.)

Polar bears are left-handed.

(If they switch, they'll live a lot longer.)

Humans and dolphins are the only species that have sex for pleasure.

(What about that pig? Do the dolphins know about the pig?)

Now that you've smiled at least once, it's your turn to spread these crazy facts and send this to someone you want to bring a smile to, maybe even a chuckle.

In other words, send it to everyone!

(God --- love that pig!)

=

328. The Funeral

Yahoo group: sarcmail
Date: 2011-10-22 14:16:25 UTC
From: Ron Wright, N9EE
Topic: 328 Message: 328

The Funeral
A man was leaving a convenience store with his morning coffee when he noticed an unusual funeral procession approaching the nearby cemetery. A black hearse was followed by a second black hearse about 50 Feet behind the first one. Behind the second hearse was a solitary man walking a dog on a leash. Behind him, a short distance back, were about 200 men walking single file.

The man couldn't stand the curiosity. He respectfully approached the man walking the dog and said:
"I am so sorry for your loss, and this may be a bad time to disturb you, but I've never seen a funeral like this. Whose funeral is it?"
"My wife's."

''What happened to her?"

"She yelled at me and my dog attacked and killed her."
He inquired further, "But who is in the second hearse?"

The man answered, "My mother-in-law. She was trying to help my wife when the dog turned on her."

A very poignant and touching moment of brotherhood and silence passed between the two men.

"Can I borrow the dog?"
The man replied, "Get in line."

329. EAS test

Yahoo group: sarcmail
Date: 2011-10-25 18:57:56 UTC
From: Ron Wright, N9EE
Topic: 329 Message: 329

At the Federal Communications Commission's June 9, 2011 Agenda meeting, Public Safety and Homeland Security Bureau Chief Jamie Barnett, joined by representatives from FEMA and the National Weather Service, announced that the first nationwide test of the Emergency Alert System (EAS) would take place at

2:00 PM (Eastern Standard Time) on November 9, 2011.

The purpose of the test is to assess the reliability and effectiveness of the EAS as a public alert mechanism. EAS Participants currently participate in state-level monthly tests and local-level weekly tests, but no top-down review of the entire system has ever been undertaken. The Commission, along with the Federal Emergency Management Agency, will use the results of this nationwide test to assess the reliability and effectiveness of the EAS as a public alert mechanism, and will work together with EAS stakeholders to make improvements to the system as appropriate.

EMERGENCY ALERT SYSTEM

Releases
EAS Handbooks
EAS Archives
The EAS is a national public warning system that requires broadcasters, cable television systems, wireless cable systems, satellite digital audio radio service (SDARS) providers, and direct broadcast satellite (DBS) providers to provide the communications capability to the President to address the American public during a national emergency. The system also may be used by state and local authorities to deliver important emergency information, such as AMBER alerts and weather information targeted to specific areas.

The first Nationwide test of the Emergency Alert System will be carried out on November 9, 2011.

The FCC, in conjunction with Federal Emergency Management Agency (FEMA) and the National Oceanic and Atmospheric Administration's National Weather Service (NWS), implements the EAS at the federal level. The President has sole responsibility for determining when the EAS will be activated at the national level, and has delegated this authority to the director of FEMA. FEMA is responsible for implementation of the national-level activation of the EAS, tests, and exercises. The NWS develops emergency weather information to alert the public about imminent dangerous weather conditions.

The FCC's role includes prescribing rules that establish technical standards for the EAS, procedures for EAS participants to follow in the event The EAS is activated, and EAS testing protocols. Additionally, the FCC ensures that the EAS state and local plans developed by industry conform to FCC EAS rules and regulations.

330. ham gear insurance

Yahoo group: sarcmail
Date: 2011-10-25 20:21:50 UTC
From: Ron Wright, N9EE
Topic: 330 Message: 330

I've received my ham radio equipment insurance renewal notice from Marsh, the former ARRL endorsed insurance agency, and I notice some significant changes in coverage.

For one, it no longer covers the property of others that is in your custody or control.

Another is a new deductible of $150 which applies to equipment stolen from a motor vehicle, which is in addition to the ordinary $50 deductible.

And, glass breakage is now excluded.

They also changed from the insurance being for an agreed value to a replacement cost basis for loss settlement.

These changes sure take away a lot of my peace of mind with regard to coverage if someone breaks into my car and steals my hand held radio. I would have a loss of several hundred dollars and virtually no coverage.

There are several other modifications which seem to me to make the value of the coverage much less than it used to be for the price.

I am interested in the experience of other members with regard to the Marsh insurance coverage compared to that offered by the new company that is now endorsed by ARRL.

I need to decide in the next few days whether to renew this coverage or change to the new company.

Thanks,

Carl W4EIB

331. special event station

Wardenclyffe, Nikola Tesla's last laboratory will be on the air November 5th as special event station W3T!

Wardenclyffe is located in Shoreham, NY on Long Island. W3T is part of a network of special event stations that are helping to raise awareness for the effort to purchase the laboratory and restore it into a science museum.

To read more about the effort to restore Wardencyffe, please check out http://www.teslasciencecenter.org.

The other stations in the network are N3Y which will transmit via satellite and possibly HF from the New Yorker Hotel, Tesla's last home in Manhattan, and YU0TESLA which will transmit on 20m as well as other HF bands from the Tesla Museum in Belgrade.

For the latest updates on what frequencies to catch the stations on and a sneak peek at the QSL cards and QTHs, go to http://copaseticflows.appspot.com/teslaevent.

332. Balloon altitude record

Breaking the Amateur Radio Balloon Altitude Record

11/03/2011
By Don Ferguson, KD6IRE

The challenges of pursuing and capturing the World Record for ARHAB, "Amateur Radio High Altitude Balloons."

Ron Meadows, K6RPT, has always had a fascination with flight and science. After seeing a PBS special, he became interested in high altitude ballooning and how it could be something he would enjoy doing himself. Ron is the owner of a professional pool and equipment maintenance company. His son, Lee Meadows, works with Ron to maintain a large number of pools in the San Jose, California area.

Ham radio gives Ron access to many technical contacts in the San Jose area and provides support for his balloon activities.

On September 12, 2009 Ron, with support of his son Lee and Ron's father, Frank, KA6TVU, launched the first of what would become many balloons. This one carried a payload containing a camera, a simplex repeater and an APRS tracking GPS and radio. This project was named CNSP-01, for "California Near Space Project." It is also the name of Ron's website and the large team of friends who support him and Lee.

The pictures returned were excellent and fueled the idea to do other similar projects. Here is a link to those first pictures:
http://www.californianearspaceproject.com/photos.K6RPT-10.html.

After the success of this launch, Ron decided to repeat the process but add a crossband 2 m x 70 cm amateur repeater and get some more great pictures from Near Space. On March 27, 2010 this second balloon was another success that traveled to 100,442 feet AGL and provided a couple of hours of excellent radio contacts covering central California from Bakersfield to Chico. Again the pictures were beautiful with views from the Pacific Coast to the Sierras.

World Record Attempt

It was at this point that Ron decided to launch a world record altitude attempt. Ron and Lee made several attempts with different sized balloons, both helium and hydrogen, and each of these flights provided additional information on the effect of neck lift (the lift needed to carry the payload) to payload weight. Also, they were able to keep track of the effectiveness of different balloon size and manufacturers from 1500 to 3000 grams.

Other lessons learned are related to the fill process and how to eliminate the effect of the hose weight from the lift measurement. Ron constructed a balanced fill fixture that allows very accurate lift measurements while filling the balloon.

On some early flights radio performance was an issue due to traffic collisions and antenna effectiveness. The antenna was redesigned to a half-wave center-fed dipole and the TNC was

reprogrammed to transmit every 31 seconds. The antenna design significantly increased the gain and signal strength and the RF field was measured before each flight. The TNC timing gives much better altitude resolution and eliminates recurring collisions with APRS stations transmitting at regular minute intervals. There is no receiver onboard to see if the frequency is clear before transmitting, so this timing causes each packet to occur at a one second time differential within the minute.

Other considerations include the size and number of batteries and the cold voltage performance of the battery. Ron measures the battery at subzero temperatures to ensure it will last longer than the expected flight and recovery.

Probably the most significant part of the prelaunch process is the calculation of initial fill/lift to successfully carry the payload to maximum altitude before bursting and without stalling at some altitude before bursting. For the October 23, 2011 record-breaking flight, Lee made all the decisions related to fill and led the team during the launch process. Ron and the team supported all his decisions and deserve significant credit for the success and the world record. CNSP-10 reached 136,545 feet, or 25.86 miles, AGL.

I know everyone on the team understands this accomplishment is a total team effort and all of the people involved in past flights have contributed to the team's success in achieving the ARHAB World Record. This includes all of the people who tracked and recovered earlier flights, specifically the Stratofox Team, to allow reuse of equipment and analysis of failures.

More flights are planned for different experiments so keep track by following the updates on the California Near Space Project web site, http://www.californianearspaceproject.com/.

337. 60 m rule changes

Yahoo group: sarcmail
Date: 2011-11-20 12:15:27 UTC
From: Ron Wright, N9EE
Topic: 337 Message: 337

USA's Federal Communications Commission
released a REPORT AND ORDER on November 18, 2011
with new 5MHz rules for the Amateur Radio Service.
Effective date: 30 days after publication in the Federal Register.

The FCC adopted the use of the name "60 meter band",
to refer to 5MHz amateur radio in the frequency
range 5330.5-5406.4 kHz, but USA hams are still only
allowed to transmit on 5 specific channels in the band.

The FCC changed the rules to allow:
Phone (Upper Sideband), RTTY, Data, and CW;
with specific limitations on the use of these modes.

Amateur radio is a "secondary user" in this band, and
must not cause harmful interference to other services!
Amateur Radio Service must accept interference from
other primary services and other nations services.

Operators transmitting data or RTTY must exercise care
to limit the length of transmission so as to avoid
causing harmful interference to US Government stations.

New 60 meter band 5MHz Channel List:
General, Advanced, or Amateur Extra Class license only.

Suppressed Carrier
VFO Dial freq
5330.5 kHz USB (center of channel = 5332.0)
5346.5 kHz USB (center of channel = 5348.0)
5357.0 kHz USB (center of channel = 5358.5) New!
5371.5 kHz USB (center of channel = 5373.0)
5403.5 kHz USB (center of channel = 5405.0)

Note: FCC deleted the channel at 5366.5 USB (center=5368.0)
and "replaced" it with channel 5357.0 kHz USB (center=5358.5)

The maximum allowed power level is now 100Watts PEP (ERP)
effective radiated power referenced to a dipole.
If another type of antenna is used, the station licensee
must maintain a record of either the antenna manufacturer's
data on the antenna gain or calculations of the antenna gain.

Upper SideBand Phone, Data, or RTTY transmissions
may use dial (VFO) USB suppressed carrier frequency
at 1.5kHz below the center of the channel.

Transmissions must not exceed the 2.8kHz bandwidth channel. RTTY modes such as PSK31 must not exceed 60Hz necessary bandwidth. Data modes must not exceed 2.8kHz bandwidth. CW bandwidth must not exceed 150Hz bandwidth and the CW frequency should be at the center of the channel.

Data stations operating under section § 97.221 automatically controlled digital station, are not allowed on these 5MHz channels.

hi all,

Saw at Tiger Direct, a computer supply company:

Seagate ST95005620AS MomentusXT 500GB Solid State
Seagate ST95005620AS Momentus XT 500GB Solid State Hybrid Drive - 500GB, 7200 RPM, SATA 3Gb/s
Only $149.99

Hitachi 500GB Touro Mobile 2.5" External HDD
Hitachi 0S03121 Touro Mobile 2.5" External Hard Drive - 500GB, USB 2.0
Only $69.99

Seagate 3TB Expansion External USB 2.0 Hard Drive
Seagate STAY3000100 Expansion External Hard Drive - 3TB, USB 2.0, Plug & Play
Only $169.99

I've seen 2TB for about half this.

Lexar 16GB SDHC Card (memory card)
Only $17.99

Hannspree SL231DPB 23" Class Widescreen LED Backlit HD Monitor - 1920 x 1080, 16:9, 8000000:1 Dynamic, 1000:1 Native, 5ms, DVI, VGA, Energy Star
Only $129.99 after rebate*

*One note on rebates: This company and others now give rebates in the form of credit cards. Some you can, if not used, go to ATM and get money, but many you have to spend like regular credit card. Verizon you can get money at ATM until you used once then only use remainder as credit card.

I've purchased a number of items at Tiger Direct (www.tigerdirect.com) and they are pretty good. They now have local stores, closest in Clearwater.

I am in no way affiliated with them...just a customer.

SARC Christmas Party
Tuesday December 13, 2011
2:00 pm - 4:00 pm
Location: Super Royal Buffet

Notes:
SARC Christmas Party at the Super Royal Buffet, on US19 next to Books A Million across from Gulf View Mall, behind Chilly's.

This is buffet and all pay for their own. Come eat dinner or just hang out with the group. All are welcome, club member or Ham or not.

This is Chinese Buffet, all you can eat for about $7

We eat at 2PM, but I am sure some will be there little early.

DUE TO THE PARTY THERE IS NO DECEMBER CLUB MEETING.

360. ham humor

Yahoo group: sarcmail
Date: 2012-01-11 14:57:04 UTC
From: Ron Wright, N9EE
Topic: 360 Message: 360

hi all,

Some humor from another board:

Subject: [amsat-bb] Humor

Two antennas met on a roof, fell in love and got married. The ceremony
wasn't much, but the reception was excellent. Since they were a perfect
match, soon they generated harmonics. They wrapped the harmonics in dipoles.
But later the harmonics turned out to be parasitic elements. The true story-- she was a
tri-bander and he felt trapped, so they went on separate beam headings.

362. computer mouses

Yahoo group: sarcmail
Date: 2012-01-22 23:25:39 UTC
From: Ron Wright, N9EE
Topic: 362 Message: 362

hi all,

Big Lots at US19/SR52 has computer mouses (mice) for $5, USB optical with scrolling wheel type. They also have small versions for $9. Also have $4, but I think these have the older connector, not USB. I bought one of the larger and one smaller and plan on going back and get 2 more larger ones for future use.

What makes a good mouse. I see mouses going from $12 to $60 at Office Depot and wonder what is the difference. All are USB, optical and about the same size and not wireless...the same features. I assume the higher priced ones are built better, but bet not that much better.

364. postage increase

Yahoo group: sarcmail
Date: 2012-01-23 14:17:01 UTC
From: Ron Wright, N9EE
Topic: 364 Message: 364

A Reminder: Postage Rates To Rise this Month

01/17/2012

Beginning Sunday, January 22, it will cost more to mail first class letters, postcards and packages within the US.

The cost to mail a first class letter will be 45 cents, an increase of 1 cent.

According to the USPS, this is the first increase since May 2009. The cost of mailing a postcard will be 32 cents, an increase of 3 cents. This is the second increase for postcard postage in less than a year; in April 2011, the USPS boosted the postcard stamp price from 28 cents to 29 cents.

You will also pay more to send letters to Canada, Mexico and other international destinations. Click here for more information on all the postal increases.

370. new 60m rules to take effect

Yahoo group: sarcmail
Date: 2012-02-04 11:51:03 UTC
From: Ron Wright, N9EE
Topic: 370 Message: 370

New Rules for 5 MHz (60 Meters) To Go Into Effect March 5

On November 18, the FCC
<http://www.arrl.org/news/fcc-releases-new-rules-for-60-meters>released
a Report and Order
(<http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db1118/FCC-11-171A1.pdf>R&O
),
defining new rules for the 60 meter (5 MHz) band. These rules are in
response to a Petition for Rulemaking
(<http://fjallfoss.fcc.gov/ecfs/document/view?id=6518527442>PRM)
filed by the ARRL more than five years ago and a June 2010 Notice of
Proposed Rulemaking
(<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-76A1.pdf>NPRM).
In the <https://www.federalregister.gov/articles/2012/02/03>February
3 edition of the
<https://www.federalregister.gov/articles/2012/02/03>Federal
Register, the FCC
<https://www.federalregister.gov/articles/2012/02/03/2012-2477/amateur-radio-use-of-the-al
location-at-5-mhz>announced
that these new rules will go into effect on March 5, 2012.

In summarizing the new rules, the FCC explained that the new rules
amend the current rules to facilitate more efficient and effective
use by the Amateur Radio Service of five channels in the
5330.5-5406.4 kHz band (the 60 meter band): "Specifically, and
consistent with our proposals in the Notice of Proposed Rulemaking in
this proceeding, the Commission replaces one of the channels with a
less encumbered one, increases the maximum authorized power amateur
stations may transmit in this band and authorizes amateur stations to
transmit three additional emission designators. The Commission also
adopts an additional operational rule that prohibits the use of
automatically controlled digital stations and makes editorial
revisions to the relevant portions of the Table of Frequency
Allocations and our service rules."

The Amateur Radio Service in the United States has a secondary
allocation on 60 meters. Only those amateurs who hold General,
Advanced or Amateur Extra class licenses may operate on this band.
Amateur stations must not cause harmful interference to -- and must
accept interference from -- stations authorized by any administration
in the fixed service, as well as mobile (except aeronautical mobile)
stations authorized by the administrations of other countries.

(ARRL Web)

374. MIT announcement

Yahoo group: sarcmail
Date: 2012-02-14 14:54:01 UTC
From: Ron Wright, N9EE
Topic: 374 Message: 374

The Massachusetts Institute of Technology (MIT) has announced its first course which can be studied and assessed completely online world-wide for free.

The interactive electronics course commences in March and is designed to be fully automated, with successful students receiving a certificate.

Topics covered include: resistive elements and networks; independent and dependent sources; switches and MOS transistors; digital abstraction; amplifiers; energy storage elements; dynamics of first- and second-order networks; design in the time and frequency domains; and analog and digital circuits and applications.

376. MIT course

Yahoo group: sarcmail
Date: 2012-02-20 14:32:26 UTC
From: Ron Wright, N9EE
Topic: 376 Message: 376

Massachusetts Institute of Technology (MIT) -- which has had an open courseware initiative for several years -- is now taking the next step and making courses available online. Called MITx, this initial effort should be of interest to a lot of hams: An online course in introductory circuits and electronics that's free to anyone who is interested. And best of, it's free!

Circuits and Electronics (Course 6.002x) is the course title; it is adapted from Course 6.002, which serves as a first course in an undergraduate electrical engineering (EE) and electrical engineering and computer science (EECS) curriculum (or to you Beavers out there, Course 6.1 and 6.3, respectively).

The course covers topics such as "resistive elements and networks; independent and dependent sources; switches and MOS transistors; digital abstraction; amplifiers; energy storage elements; dynamics of first- and second-order networks; design in the time and frequency domains, and analog and digital circuits and applications. Design and lab exercises are also significant components of the course."

Circuits and Electronics begins on March 6 and runs through June 8. To access the course, registered students will log in at:

mitx.mit.edu

where they will find a course schedule, an e-textbook for the course and a discussion board. Each week, students will watch video lectures and demonstrations, work with practice exercises, complete homework assignments, and participate in an online interactive lab specifically designed to replicate its real-world counterpart. Students will also take exams and be able to check their grades as they progress in the course. Overall, students can expect to spend approximately 10 hours each week on the course.

At the end of the course, students who demonstrate their mastery will be able to receive a certificate of completion for free. In future MITx courses, students who complete the mastery requirement on MITx will be able to receive the credential for a modest fee. Further courses are expected to become available beginning in the fall.

More information is available at the MIT Online Learning Initiative website. There are prerequisites, but this sounds like a great deal to me!

Sent: Saturday, March 31, 2012 8:57 PM
Subject: [nfarl] Walkie Warnings

You all should be aware that Homeland *Security, in a bulitin due to be issued tomorrow, has discovered that all of the cheap little Chi-Com walkies actually have homing devices as well as remotely controlled jammers to wipe out our GPS systems and block large segments of the VHF & UHF spectrum thus crippling out
communications systems. They even suspect that some micro-wave emanations could reek havoc with the satellites too. One of two of these would cause no harm, but if every one of them (thousands or more ??) all around the country was commanded to commence transmitting, well who KNOWS what could happen? The recommended safeguard is to remove the battery when you're not using the radio,
since it DOES rely on the battery to function in this manner.

Remember, don't "take care" Take Charge!.

* This was discovered and reported by noted Hungarian Physicist Dr. Sloof Lirpa, LL.D., M.B.A., Ph. D., LIB, OMG.

IF YOU BELIEVE THIS CHECK OUT THE PYHSICIST'S NAME AND SPELL IT BACKWARDS.

404. SARC Picnic

Yahoo group: sarcmail
Date: 2012-04-23 12:41:39 UTC
From: Ron Wright, N9EE
Topic: 396 Message: 404

hi all,

We had our Spring picnic yesterday and if you missed it you missed a good one. Good food and good eye ball QSOs.

Our next meeting is May 8th at the NPR Library down town on the second floor. We will be discussing Field Day which is in late June. All are welcome.

If you know of any one wanting to become a Ham bring/send them to the meeting and they will be able to see at our Field Day what Ham Radio is all about and they can operate with supervision of course.

73, ron n9ee/r

405. nice Field Day gear

Yahoo group: sarcmail
Date: 2012-04-25 16:46:31 UTC
From: Ron Wright, N9EE
Topic: 405 Message: 405

hi all,

Mother's Day (May 13) and Field Day (June 23 & 24)often means celebrating with a garden party. Normally, outdoor events in May and June are cool-to-perfectly-pleasant affairs, but with the unusually warm weather the nation's had this year, all bets are off.

We've found a way to make sure everyone stays cool when tropical temps crash Field Day. The Port-A-Cool Cyclone 2000 evaporative cooling unit ($649) keeps heads cool at parties and picnics, but it can also help prevent your shop from becoming a sweat shop this summer. It uses water (it has a water-hose hookup) and high-efficiency rigid cooling pads to naturally cool the air and lower temperatures as much as 30 degrees F.

The unit has a two-speed fan and can cool an area of 500 sq. ft. while using less electricity than a typical hair dryer. The 24 x 25 x 31-in.-high unit rolls on casters and weighs 61 pounds.

We would only need to find he cool water.

See details at:
http://www.port-a-cool.com/

Glenn,

I thought it was internet related. I had thought it was a plug in card for a server, but what could be in this thing that would make it cost so much. They have a number of these in the same price range.

I think I found the answer:

CFP is a three-letter acronym that can stand for:
* C Form-factor Pluggable, a form-factor that allows the transmission of digital signal with up to 100Gb/s (C being the Roman numeral for 100)

WORMFEST 2012

All HAMs are invited to The Glorious Society of the Wormhole Free Tailgate

Saturday May 26, 2012 Freedom Lake Park in Pinellas Park at 0800.

Bring all you have to sell and all your money so you can buy the treasures that you find.

Freedom Lake Park is located on the southeast corner of US19 and 49th Street. GOTO Map on this page. On 49th Street go to the light just north of US19. Turn east into Lake Blvd and then immediately turn right onto 102nd Ave N. Follow 102nd Avenue N around till you come to 46th Street N. Turn right there and the park is straight ahead. The tailgate is under the trees on the right as you enter the park.
WORMFEST 2012 MAP Information.

Drinks and dogs, coffee and donuts will be available.

417. narrow band

Yahoo group: sarcmail
Date: 2012-05-08 14:34:10 UTC
From: Ron Wright, N9EE
Topic: 417 Message: 417

this does NOT affect Ham Radio:

Land mobile radio systems operating in the VHF and UHF radio bands must begin operating with 12.5 kHz efficiency technology by January 1, 2013. Licensees not operating at 12.5 KHz efficiency at that time could be subject to FCC enforcement action, which may include admonishment, monetary fines or loss of license.

The deadline?
January 1, 2013

Narrow banding means all 16F3 xmsns will go to 12F3 or 2.5 kHz dev instead of the now 5 kHz.

Only segments affected are Part 90 or commercial radio systems and not Ham Radio Part 97.

421. SARC Field Day

Yahoo group: sarcmail
Date: 2012-05-14 13:13:49 UTC
From: Ron Wright, N9EE
Topic: 421 Message: 421

Hi all,

Field Day is Saturday & Sunday June 23 & 24. Operation is 1800 Saturday - 1800 Sunday UTC (1400-1400 or 2PM to 2PM EDT/local).

SARC is planing its Field Day. Come to the June 12th meeting to help with plans.

The QTH will be Night's, W8PNS, home;

Knight V Bailey, W8PNS
9908 San Sabastian Way
Port Richey, FL 34668

In FILES of this board in folder "SARC Field Day 2012 info". There are maps of location, FD rules and other info. Feel free to post any relevant info there.

Although FD is about setting up radios and antennas it is also about food, drink, eye ball QSOs and just having a good time.

We will have 1 or 2 HF stations, 6m station and other activity like digital and SSTV. If you would like to bring a mode or operation or your rig just to try all are welcome. If you are CW op the place is yours.

We will start set up at 0900 Saturday morning.

Although we are not into the winning mode, but in having fun, we will set up most elaborate stations with fine rigs and antennas. So if you would like to operate HF (you as a Tech can operate HF at FD) and see what HF is about rig and antenna wise this is very good place to learn.

We have only 5 weeks for planning. All that would like to take part are welcome.

73, ron, n9ee/r

427. analog vs digital

Yahoo group: sarcmail
Date: 2012-05-24 21:05:15 UTC
From: Ron Wright, N9EE
Topic: 427 Message: 427

Analog matters ☐ more than you think

So much talk is about Digital, but the real world is still analog

By Loring Wirbel May 14, 2012
From EDN Magazine

Now that a good chunk of video and audio traffic is transported on broadband networks end-to-end in a digital format, you will find an increasing number of people who say that analog engineering is no longer important. You found these kind of analog nay-sayers in the 1960s, 1980s, 2000s, and now. And you know what? They were just as wrong in each decade, but there are fewer and fewer analog engineers around to make the case for real-world continuous signals.

Blogs are always preaching that FPGAs are prepared to displace DSP processors in most vertical applications. But since the major applications for DSPs ☐ medical imaging, machine vision, military intelligence ☐ require an interface to the real world, there will necessarily be analog processing involved. Some FPGAs have managed to integrate analog-to-digital and digital-to-analog converters on the FPGA itself, but these are usually simple 8- and 10-bit converters. Applications that require high-performance 32- and 64-bit DSPs usually require high-resolution ADCs and DACs rated at 14 bits of resolution and above.

When one considers the general analog ignorance of most digital VLSI designers, one recalls the wonderful magazine columns by the late great Bob Pease, who died in an accident almost one year ago (http://en.wikipedia.org/wiki/Bob_Pease). Bob loved to ask, "What the heck is a voltage comparator? What the heck is an op amp?" These days, fewer chip and system designers than ever can answer those questions. FPGA and analog chip vendors should look to the example of Avnet, ADI, and Xilinx at X-fest, and offer more mixed-signal tutorials, particularly if FPGA vendors want to continue their strategy of eventual world domination.

Now lets talk RF and really get some blank looks, hi.

Subject: ARLB015 New Amateur Extra Class Question Pool Effective July 1
Date: Thursday, June 14, 2012, 11:40 AM

SB QST @ ARL $ARLB015
ARLB015 New Amateur Extra Class Question Pool Effective July 1

ZCZC AG16
QST de W1AW
ARRL Bulletin 15 ARLB015
From ARRL Headquarters
Newington CT June 14, 2012
To all radio amateurs

SB QST ARL ARLB015
ARLB015 New Amateur Extra Class Question Pool Effective July 1

The new Amateur Extra class (Element 4) question pool -- released by the National Conference of Volunteer Examiner Coordinators (NCVEC) in January 2012 -- becomes effective on Sunday, July 1. The current Amateur Extra class pool expires on June 30, 2012 and cannot be used after that date. This new question pool -- including graphics and diagrams -- will remain valid until June 30, 2016. The new Amateur Extra pool contains 702 questions, from which 50 are selected for an Element 4 examination. As of June 13, three questions -- E1D09, E2A14 and E6E10 -- have been removed from the new pool.

The current Technician class question pool that became effective July 1, 2010 is valid through June 30, 2014.

The current General class pool that became effective July 1, 2011 is valid until June 30, 2015.

From ARRL Headquarters
Newington, CT July 12, 2012
To all radio amateurs

SB SPACE ARL ARLS004
ARLS004 Three Hams Scheduled to Head to ISS This Weekend

NASA will televise the launch and docking of the next mission to the International Space Station (ISS), scheduled for 8:40 PM (CDT) Saturday, July 14 (0140 UTC, Sunday, July 15). NASA Flight Engineer Sunita Williams, KD5PLB, along with Russian cosmonaut Yuri Malenchenko, RK3DUP, and Japan Aerospace Exploration Agency astronaut Akihiko Hoshide, KE5DNI, are completing preparations as they undergo their final Soyuz spacecraft fit. Live NASA TV coverage of the Soyuz TMA-05M spacecraft launch from the Baikonur Cosmodrome in Kazakhstan begins at 8:30 PM CDT on Saturday, July 14 (0130 UTC July 15).

A link with NASA TV's scheduled coverage is available at, http://www.arrl.org/news/three-hams-scheduled-to-head-to-iss-this-weekend.

445. scam

Yahoo group: sarcmail
Date: 2012-07-22 14:13:56 UTC
From: Ron Wright, N9EE
Topic: 445 Message: 445

FRAUD ALERT

Please be on alert for a new scam that claims that President Obama will pay your utility and cable bills through a new federal program.
How the Scam Works:

Consumers have been contacted in person and through fliers, social media and text messages with claims that President Obama is providing credits or applying payments to utility bills.

To receive the money, scammers claim they need the customer's social security and bank routing numbers. In return, customers are given a bank routing number that will supposedly pay their bill. In reality, there is no money, and customers believe they have paid their bills when in fact they have not.

If you feel you have been a victim of these scammers, you should immediately contact internet provider. In addition, please notify your bank, law enforcement, and all three credit bureaus: Equifax: 1-800-685-1111, TransUnion: 1-800-888-4213, Experian: 1-888-397-3742.

455. Tampa RNC video

Yahoo group: sarcmail
Date: 2012-08-26 15:08:45 UTC
From: Ron Wright, N9EE
Topic: 455 Message: 455

Hi all,

I know off topic, but thought would be good to see.

In the below videos is some of the downtown Tampa for the RNC this coming week.

I think, IMHO, the video of the large groups of police is probably them being shown the area they will work and there duty station, not patroling.

It does seem the Republicans think they need lots of protection. We all hope there is not some wacko who will try to do something to get into the History books.

Some fence company made lots of money on this one, hi.

The video does also show some of the nice streets and water in Tampa. We do have a very nice city to show the US and brag about.

hi,

Ive been going downtown daily to shoot footage for fun.

Lets just say the the police/military presence was INSANE as you'll see in video #2

I woke up hearing you guys talk about the police state downtown and had to share the videos!

Be VERY careful if you go down there. I was stopped three times yesterday as one of the officers said I looked "suspicious"

From Hillsborough Co ARES. We might expect similar.

TO: Hillsborough County ARES/RACES VOLUNTEERS
FROM: KC4HSI
DATE: Sun Aug 26 13:30:18 UTC 2012

Hello, all 196 of you.

County planning is based on projections of 35-40 MPH winds starting about midnight tonight, with gusts during squalls as high as 50-60.

The School Board of Hillsborough County is closing schools Monday.

There are no planned evacuations at this time. In order to be prepared, however, if you are able to staff a shelter, please send an email to KC4HSI@... and let me know your availability.

Stay safe.

Thanks,

Keating

From: Ron Wright, N9EE
Topic: 458 Message: 458

Subject: Hillsborough County Emergency Operations Center Public Information Update for August 27, 2012 at 1 p.m.

This is a Hillsborough County Emergency Operations Center Public Information Update for August 27, 2012. The time is now 12:30 Hours.

The Tropical Storm Warning for Hillsborough County has been lifted.

All shelters have been closed.

No damage has been reported. Two trees were reported down overnight. There are a few scattered incidents of minor street flooding. One road ☐ Kinnan Street, just north of Bassett Creek and Sinclair Hills Road ☐ is closed for repair but is expected to be reopened by this afternoon.

Additional rain bands and higher wind gusts are still expected through today. The local state of emergency remains in effect, and the Hillsborough County Emergency Operations Center (EOC) remains at Level 2, partial activation. The EOC continues to monitor weather conditions and communicate with local, state and federal officials to take appropriate actions as needed.

Stay Informed

To receive the latest emergency and news announcements via email or text from Hillsborough County, sign up on the County's website.

Stay connected with Hillsborough County government on Facebook (Facebook.com/HillsboroughFL), Twitter (@HillsboroughFL), and YouTube (YouTube.com/HillsboroughCounty).

Hillsborough County residents can call 813-272-6900 to report storm-related problems or request additional information.

461. tech & gen classes

Yahoo group: sarcmail
Date: 2012-09-07 13:53:25 UTC
From: Ron Wright, N9EE
Topic: 461 Message: 461

The following email was sent by KC4HSI at the www.aresdb.com (http://www.aresdb.com) web site.

TO: Pasco RACES ARES Skywarn VOLUNTEERS

FROM: KC4HSI

DATE: Thu Sep 6 21:04:42 UTC 2012

Hillsborough County ARES/RACES is proud to sponsor 2 amateur radio courses: the introductory Amateur Radio "Technician Class" License Course and the General Class license upgrade course, all in a traditional classroom setting. Please invite your friends to come join the well over 350 people who have taken these courses and earned or upgraded an Amateur Radio license during the last few years. This course will be held on two Saturdays - the 20th of October and 3rd of November, 2012.

Both classes will meet at the James A. Haley Veterans' Hospital, located at 13000 Bruce B. Downs Blvd., Tampa 33612. Class will start on both days at 9AM and continue until 5PM. On the 3rd of November, testing will begin at 3:30PM.

The book associated with this class costs $19.95, The book associated with this General upgrade class costs $29.95.

There are no training fees for this class. However, there is a fee of $14 for taking the test, and the books are $19.95 and $29.95, depending upon which class you are taking. You will pay for the test and the book on the first day of class. Please bring a government-issued picture ID card with you, as well.

The class size is limited ☐ and you can sign up online! In order to properly prepare materials and gauge class sizes, please send an email to training@... to reserve your seat. If you are unable to attend both sessions of your course, please let us know about that as well - there is some scheduling flexibility for these classes.

Please check www.hcaresraces.org for information related to these classes, as well as other information related to emergency communications in our area.

We look forward to seeing you and your friends and family there!

Keating

467. Cycle Rid for Life need

Yahoo group: sarcmail
Date: 2012-09-20 14:08:56 UTC
From: Ron Wright, N9EE
Topic: 467 Message: 467

hi all,

The bike ride Aptalis Cycle for Life, Wheels in Motion to Cure Cystic Fibrosis is Saturday, Oct 27th.

The ride will be on the bike trail along the Suncoast Park Way running form Skarkey Park in Pasco to just north of SR50, a 35 mile run, 70 mile round trip for the more energetic riders. Some riders will do 10 and 20 miles rides.

The ride is in need of radio communications from Hams along the trail. At present we will man 5 stations, one at each end and 3 in the middle. Due to this being a long run we would like to man more stations.

This is a joint effort between Pasco and Hernando Counties ARES.

It is a most enjoyable time with us getting out of the shack and in the nice Florida Sun and helping out the community.

If you would like to help let me know.

Notes:
The SARC fall picnic is Sunday, Oct 21st at Starkey Park, Shelter 5 (same as last times).

All should bring a covered dish to share. The club will supply sodas, hamburgers and hot dogs.

We start at 10AM, eat at 12 noon.

All are welcome, club member or not, Ham or not.

We always have a very good time.

481. dearest friends

Yahoo group: sarcmail
Date: 2012-11-02 15:47:10 UTC
From: Ron Wright, N9EE
Topic: 481 Message: 481

I got this from another email and thought I would try on you guys.

Dear beloved friend and Hams,

I know that this letter may be a very big surprise to you, I am giving you my trust and wish you will give me back the trust i have given you .

I believe that you will be honest to fulfill my final wish before I will die.

I am Mr.SWEET Ron , I am 64 years old, I am suffering. From all indication my condition is really deteriorating, and my doctors have
courageously advised me that I may not live beyond the next two months, this is because my stage has become critical.

I was brought up in a motherless baby's home, and was married to my late wife for over twenty years. My wife and I are true Christians, but quite unfortunately, she died in a labor room so i could not hear the cry of a child in my house Since her death I decided not to re-marry, I sold all my belongings and deposited all the sum of $6,200 with a security company, as it was packaged and registered as a personal Valuable.

Presently, this money is still in their custody, and the management just wrote me as the Legitimate beneficiary to come forward to receive the Deposit after keeping it for so long or rather issue a letter of authorization to somebody to receive it on my behalf since I cannot come over as a result of my illness, Presently, I'm with my laptop in a hospital where I have been undergoing treatment. I have since lost my ability to walk about or do anything by myself and my doctors have told me that I have only a few months to live.

It is my last wish to see that this money is invested in any business of your choice and the gain made every year or 6 months as the case may be, distributed each year among the charity organization, the poor and the motherless baby's home where I come from. I want your good humanitarian, to also use this money to fund churches, orphanages and widows around, 20% for you, I must let you know that this was a very hard decision, but I had to take a bold step towards this issue because I have no further option. I hope you will help see my last wishes come true.

As soon as I receive your reply I shall give you the contact of the security company. I will also issue you a letter of authority, which will prove that you are the new beneficiary of my funds. Please assure me that you will act accordingly as I stated herein.

Hope to hear from you soonest at awaiting your reply

yours Sincerely
Mr. Sweet Ron, n9ee/r

482. bike ride event

Yahoo group: sarcmail
Date: 2012-11-02 15:52:58 UTC
From: Ron Wright, N9EE
Topic: 482 Message: 482

hi all,

On Nov 11th there will be Ride Without Limits bike ride from Land O Lakes on Collier Blvd. At this time I am not sure if this motor cycles or bicycles.

There will be 3 distances of 100, 63 & 35 miles.

ARES of Pasco and Hernando will be supporting the ride with communications and if you would like to join us we do need Hams to man stations thru out the ride.

Contact me and I can pass along your contact info.

From: Ron Wright
Topic: 481 Message: 484

Yes, I use to get these daily. The <DEL> works wonders. Not so much any more, but still maybe once a week. I thought would be good as a joke. I changed the original message from $6.2 million to $6200, but then thought I should have said $62, my net worth. I also put in my name "Sweet Ron", hi.

However, if you would like to get involved send me the following:

You full name
Bank account info, acc nr, routing, pin and passwords
SSN
DOB

I'll take care of the rest, withdraw, I mean deposit all the money and do all that paper work...you will not have to do much of anything, hi.

Do take what I sent as a joke, but I understand some actually fall for them and takes a while before they realize they have lost lots of money.

485. health issue

Yahoo group: sarcmail
Date: 2012-11-03 13:23:47 UTC
From: Ron Wright, N9EE
Topic: 485 Message: 485

From another board:

Interesting info..

Thyroid cancer. On Wednesday, Dr. Oz had a show on the fastest growing cancer in women, thyroid cancer. It was a very interesting program and he mentioned that the increase could possibly be related to the use of dental x-rays and mammograms. He demonstrated that on the apron the dentist puts on you for your dental x-rays there is a little flap that can be lifted up and wrapped around your neck. Many dentists don't bother to use it. Also, there is something called a "thyroid guard" for use during mammograms.

By coincidence, I had my yearly mammogram yesterday. I felt a little silly, but I asked about the guard and sure enough, the technician had one in a drawer. I asked why it wasn't routinely used. Answer: "I don't know. You have to ask for it." Well, if I hadn't seen the show, how would I have known to ask?

We need to pass this on to our daughters, nieces, mothers and all our female friends and husbands tell your wives !! I just did, now you send it on to your list. Someone was nice enough to forward this to me. I hope you pass this on to your friends and family.

492. 145.35 to add D-Star

Yahoo group: sarcmail
Date: 2012-11-14 20:17:37 UTC
From: Ron Wright, N9EE
Topic: 492 Message: 492

hi all,

It was decided at last nights meeting we will make the SARC's 145.350 repeater a hybrid analog and D-Star repeater.

The repeater normally works in analog requiring a 146.2 Hz tone.

We will add a D-Star repeater controller so that if a user has tone the repeater operates in analog, but if the user does not have tone then the repeater will repeat/operate in D-Star mode for users with D-Star radios.

D-Star is the digital voice mode for Ham Radio. ICOM is the only supplier of rigs for D-Star although there are some 3rd party accessories to allow users to get into the GateWay (D-Stars VOIP internet connection, a much improved EchoLink or IRLP).

We will also add the GateWay to the repeater which will allow a user to contact other D-Star users and repeaters all over the world.

502. D-Star on 145.350

Yahoo group: sarcmail
Date: 2012-12-26 21:13:04 UTC
From: Ron Wright, N9EE
Topic: 502 Message: 502

hi all,

I have completed the install of the D-Star controller in the 145.35 club repeater.

The repeater will operate in analog as it has since mid 90s if the user has the 146.2 Hz tone. If not then operates in D-Star. Of course for D-Star operation one must have a D-Star radio.

We will eventually link the D-Star part to the GateWay, internet based link similar, but much better, to EchoLink.

I hope to have the repeater back in service in next week or so.

504. D-Star on 145.350

Yahoo group: sarcmail
Date: 2012-12-30 23:03:45 UTC
From: Ron Wright, N9EE
Topic: 502 Message: 504

hi all,

We have put D-Star on the 145.350 New Port Richey Suncoast ARC WA4T repeater. The repeater is located at the Little Rd gov center off Little Rd.

The repeater operates in analog if you have 146.2 tone and in D-Star if no tone.

All are welcome to use and operate the only digital voice mode for Ham Radio, D-Star.

We will be linking to the GateWay soon.

73, ron, n9ee/r

ps D-Star coming soon to Hernando Co.

509. postage rates going up

Yahoo group: sarcmail
Date: 2013-01-21 23:17:47 UTC
From: Ron Wright, N9EE
Topic: 509 Message: 509

Postage Rates to Rise this Month
TAGS: class letter, flat-rate priority mail, postal increases, postcard postage, set price, usps
01/21/2013

Beginning Sunday, January 27, it will cost more to mail first class letters, postcards and packages within the US. The cost to mail a first class letter will be 46 cents, while the cost to mail a postcard will be 33 cents, an increase of 1 cent for each; this is the third increase for postcard postage in less than two years. This month, the USPS will also introduce a First Class Mail Global Forever Stamp that will allow customers to mail 1-ounce letters anywhere in the world for one set price of $1.10. The cost to mail flat-rate Priority Mail packages and letters will also increase. Click here for more information on all the postal increases.

510. tire sizes

Yahoo group: sarcmail
Date: 2013-02-01 16:24:49 UTC
From: Ron Wright, N9EE
Topic: 510 Message: 510

Tire Size, how to tell the size of a tire from its part number.

Tire having number of: P225/50R16

P = When a tire size begins with a "P," it signifies the tire is a "P-metric" size that was designed to be fitted on vehicles that are primarily used as passenger vehicles.

T = If a tire size begins with a "T," it signifies the tire is a "Temporary Spare.

LT = If a tire size begins with "LT," it signifies the tire is a "Light Truck-metric" size that was designed to be used on vehicles that are capable of carrying heavy cargo or towing large trailers.
LT = If a tire ends with "LT," it signifies the tire is either an earlier "Numeric", "Wide Base" or "Flotation" Light Truck size designed to be used on vehicles that are capable of carrying heavy cargo and towing trailers.

C = If a Euro-metric sized tire ends with a "C," it signifies the tire is a "Commercial" tire intended to be used on vans or delivery trucks that are capable of carrying heavy loads.

Section Width
The 225 indicates this tire is 225 millimeters across from the widest point of its outer sidewall to the widest point of its inner sidewall when mounted and measured on a specified width wheel. This measurement is also referred to as the tire's section width. 225mm / 25.4 = 8.86".

Sidewall Aspect Ratio
The 50 indicates that this tire size's sidewall height (from rim to tread) is 50% of its section width. The higher the number, the taller the sidewall.

Internal Construction
R in the P225/50R16 91S size identifies that the tire has a Radial construction.

D (225/50D16), it would identify that the internal tire body plies crisscross on a Diagonal and that the tire has a "bias ply" construction.

B (225/50B16), it would identify that the tire body plies not only crisscross the tire on a diagonal as before, but that they are reinforced with belts under the tread area.

Tire and Wheel Diameter
For P225/50R16 the 16 indicates the tire and wheel diameter in inches.

Tires that have a rim diameter expressed in inches (P225/50R16, as well as 8, 10, 12, 13, 14, 15, 17, 18, 19, 20, 22, 23, 24, 26 and 28) are called "inch rim" sizes, are the most common type of tire size and are used on most cars, minivans, vans, sport utility vehicles and light duty light trucks.

515. who developed the transistor???

Yahoo group: sarcmail
Date: 2013-02-14 11:36:13 UTC
From: Ron Wright, N9EE
Topic: 515 Message: 515

HI ALL,

JULIUS LILENFELD, POLISH, WORKED FOR HITLER DURING THE WAR. HE SUPPOSEDLY DEVELOPED "AN ON THE SPOT" HYDROGEN GENERATOR FOR THEIR BLIMPS. AFTER COMING HERE;

HE APPLIED FOR A PATENT "METHOD & APPARATUS FOR CONTROLLING ELECTRIC CURRENTS" U.S. PAT.# 1,745,175 ONLY HE USE COPPER SULFIDE AS A
SUBSTRATE.

HE RAN INTO THE SAME PROBLEM THAT BARDEEN, BRITTAIN & SCHOCKLEY DID: AND THAT KILLED THE DEAL PURIFICATION, AS YOU CAN IMAGINE WAS A NITEMARE AT TIMES 90% OF ALL NEW TRANSISTORS FAILED DUE TO THEIR EFFECTS & THERMAL RUNAWAY.

SEEMS THE PURITY AT BELL WHEN BELL GOT GOING THE SEMICONDUCTOR MATERIAL WAS ALMOST REAGENT. IT WAS EQUIVALENT TO 1 TSP OF SALT IN 3 BOXCARS OF SUGAR. AND STILL A LARGE NUMBER OF FLOPS.

THIS GUY ALSO DEVELOPED & WAS GIVEN THE PATENT FOR THE ELECTROLYTIC
CAPACITOR. DON'T FEEL BAD ABOUT NEVER HEARING OF THE GUY; I'VE BEEN IN ELECTRONICS SINCE STICKING A BOBBY PIN IN AN OUTLET AT AGE 3 BUILDING MY FIRST RADIO AT 8, TEACHING, HAMMING ETC. NEVER
HEARD OF THE GUY UNTIL ABOUT 10 OR 15 YRS AGO WHEN I DID A PROGRAM ON
SOLID STATE ELECTRONICS FOR OUR CLUB AT THE LOCAL JR. COLLEGE. WENT FROM BRAUN TO KILBY; DIODE, COHERER, TRANSISTOR, TO 1ST I.C. LEARNED A LOT.

Looks like the Yahoo received mail lists got hit at the server level. beware of malware on here, ebay, paypal, There Microsoft update I did 2 days ago seemed to patch all the slow sites issues that were created around thanksgiving, seemed to be a "netsession" issue

So if you have been receiving bogus nothing but links in a yahoo email this is why.

Never click on a link in an email unless you know what it is about. If just a link that looks strange it is probably a virus.

Last Man Standing to Feature Amateur Radio Storyline
Ham Radio in Hollywood: Last Man Standing to Feature Amateur Radio Storyline

In an episode tentatively scheduled to air Friday, March 15, the hit ABC comedy Last Man Standing -- starring Tim Allen as Mike Baxter, KA0XTT -- will feature a secondary ham radio storyline. This is the first time that the show will highlight Amateur Radio in its plot, showing various cast members on the air and communicating via ham radio.

In Episode 217 -- called "The Fight" -- Mike's daughter Mandy (played by Molly Ephraim), gets her cell phone taken away as punishment. She discovers Mike's home shack in the basement and uses ham radio to make faraway friends. According to Last Man Standing Producer John Amodeo, NN6JA, the home shack is a brand new set built just for this episode. The ARRL provided many of the awards and certificates -- including 5 Band DXCC, 5 Band Worked All States, 5 Band Worked All Continents, VUCC (for 50 MHz), the Diamond DXCC Challenge and the Morse Code Proficiency Certificate -- seen on Mike Baxter's home shack wall.

Two other regular cast members -- Mike's boss Ed Alzate (played by Hector Elizondo) and Mike's co-worker Kyle Anderson (played by Christoph Sanders) -- will also have Amateur Radio call signs and be shown on the radio.

"As a ham, I am very excited to be able to have an episode that presents our hobby in an upbeat and positive way," Amodeo told the ARRL. "As a television producer, I am pleased to present a very funny episode for our more than 7 million viewers. This episode will feature more ham gear than seen in mainstream movies such as Frequency, Contact and Super 8-- all great films that had Amateur Radio in them. It's worth noting that although hams will enjoy the episode, it was written with our 7 million non-ham viewers in mind. Please be prepared for some inconsistencies related to Amateur Radio, but enjoy the show nevertheless."

Last Man Standing is produced by 20th Century Fox for the ABC Television Network and airs on Friday nights at 8 PM Eastern and Pacific and 7 PM Central.

527. Is it because of tax day???

Yahoo group: sarcmail
Date: 2013-04-15 15:46:47 UTC
From: Ron Wright, N9EE
Topic: 527 Message: 527

hi all,

Today, April 15th is the dead line for filing personal taxes, 1040, 1040EZ, etc.

I have 4 taxes to file, well one already files by the Business dead line of March 15th and filed about month ago. Filing the rest today, efile.

But the markets are going kinda crazy and do not know if this tax day has any thing to do with it. Here are the stats.

DOW down 85 points although it has been going crazy with record highs, a 8 straight day increase, now at 14,750. Hit 13,000 only 6 weeks ago. Count on it being over 15,000 by summer, another record high.

Gold took a big hit, down $150/oz to about $1350. About month ago was at $1750, went down to $1560 over last month and now really down. Usually gold goes up when things are bad and goes down when things are improving.

Oil also took a big hit....now at $88, had hit $97 for couple days abut month ago, but has been around $92 for last month, the reason for $3.30/gal gas. If stays at $88 can expect less than $3/gal soon, next month. Up here in Hernando gas is still $3.45 so I have been filling up every time I go to Pasco lately.

The yen is still at 98/USD holding stead there. So rig prices will be coming down.

Things are looking good.

Subject: FOX HUNT
To: TARC@hanclub.org

MAY 18 at 10:00 will start the Fox Hunt at the club house. So get your antennas and HT's ready for fun. Now if you haven't put your antenna together, I will be at the club house Monday evening to help you put it together. I also will work with anyone any evening before Saturday morning , so come on out and have FUN. kd4opt Paul

534. Museum Ships Weekend

Yahoo group: sarcmail
Date: 2013-05-17 15:52:21 UTC
From: Ron Wright, N9EE
Topic: 534 Message: 534

From: Ron Litt [mailto:ron.litt@...]
Sent: Friday, May 17, 2013 10:16 AM
To: 'K5HM'
Subject: FW: Museum Ships 2013

Please post this notice on your club reflector or web site.

The Brazos Valley Amateur Radio Club, KK5W is participating in this year's Museum Ships Weekend. June 1-2, 2013. Our call sign, KK5W will be credited as a contact with both WW II Submarine USS Cavalla and Destroyer Escort USS Stewart. representing the USS Cavalla and USS Stewart. Visit our web page for more information, www.bvarcmswe.org. We will be operating from, Seawolf Park in Galveston, Texas, NA-143.

Frequencies as follows:
SSB
7.260 MKHz
14.260 MHz
21.360 MHz
28.360 MHz

CW
7.039 Mhz
14,039 MHz
21.039 KHz
28,039 KHzAmateur radio operators in the Galveston - Houston area are cordially invited to participate. You can sign up on the web page if you would like to operate KK5W during the event at Seawolf Park.

KK5W will also host two VHF Nets for Houston-Galveston amateurs to contact the local museum ships using the WA5CYI repeater 146.94 (-) PL 167.9 on Saturday and Sunday from 11AM - 1 PM Local time. We are anticipating the USS Texas (NA5DV), Elissa (N5E), and the Grandcamp/High Flyer Memorial
(AC0TX) will be on the net.

Operation on OSCAR satellites is planned for daytime passes on Saturday, June 1.
A balloon launch is scheduled for Saturday morning,

For the second year, KK5W is sponsoring the Texas Navy Award.
This year's Texas Navy Fleet is expanded to include:
USS Cavalla and USS Stewart - KK5W
USS Texas - NA5DV
Tall Ship Elissa - N5E
USS Lexington - W5LEX
SS High Flyer and SS Grandcamp Memorial - AC0TX
National Museum of the Pacific War - N5P For KK5W and AC0TX, one contact counts for both ships.

Provide evidence of two way communication (log extract) with at least four of the call signs during MSWE 2013 to earn the 2013 Texas Navy Certificate. Work all six to earn the coveted "Clean Sweep" endorsement. Visit our web page, www.bvarcmswe.org for information on how to claim the certificate.

535. things are looking good

Yahoo group: sarcmail
Date: 2013-05-31 13:08:18 UTC
From: Ron Wright, N9EE
Topic: 535 Message: 535

The forcast for Field Day. Looks good even for 6m.

Tad Cook, K7RA, reports: The average daily sunspot numbers sank nearly 50 points this week to 94.3, while the average daily solar flux was down more than 16 points to 117.8. The geomagnetic indices were quite high, due to a solar wind storm. The predicted solar flux for the near term is 105 on May 30-June 1, 110 on June 2-5, 120 on June 6, 125 on June 7-8, 130 on June 9, 135 on June 10-11, and rising to 140 for June 12-13. The predicted planetary A index is 5 on May 30-31, 15 on June 1-2, 10 and 8 on June 3-4, 5 on June 5-10, and then 8, 12, 8 and 5 for June 11-14. Look for more information on the ARRL website on Friday, May 31. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page.

546. JOTA

Yahoo group: sarcmail
Date: 2013-09-10 15:04:13 UTC
From: Ron Wright, N9EE
Topic: 546 Message: 546

JOTA, Jamboree On the Air, for the Boy Scouts is Oct 19 & 20. This event is where Hams set up rigs usually in a park and let the Scouts operate and contact other scouts all over the US. The Tampa Bay scouts will probably operate only Saturday, the 19th, from 0900 to 1600 hr. They typically couple with another event. They do get a merit badge for operating in JOTA

This year there will probably be 2-3 locations in Tampa Bay. One is planned for Hernando, but specific locations have not been determined.

I am putting together a group of Hams to support this event. It is most pleasant time.

I plan on bringing my FT1000mp w/40m Windom and my EOC go box with IC718 HF rig w/tuner and can also operate digital modes (PSK31).

I am working with Tony Anglo, N2MFT, the Tampa Bay Scout JOTA coordinator. Tony will let me know the locations and planned activity.

If you would like to help out contact me.

73, ron, n9ee/r

547. SARC meeting

Yahoo group: sarcmail
Date: 2013-09-11 16:22:48 UTC
From: Ron Wright, N9EE
Topic: 524 Message: 547

Meeting of SARC Sept 10th, 1800 hr, New Port Richey downtown library.

Discussion:

Christmas Party Dec 10th, Tuesday, 1300 hr (1PM) at the Royal Buffet, US19 accross from Gulf View Mall. Is buffet with all paying their own, about $8. This is in lue of the SARC meeting. So no meeting.

SARC Fall Picnic Oct 27th, Starkey Park, Shelter 5. More discussion at Oct meeting.

QSL card for Club. Had thought of getting some made, but only need 1-2 per year so will look into making on computer. Want to put picture of club members.

JOTA, Boy Scout event Oct 19 & 20. Club might help. Ron, N9EE is signed up and talking to the Scout reps. Last year had 3 local locations in Tampa Bay. Will probably have same this year although one location closest to NPR will be near Brooksville. More details at the Oct meeting.

Mike, WB8ONY, gave treasures report.

meeting adjourned at 1955 hr.

549. Wayn Green dies

Yahoo group: sarcmail
Date: 2013-09-15 14:23:50 UTC
From: Ron Wright, N9EE
Topic: 549 Message: 549

FINAL
Wayne Green passed away this morning in a peaceful, painless transition from this life on Earth. An eternal optimist, and one who loved to share his neverending zest for life, he was a friend to many and will be missed greatly. Wayne was not afraid of dying and was very much ready to embark on his next great adventure to the afterlife.

73,
W2NSD (Sept 3, 1922 - Sept 13, 2013)

Wayne Green was the owner and publisher of 73 magazine for many years. He also started some computer and audio publications and a group came in and bought all he had for good sum of money.

When Wayne had 73 it was a most dynamic mag. After the take over it went down hill mainly because the publisher was not a Ham, only a magazine publisher. I am sure her heart was not in it like Wayne's was.

Wayne was very controversial, all the time attacking the ARRL and then he got into some issues of body health and things like we never went to the moon and other non-Ham related issues. Much of his columns were about these although the mag stuck mostly with Ham Radio.

Wayne was someone you really liked or really hated, hi. But he was serious about Ham Radio.

550. ebay fees

Yahoo group: sarcmail
Date: 2013-09-19 13:01:11 UTC
From: Ron Wright, N9EE
Topic: 550 Message: 550

Last May ebay almost doubled their "final value fee" increasing to 10%. If you sell something on ebay, with listing fees, final value fee and if paid by PayPal (ebay owns PayPal) the fees can easily mount to 15% of the selling price.

I have removed all my items I sell on ebay.

I'll continue to buy on ebay, but know the pricing is partly based on high ebay fees. That is why some list at $0.99, but have shipping at $20. And the final value fee includes the shipping.

It is this Saturday

Also bring the XYL, she gets into the HamFest FREE and all can check out the Flea Market FREE

We will be at the Flea Market this Friday at 3PM for set up. Any help would be good for all.

552. JOTA

Yahoo group: sarcmail
Date: 2013-09-27 12:32:14 UTC
From: <lt_wright_flg@...>
Topic: 546 Message: 552

This years JOTA is Oct 19 & 20. I suspect in Tampa Bay Ham the activity will be only Saturday as last year.

I have been talking to the Scouts and the heads of JOTA for Tampa Bay. They are Eden Greg, HI8XG/KE4DRV and Tony Anglo, N2MFT.

I think like last year there will be 3 sites in Tampa Bay. One is slated to be near Brooksville, the site I will man and help with.

Last I talked to the Eden and Greg no locations had been decided. This was about 3 weeks ago.

I plan on attending with my FT1000mp and 40m Windom. Works great on 40 & 20m. I might bring my EmComm Go Box with HF & VHF/UHF rig and demo digital, PSK31. You know how kids get when a computer is involved, hi.

JOTA is a most enjoyable time. Get out into a cool shady park with HF rig usually in a park shelter and show off Ham Radio to a lot of nice kids and their parents. Might even get a few young people interested in Ham Radio.

If you want to be part of JOTA contact me and I'll give you the Scout contact info.

Topic: 555 Message: 556

I'd like to help, but Oct 19th is JOTA, the Boy Scouts event where we Hams go out and set up stations and the Scouts talk to other Scouts around the USA.

I plan on being at Flaming Arrow Scout Reservation near Brooksville. We will have a HF and 2m rig and will check into 146.880 and we can get info on the rattlesnakes. I am sure it would be helpful to the Scouts.

I really wish I could be part of the San Antonio
Rattlesnake Run for I do enjoy getting out and helping the community. However, not sure if I would want to be working with rattlesnakes, hi.

557. Tropical Storm Karen

Yahoo group: sarcmail
Date: 2013-10-03 19:56:34 UTC
From: <lt_wright_flg@...>
Topic: 557 Message: 557

Predictions for TROPICAL STORM KAREN are to take a path up thru the Gulf and hit land late Satruday near most western part of Florida Pan Handle/SE Alabama and continue into Georgia. Expected to not affect Tampa Bay, but we should keep eye on it.

Karen is expected to become a Hurricane.

For more info see:

http://local.msn.com/tropical-storm-karen-forms-in-gulf-of-mexico-1?ocid=ansloc11

Question from Electronic Design News.

What is the most important invention or innovation from your lifetime so far? Also in last 100 years???

Any comments???

We are in the planning for JOTA with the Scouts.

Hams will meet at Sertoma Youth Ranch, 85 Myers Road, Brooksville, FL, on the east side of I75 about half way between SR50 & SR52.

We will set up Ham rigs and let the Scouts talk to other Scouts around the US.

If you would like to help and take part all are welcome.

Contact Ron, N9EE 352-683-4476.

There will be other JOTA stations in Tampa Bay so might look for these locations.

From: <n2kbk@...>
Topic: 576 Message: 576

Christmas is coming..

that means it is time for the Dade City Church Street Christmas walk

On December 21,22, 23 rd

From 6:00 PM to 9:00 PM
Church Avenue Dade City

Church Street is decorated with life-size Christmas cards, illuminated with bag candles and filled with music, Christmas decorations and wonder! FREE Event

As a EPARS tradition we will have an Amateur Radio Station (K4EX) set up at our table on the corner of church and 17th street.

There the public can make contact via the radio to Santa.

QSL cards will be handed out to all the children that make contact with ole Kris Kringle

Yahoo group: sarcmail
Date: 2013-12-31 17:05:28 UTC
From: <lt_wright_flg@...>
Topic: 578 Message: 578

Could be Ham Radio related. I have a door housing/trim, the part that goes around a 36 x 80 inch door that I do not need. Also included is the metal seal at the bottom. I needed the door and have this part for hanging the door left over and hate to throw away. Anyone want it it is FREE, just have to come get it in Spring Hill. Of course one could cut up and make shelves for their op table.

583. email warning

Yahoo group: sarcmail
Date: 2014-01-29 15:37:39 UTC
From: <lt_wright_flg@...>
Topic: 583 Message: 583

Utility Customers Target of Scam

The Florida Department of Agriculture and Consumer Services is warning consumers to be aware of a new twist on a multi-state scam targeting utility customers through email. Both Florida Power and Light (FPL) and other utility customers have reported receiving phony utility bills through email. If you receive an email with a bill that looks different from your normal bill, is from a different utility company, or asks for personal information like your Social Security or credit card numbers, delete the email immediately and no dot click on any links as they may contain malicious spam.

Consumers are advised to authenticate any bill by verifying the account number on the email with your actual account number. Be suspicious of emails that claim a past due balance and threats of interruption of service. Contact the utility provider directly if you're unsure of any notices received.

For additional information, contact the Florida Department of Agriculture and Consumer Services at www.800helpfla.com http://www.facebook.com/l.php?u=http%3A%2F%2Fwww.800helpfla.com%2F&h=LAQF2CMnB&enc=AZP15xnkbYUAGIINuf8OBofeHCJXOslh8csP5TSURSUU7dnVK_pMHMPsDTCNr-e8ZQBUU4Sudz7zRLHU1EF6eDL3OqrWj1Wdx8VF7YIcCbV-JOUz1HUD1vGi7-fHIjMEy_VPHo-vBTUWv_9xaOwpir_g&s=1 or by calling 1-800-HELP-FLA (435-7352) within Florida, 1-800-FL-AYUDA (352-9832) en Español or (850) 410-3800 from outside of Florida.

584. sugar powered cell

Yahoo group: sarcmail
Date: 2014-02-02 22:56:32 UTC
From: <lt_wright_flg@...>
Topic: 584 Message: 584

As you probably know, from sucking down cans of Coke and masticating on candy, sugar — glucose, fructose, sucrose, dextrose — is an excellent source of energy. Biologically speaking, sugar molecules are energy-dense, easy to transport, and cheap to digest. There is a reason why almost every living cell on Earth generates its energy (ATP) from glucose. Now, researchers at Virginia Tech have successfully created a sugar-powered fuel cell that has an energy storage density of 596 amp-hours per kilo — or “one order of magnitude” higher than lithium-ion batteries. This fuel cell is refillable with a solution of maltodextrin, and its only by products are electricity and water. The chief researcher, Y.H. Percival Zhang, says the tech could be commercialized in as soon as three years.

Need help with race from Hams for comm:

Gary To Darryl MentroAAR4OO Charles NelsonGeoffrey Smith and 7 More...

Feb 4 at 4:04 PM
Okay, hope all are having a good day today and will be attending the several hamfests coming up beginning with Orlando HamCation this coming weekend. The week after is the Brooksville 'fest followed by the ZAARC 'fest on the 1st of March.

Now, on to the Gran Fondo on 16 March... A SUNDAY would you believe! I guess that day is preferred due to the reduction in vehicular traffic on the many back roads covered.

Right now we are needing more hams to step up for this event. We have eleven kind enough to do so through 3 February. Courses of the three races have some overlap but I don't think we can have too many volunteers for event of this size so spread the word for me please. Those interested in helping can do so by checking the ZAARC website or direct email to me.

I haven't fixed any assignments yet (other than KE7UTH and KI4VLZ) while waiting to see what I have to work with this year. K4PJS has one of his musical engagements to go to so he must leave by 11:00am so he'll be situated at the first or second location we work at I think. Hope to have all of this worked out by the end of February. We haven't had any of the GCARC members step up yet so keeping my fingers crossed, as I can't hold my breath very long now that I'm a tough old bird and not a spring chicken like some of you...

Does anyone have some experience with the 443.600 machine's coverage to the north and west? If it reaches up into Citrus County perhaps we can use it as Floral City is on the route... Anyone?

That's all for today. Enjoy the review of the attached doc.

73,

Gary

Great CPR video

http://heart.arizona.edu/cpr-video http://heart.arizona.edu/cpr-video

All should know basic CPR and first aid.

Red Cross teaches first aid and CPR and if have victim basic procedures are:
1. check surrounding if safe to give aid (might be electrical cable that caused problem and you might become second victim).
2. check victim to see problem (they might just be asleep). Also check entire victim. They might have broken arm, but also bad cut. You save the arm, but the victim bleeds to death.
3. if victim needs aid call 911 even if you have to leave. You will not cure the victim, you can only help keep alive until he/she gets to proper care, usually a hospital. EMTs do not cure victims, but keep them alive and save them by getting them to proper care.
4. give aid to victim.

Also learn to use AED -- which stands for automatic external defibrillator machine. It shocks the heart back to working. Takes 2 min to learn. Really all you have to do is put the 2 pads in correct position on the body, one between nipples and other on left side of body under left arm pit and push go/start/etc button on the machine. It does all else including determining if victim needs to be zapped and how much. During this time no one is to be touching victim. If you are and it zaps you get some of the up to 2000 volts. After the zap the machine checks victim again and may zap again. Most all AED machines talk...they give info telling you what you and what the AED machine is doing.

596. Yeasu FTM400 video

Yahoo group: sarcmail
Date: 2014-03-12 14:12:55 UTC
From: <lt_wright_flg@...>
Topic: 596 Message: 596

Hi all,

In the YouTube video one can see the new Yeasu System Fusion digital dual band mobile in analog, narrow digital, wide digital and other features. Great band scope and use of it to see activity as well as tune to it.

See at: https://www.youtube.com/watch?v=Up4Flu-onZU#t=187

I gotta get me one of these.

Until Yeasu gets its DR-1 analog/digital repeater on the market the System Fusion will for the most part remain dormant, but the FTM400 is very nice rig.

Don, you might consider saving this video for the next SARC club meeting.

Life is good.

602. new FCC task

Yahoo group: sarcmail
Date: 2014-04-09 16:56:28 UTC
From: <lt_wright_flg@...>
Topic: 602 Message: 602

FCC will issue Social Security Numbers

Feds to stop issuing social security numbers; will turn task over to FCC
To help reduce annual financial deficits, the federal government today released a plan to stop issuing nine-digit social security numbers as they have done since the start of the program. Instead, the social security administration has contracted with the Federal Communications Commission, which will issue five or six digit ham radio calls to everyone, even to those who have not passed the amateur radio tests. Existing ham radio licensees will not be affected, but will now also use their ham radio “call” as their unique Social Security identifier. According to calculations by the Office of Management and Budget, the move will allow for smaller social security cards and the saving of computer printer ink, for an estimated annual cost savings of over thirty billion dollars.

In addition, the FCC’s authorized Volunteer Examiners – also known as VE’s – will now be authorized to complete the Social Security Number applications for anyone requesting the service for a fee of $14.00. The funds and paperwork will then be submitted to the FCC, just as current amateur radio test results and other paperwork, and the FCC will issue the SSN card. Because of the work of the FCC and the VE’s, the Social Security Administration will reduce its work force by over 25,000 employees throughout the United States. These employees will be transferred to the Internal Revenue Service to audit healthcare coverage claims under the Affordable Care Act, also known as “ObamaCare.”

Topic: 605 Message: 605

CARS, Pinellas County ACS/ARES, and the NWS have partnered to offer a Skywarn training course this Thursday, April 24th. This is open to everyone, so please share this with your clubs, friends, and family. You do not need to be a HAM or a CARS member to complete this course.

Here are the details…

Location: Clearwater Fire Training Facility (the building is behind fire house 48)

Address: 1716 N Belcher Rd, Clearwater

The class will begin at 7:30pm. Doors will open at 6:30pm and we ask that you arrive by 7:15pm so that we may start the class promptly at 7:30pm.

Soda, water, and light snacks will be provided by CARS members.

Please register for free by clicking the link below. This will allow us to know how many drinks to buy and how to set up the room.

Click here to register!

From: lt_wright_flg@...
Topic: 612 Message: 612

Good Ideas

I'm not saying let's go kill
all the stupid people. I'm
just saying let's remove all
the warning labels and let the problem work itself
out.

I changed my car horn to gunshot sounds. People
move out of the way much faster now.

You can tell a lot about a woman's mood just by
her hands. If they are holding a gun, she's probably
angry.

Gone are the days when girls used to cook like
their mothers. Now they drink like their fathers.

You know that tingly little feeling you get when
you really like someone? That's common sense
leaving your body.

I don't like making plans for the day because
then the word "premeditated" get's thrown
around in the courtroom.

I didn't make it to the gym today. That makes
five years in a row

I decided to change calling the bathroom the
John and renamed it the Jim.
I feel so much better saying I went to the Jim
this morning

Dear paranoid people who check behind shower
curtains for murderers; if you find one, what's
your plan? ☐

613. antenna restrictions

HR 4969 – The Amateur Radio Parity Act of 2014

A Commonsense Solution to Provide Equality in Land Use Regulation

On Wednesday June 25th, Representative Adam Kinzinger (R-IL -16th), with Representative Joe Courtney (DCT-02) as cosponsor, introduced in the 113th US Congress “The Amateur Radio Parity Act of 2014”. If passed by Congress and signed into law, Representative Kinzinger’s bill would require the FCC, within 120 days of the Bill’s enactment,

to amend the Part 97 Amateur Service rules to apply its Amateur Radio limited preemption policy to all types of land use regulations including homeowners’ association regulations and deed restrictions,

often referred to as “covenants, conditions, and restrictions” (CC&Rs). Presently, the policy only applies to state and local zoning laws and ordinances.

HR 4969 is the ARRL’s plan to secure reasonable accommodation for the thousands of licensed Amateur Radio operators who are denied effective antennas at their residences due to private land use regulations that are either part of their property deeds of purchase or are imposed by their local homeowner’s associations. CC&Rs typically preclude licensed Amateurs residing in deed-restricted communities from conducting public service or emergency preparedness communications. The number of communities that have such restrictions is increasing at exponential rates.

614. 2014 Rattlesnake Race Volunteers needed.

Ham Radio Volunteers needed.

What: 2014 Rattlesnake Run
When: October 18 2014 7am to 10?
Where: San Antonio , Florida
Why: Public Service event
How: Via Amatuer Radio

Ham Radio Operators are now part of the Rattlesnake Runs Communication Team. Operators offer accurate and reliable voice communication support between the Aid and Medical Stations along the course and the Event Command Center. We are seeking FCC-licensed amateur radio operators. Volunteers are not required to have prior experience, but if you do have experience with marathons, road races, adventure relays, or similar public service events let us know. Volunteers must be able to supply their own equipment.(bring a handy talkie)

If you wish to be part of the Ham Radio Volunteer Program at the 2014 Rattlesnake Run, please send an email to n2kbk@yahoo.com

Ham Radio Volunteer Positions

Accuracy, speed, and mobility are required skills to perform both of these functions. These can be fast paced, potentially high pressure environments.Volunteers will coordinate messages between their Aid and Medical Station location and the rest of the operators in the field. Operators will handle Medical, Runner Transport as requested by the Aid Station or Medical staff at that location on the course.

These FCC-licensed volunteers are responsible for providing communication to/from the various course Aid and Medical Stations. Ham Radio Volunteers will be using the E.P.A.R.S. VHF repeater (146.880 -.600) to support the event. Volunteers will work alongside the local service agencies and municipal city departments to ensure participant safety.

Apply to Volunteer

The registration deadline for all Ham Radio Volunteers is Saturday October 11th (1 week prior to event) Contact n2kbk@yahoo.com to begin the registration process.

Thank you for your support!

Chris Bloxsom , N2KBK

For more information about this event check out their website - http:/eparsonline.org

Vanity Fee to Increase

The FCC has adjusted very slightly downward - to $21.40 - its proposed Amateur Service vanity call sign regulatory fee for Fiscal Year 2014. In a June Notice of Proposed Rule Making (NPRM), the Commission said it was planning to hike the current $16.10 vanity fee to $21.60 for the 10-year license term.

The FCC reported there were 11,500 "payment units" in FY 2014. The Commission said the vanity program generated an estimated $230,230 in FY 2013 revenue, and it estimated that it would collect nearly $246,100 in FY 2014.

Yahoo group: sarcmail
Date: 2014-09-11 16:48:21 UTC
From: lt_wright_flg@...
Topic: 587 Message: 627

At last Tuesday's meeting had good discussion for the HamFest Saturday Sept 27th at the Gunn Hwy Flea Market at SR54/Gunn Hwy. Next to the tall and big Verizon tower.

We will be at the Flea Market around 4PM Friday to set up. It should not take more than an hour or so. We have to put up our 2 low fences and place the 2 pop ups with chairs and tables so early Sat morning, 6AM, we can complete set up.

We will need help 1. Friday afternoon and 2. during the fest from selling tickets and directing tailgators from 8-12AM and then 3. tear down. So all that can show up Friday and Saturday we will need you.

At the meeting had 2 new members join. They are father son and are working on getting a license. They said they will be at HamFest to help.

All members helping Friday and/or Saturday get FREE ticket to HamFest.

Hope to see all there.

Pasco County

Hamfest
Saturday, September 27, 2014
8 AM to 1 PM

Gunn Hwy Flea Market
2317 Gunn Hwy/SR54
Odessa, FL 33556

Talk in: 145.35(-) 146.2 tone (DSTAR/Analog Hybrid)
Suncoast Amateur Radio Club
PO Box 1992, New Port Richey, FL 34656

admission: $5

XYLs and under 12 Free

Directions:
The HamFest official address is in Odessa and in the mid west side of Pasco County.

Address is:
2317 Gunn Hwy
Odessa, FL 33556
for GPSs.

From east Tampa or south take I75 and go west on SR56 which turns into SR54. From west Tampa probably best to come up Gunn Hwy which dead ends at SR54 at the Flea Market. From Pinnellas Co take US19 and go east on SR54. From north either US19 to SR54 or come down Suncoast Parkway and west on SR54.

Also can enjoy the Gunn Hwy Flea Market so might bring your XYLs.

For info call Ron, N9EE 352-683-4476 or at email: mccrpt@tampabay.rr.com

Anyone with Go Boxes, boxes of packaged radio gear for EmComm, are encouraged to bring and discuss at the AREA table. Also ARES, SkyWarn, and other public service organizations repersenatives are admitted FREE.

The East Pasco Amateur Radio Society is seeking licensed amateur radio operators to provide radio communications for a foot race in Dade City. Volunteers are not required to have prior experience, but if you do have experience with marathons or similar public service events let us know. Volunteers must be able to supply their own equipment such as a 2 Meter radio .We will be using the 146.880 repeater to support the event. Hams will coordinate messages between their Aid / Medical Station location and the rest of the operators in the field. We set up @ 7:30 am. The event will run 8 to 9:30 am. Any one interested in helping out
please contact Chris N2KBK via E-mail n2kbk@...

ARLB022 New Element 3 (General Class) Question Pool Released

The Question Pool Committee of the National Conference of Volunteer Examiner Coordinators (NCVEC) has released the 2015-2019 Element 3 (General Class) question pool. The new question pool becomes effective for all Element 3 examinations administered on or after July 1, 2015, and it remains valid until June 30, 2019.

The question pool files are available in PDF, Microsoft Word (.doc), and ASCII text formats. Section G7A requires the use of one illustration, a schematic identified as G7-1. This drawing file is published separately. Further information can be found on the web at:

http://www.arrl.org/news/new-element-3-general-class-question-pool-released

644. the new year

Yahoo group: sarcmail
Date: 2015-01-02 13:39:10 UTC
From: lt_wright_flg@...
Topic: 644 Message: 644

Celebrating the new year could arguably be the best 24-hour party of the year. As clocks in time zones around the world click over to 2015, some revelers are united by fireworks and flashbulbs, while others come together for prayer and thoughtful reflection. Some cultures believe the noise from fireworks scares away evil spirits and ushers in good luck for the new year.

New Zealand, where it is currently the summer, was the first place to ring in 2015 — midnight there coincided with 6 a.m. ET http://www.nbcnews.com/news/world/new-years-eve-world-begins-celebrating-arrival-2015-n277336. Australia followed afterward with a spectacular fireworks display launched off of the Harbour Bridge in Sydney.

645. s meter reading

Yahoo group: sarcmail
Date: 2015-01-04 21:21:40 UTC
From: lt_wright_flg@...
Topic: 645 Message: 645

S-Meter Readings
The following values show the correlation between signal strength in microvolts versus the "S" unit reading on a properly calibrated S-meter.

S-units old ham standard world standard
S9 50.00uV 40.00uV
S8 25.06uV 20.04uV
S7 12.56uV 10.04uV
S6 6.29uV 5.03uV
S5 3.15uV 2.52uV
S4 1.58uV 1.26uV
S3 0.79uV 0.63uV
S2 0.39uV 0.31uV
S1 0.19uV 0.15uV

The only S-unit actually specified at a certain micro-volt reading is S-9. All others are specified at being 6db below the previous level, and have been calculated accordingly.
Sources: Japan Radio International broadcast, March, 1994, QST, June, 1977.

Test of FT1000mp
(Jan 2015)
Freq S0 S1 S3 S5 S7 S9 +20 +40
3.800 <.1 4.1 6 8 12 36 500 5000
14.200 0.3 3.5 4.9 7 10 29 400 5000
28.200 0.5 4 5 7.5 10 31 300 5000

Test of IC7410
(Jan 2015)
Freq S0 S1 S3 S5 S7 S9 +20 +40
3.800 <0.1 3.5 3.5 12 22 40 450 4000
7.200 0.2 3.0 7.0 10 20 36 350 4000
14.200 0.2 4.1 9 15 30 48 500 4100
28.200 1.5 1.8 3.5 6 10 20 900 1600

S0 is signal detected and considered would be copyable on CW. Of course this is with no noise.

Interesting story on the code:

When i grew up in Detroit in the '50s my neighbor was a WWII vet. He told me he was in the US Army signal corp stationed in North Africa. They we taught morse code and copied messages to a "mill" (typewriter).

. One enterprizing soldier taught a local native to push little finger left hand when he heard "dit dah" soon this guy had 3-4-5 locals copying CW and they were 100% copy and he told me they got up to 40wpm. Now here is the punch line...

These locals could not read or write anything or knew English!!! The GIs paid them in C rations, chocolate bars, coffee and cigarettes. One day the translator told him the locals thought the GIs were goofy for paying them so much to push a button. Little did they know they were copying military traffic for north africa out of Allied command in England. The brass knew what was going on and salted messages to see if there were leaks and there were not. Kind of a twist on our Navaho code talkers.

Only the guys copying the messages had no idea it was even a message.. they liked ringing the bell at the end of a line.

649. new DX rules

Yahoo group: sarcmail
Date: 2015-01-22 21:44:21 UTC
From: lt_wright_flg@...
Topic: 649 Message: 649

ARRL Board Okays Changes to DXCC Program, VHF and Above Contesting Rules The ARRL Board of Directors has tweaked the DX Century Club (DXCC http://www.arrl.org/dxcc-rules) rules to clarify and expand their recognition of remotely controlled station technology. It also has added a rule that puts greater ethical responsibility on operators with respect to remotely controlled operation. In addition, the Board adopted changes to the ARRL VHF/UHF contest rules that are aimed at encouraging greater participation. The Board took the actions during its annual meeting January 16-17 in Windsor, Connecticut.

The DXCC Rules http://www.arrl.org/dxcc-rules changes, which affect Section I, subsections 8 and 9, explain and extend how contacts with remotely controlled stations now may be applied toward the DXCC award. According to ARRL CEO David Sumner, K1ZZ, the changes are subtle but significant. The modified rules make clear that contacts with legally licensed, land-based, remotely controlled stations count for DXCC, but the control point — the operator's location — of a remotely controlled station no longer has to be land based; the operator can be literally anywhere.

http://www.arrl.org/dxcc-rules

DXCC Rules http://www.arrl.org/dxcc-rules The American Radio Relay League (ARRL) is the national association for amateur radio, connecting hams around the U.S. with news, information and res...

ARLB007 FCC "Paperless" Amateur Radio License Policy Now in Effect
As of February 17, the FCC no longer routinely issues paper license documents to Amateur Radio applicants and licensees. The Commission maintains that the official Amateur Radio license authorization is the electronic record that exists in its Universal Licensing System (ULS), although the FCC had routinely continued to print and mail hard copy licenses until this week.

The FCC will continue to provide paper license documents to all licensees who notify the Commission that they prefer to receive one. Licensees will also be able to print out an official authorization - as well as an unofficial "reference copy" - from the ULS License Manager.

According to the WTB, the new procedures will save at least $304,000 a year, including staff expenses.

FCC to reinstate Morse Code test

April 1, 2015

Washington, D.C. – April 1, 2015 – Today, the Federal Communications Commission (Commission or FCC) approved Report and Order 14-987af which reinstates the Morse Code test for General Class and Amateur Extra Class licensees. “It was a big mistake eliminating the Morse Code test,” admits Dotty Dasher, the FCC’s director of examinations. “We now realize that being able to send and receive Morse Code is an essential skill for radio amateurs. As they say, it really does get through when other modes can’t.”

Not only will new applicants have to take the test, but General Class licensees who have never passed a code test will have one year to pass a 5-wpm code test. Similarly, Amateur Extra class licensees that never passed a code test will have one year to pass a 13-wpm test. Those amateurs that fail to pass the test will face revocation of their operating privileges. Materials for administering the examinations will be distributed to Volunteer Examiner Coordinators by the end of April, so that they can begin the testing on May 1, 2015.

“This isn’t going to be one of those silly multiple-choice type tests,” noted Dasher. “We’re going to be sending five-character random code groups, just like we did in the old days. And, applicants will have to prove that they can send, too, using a poorly adjusted straight key.”

Technician Class licensees will not be required to take a Morse Code test, nor will a test be required for new applicants. “We discussed it,” said Dasher, “but decided that since most Techs can’t even figure out how to program their HTs, requiring them to learn Morse Code seemed like cruel and unusual punishment.”

When asked what other actions we might see from the FCC, Dasher hinted that in the future applicants taking the written exam may be required to draw circuit diagrams, such as Colpitts oscillators and diode ring mixers, once again. “We’re beginning to think that if an applicant passes an amateur radio license exam it should mean that he or she actually knows something,” she said.

For further information, contact James X. Shorts, Assistant Liaison to the Deputy Chief of Public Relations for the FCC .

I HAD TO PASS THIS ALONG TODAY. TOMORROW IT WOULD BE LATE.

670. from a friend

Yahoo group: sarcmail
Date: 2015-04-22 16:11:06 UTC
From: lt_wright_flg@...
Topic: 670 Message: 670

While strolling along the new River Walk in Tampa this morning just as the morning rush hour was getting under way, I noticed this character shouting "Allah be praised" and "Death to all infidels" and suddenly he tripped and fell into the water near the Kennedy Bridge over the Hillsborough River. With all the traffic I doubt many, if anyone besides myself, could hear him shouting!

He was struggling to stay afloat because of all the explosives he was carrying in his camouflage vest. If he didn't get help he would surely drown. Being a responsible senior citizen with years of military and police training, and abiding by the law of the land that requires you to help those in distress, I informed the HCSO, the Coastguard, the Tampa Police Department, and even Tampa Fire/Rescue of the situation.

It is now 4 p.m. and the evening rush hour is beginning to move through the area. Here I sit waiting, the terrorist has drowned, and none of the authorities have yet to respond.

I'm starting to think I wasted four stamps.

I just thought you'd like to know that I try to be a good citizen. Have a GR8 day!

671. I'm getting a dog

Yahoo group: sarcmail

From: lt_wright_flg@...
Topic: 671 Message: 671

hi all,

I am getting a dog, medium dog. I am adopting from local Hernando Co Animal Services. They have lots of them, lots of Pit Bulls.

This is about 40lb dog and hines 57 about 7-8 months old...still is jumping around.

My wife is going to be pissed. I applied yesterday, went to pet store and Wal-Mart and got a bunch of stuff and had to hide all in my Jeep, but I am sure as soon as she gets home it will take 10sec for her to smell this dog...well maybe my cigar will kinda cover it. I might be needing another place to live...any Ham got a spare room, send picture of your station.

From: lt_wright_flg@...
Topic: 683 Message: 683

Anyone looking for a good Field Day you can join us in the Suncoast ARC in New Port Richey. We will be part of Kia Fest, Friday and Saturday event in downtown New Port Richey. We will set up next to Orange Lake, the large pond just to the north of the city.

We will be 2A with GOTA station, so even if you are not licensed you can operate. We will be at the site Saturday morning at 10AM. Although Kia Fest will run Friday and Saturday we will be there until Sunday afternoon.

We are in the final stages of planning. We will have 3 rigs, FT1000mp, IC718 in my Go Box with digital (PSK31, etc) and IC756II for GOTA station and antennas for all.

We are looking for younger people to help and operate. So if you know of a group like Boy Scouts, ROTC or just anyone wanting to see Ham Radio in action come on by.

Hey folks,

I plan to crawl out from under my rock and try to make the meeting tomorrow, but I don't know what time it starts - and it's not on the main Yahoo Group page. Can someone please fill me in?

Thanks and 73, Joe AB2M

695. rattlesnake festival volunteers needed

Yahoo group: sarcmail
Date: 2015-10-05 18:21:20 UTC
From: Chris Bloxsom
Topic: 695 Message: 695

This is a message I am forwarding from the people that run the Rattlesnake Festival in San Antonio. They can use some help there. This is nothing to do with EPARS covering radio communications for the 5k race. They are short on help this year and they are a good organization.So please if you can help them out for a couple of hours.

Please reply to Ms.Robinson directly at the phone number below if you can spare some time that day.

Chris Bloxsom N2KBK
http://eparsonline.org
Email:n2kbk@...
--message begins--------------------

The Rattlesnake Run and Festival is coming up on Saturday October 17th. We are in need of volunteers for the run and the festival. This is the annual fundraiser for the Rotary Club of San Antonio if any of our other Eastside 7 clubs can help out we would greatly appreciate it.

Sue Robinson (352) 588-4404

698. JOTA

Yahoo group: sarcmail
Date: 2015-10-18 17:17:42 UTC
From: lt_wright_flg@...
Topic: 546 Message: 698

This last weekend I helped the Spring Hill ARC do JOTA with the Boy Scouts at the Sand Hill Scout Reservation in Spring Hill. We had my Go Box with HF PSK31 and SSB, another IC718 for HF SSB, a 2m rig linked to the Spring Hill ARC 146.805 repeater and my ID880 DSTAR rig tuned to the SARC 145.350 repeater and linked to the GateWay.

The Scouts really got into the DSTAR on 145.350. They got excited seeing the rig display the users in UK, Australia, Germany and stations all over the USA. It worked best for us and demonstrated Ham Radio very well.

Also showed some CW and PSK31 with the computer coping and hearing stations in Ohio, Kansas and many others. 20m was hopping, 40m some activity, but very little.

It was a good weekend event.

Looks like when we do something right we get busy with radio support for race events.
FYI there are TWO events on November 21st-Saturday
One is for for the St Rita 5k run in Dade City. email Chris n2kbk@yahoo.com.
the second run is in Zephyrhills. The Run for Life 2015email Gary n3os@...
Ham radio plays a big part in these local events around town here. We manage the race course and report any incidents to HQ. Keeping people safe and informed about the event. If you can volunteer for either event please email the above person. Your help is greatly appreciated.

709. Church St. Christmas radio event

Yahoo group: sarcmail
Date: 2015-12-13 13:53:12 UTC
From: Chris Bloxsom
Topic: 709 Message: 709
Attachments: 4 described; binary payloads are missing from this source WARC

The East Pasco Amateur Radio Society (E.P.A.R.S.) will be set up again this year at the 2015 Dade City
Christmas walk. We set up a ham radio station and allow the children to 'Talk to Santa" via amateur radio. This
event is 3 evenings from 7 to 9pm.
We need Volunteers to assist in setting up the tables, lights , radios. No experience is needed. You do not even have to be a licensed operator. Santa needs some elves to help with getting the kids to talk on the radio to Santa in the North Pole.
If you can help out for one night or all three please let us know. Send an email to Chris N2KBK.
n2kbk@... or call/text 727- four eight four - 8099
.....or a real HAM would just get on the 146.880 repeater and call...

Come on down it is only a night or two..... ..it will not kill you..
...do it for the kids.. ..get out of the house so your wife can wrap up the Yaesu ftm-400 she got you for Christmas.....

Below is some more information on the Church Street Christmas

DADE CITY, FLORIDA Church Street Christmas, a favorite holiday tradition forfamilies, is celebrating its 38th anniversary in Dade City this month. The annual event is located in DadeCity on Church Avenue from the corner of 17th Street to 10th Street. The neighbors and churches of ChurchAvenue will welcome the community to visit the red bricked, candle lit street from 7 p.m. to 9 p.m. for threeevenings of holiday entertainment.
The celebration will include performances by local church choirs, the Dade City Symphony, and talentedmusicians from all over East Pasco County. The entire street is blocked off where visitors may stroll andlisten and see the sights of the season. In years past, more than 10,000 people visit each night to take partin this Christmas tradition.
“This is an incredible Christmas tradition that many families have built in to their holiday planning. This is atotally free event that includes a beautiful stroll down a street that is filled with Christmas songs, spirit, andjoy," said Kimberly Higgins, whose family lives on Church Avenue. “All of the neighbors on Church Avenueenjoy this time of year when the spirt of Christmas fills our neighborhood and our many visitor’s hearts.”Church Street Christmas features a candle lit brick street, beautifully decorated homes with front lawnsfilled with carolers and performers of all ages. Three churches will be open every evening with additionalentertainment and even a live nativity. Entertainment varies each night but will include groups such as theShowstoppers, a local bell choir, and a musical light display that dances to favorite Christmas songs. Tolearn more about Church Street Christmas, please visit www.churchstreetchristmas.org. Follow ChurchStreet Christmas on Facebook.
About Church Street ChristmasChurch Street Christmas is a free event and open to the public. Church Avenue is blocked for vehicle trafficbeginning at 7 p.m. and lasting till 9 p.m.From Tampa, take I-75 North to exit 285 East toward Dade City on Highway 52. Turn right on ChurchAvenue.Public parking can be found at one of the three churches along Church

From Gary, N3OS, Pasco ARES Officer

Pasco EOC, NPR is closed for several months for reconstruction. No meetings until further notice at that venue. I hope to have a meeting
at the EOC in Dade City sometime in February so everyone can become
familiar with the place. I was there yesterday and got to see the area
where we will be having our operating positions (3). The gear is not
there yet and another meeting is to be held to discuss the antenna
situation. We have none at this time and access to local machines from
inside the building is definitely NOT GOOD.

TheTARCFest is on 22nd St. The way I get there is take I275 to Sligh St, go east couple miles and turn north on 22nd and about 2 blocks it dead ends and TARC club house and fest is there.
TARCFest is one of the more popular fest in Tampa Bay. Small tail gator, maybe 30 tables, but is good.

Subject: Re: [sarcmail] TARCFest

TheTARCFest is on 22nd St. The way I get there is take I275 to Sligh St, go east couple miles and turn north on 22nd and about 2 blocks it dead ends and TARC club house and fest is there.

TARCFest is one of the more popular fest in Tampa Bay. Small tail gator, maybe 30 tables, but is good.

729. SeaFood Fest

Yahoo group: sarcmail
Date: 2016-04-18 23:46:45 UTC
From: lt_wright_flg@...
Topic: 729 Message: 729

For SeaFood Festival this weekend have following info and schedule.

got call from Judy of the Down Town NPR event today. She says we will have 12 x 10 ft space next to EOC for their Hurricane Expo. If consider stage as 12 O'clock we will be around 3 o'clock between the side walk and Banks Ave/St.

So following sked for set up and operation:

Friday meet at park at noon and take Mike's 2 tables, pop-up and chairs and leave at our site over night. There will be security all night provided by the Florida Volunteer Force.

Saturday morning event opens at 11AM. We should be there by 9AM to set all up including the following:
1. pop-up with 2 tables and chairs (if you have chair bring it please)
2. HF rig with 20m HamSticks dipole on 10 ft buddy pole tripod (Ron).
3. DSTAR rig with 2m Ringo on 8 ft PVC pipe mount (Ron).
4. Club banner using 6 military poles strapped to the pop-up, just enough to get above the pop-up front.
5. cooler with ice (Don) and soda (Mike)
6. Lit for Ham Radio (Mike).

Not sure if can get AC power from EOC, but will have one 12V 18 AHr battery for DSTAR rig and two 12V 35 AHr batteries for HF rig. No generator is allowed.

If Don wants to do digital then he needs to bring his lap top.

We will need operators and help with booth 11AM to 5PM Saturday. No plans working event Friday night and Sunday; just Saturday til about 5.

We will be in front of the public showing off Ham Radio so we should look good in our dress and demeanor. We also want to stress our support for EOC and EmComm.

Friday and early Saturday I am sure we can drive up Banks and unload. They normally close off Banks for events, but allow vendors access to unloading. We will probably have to park in lot to the west of the stage.

730. SeaFood Fest/Hurricane Expo

Yahoo group: sarcmail
Date: 2016-04-25 15:26:18 UTC
From: lt_wright_flg@...
Topic: 730 Message: 730

Great time at the SeaFood Festival in New Port Richey. Pasco EOC had Hurricane Expo there and we in Suncoast ARC set up booth to demo Ham Radio with IC718 Go Box and ID880H DSTAR rig monitoring 145.35 DSTAR/analog repeater. Heard some European and distant US stations about all day. Was very good weather. The Gulf Coast ARC were set up with their fine looking EmComm Trailer. EOC had big truck with lots of military gear.

those attending from SARC were:
Ron, N9EE
Don, KA2KDP
Mike, WB8ONY
Jim, N0NL and wife

sorry no other club members came to help. Was a most enjoyable day.

73, ron, n9ee/r

744. early Ham Radio

Yahoo group: sarcmail
Date: 2016-12-31 17:08:52 UTC
From: lt_wright_flg@...
Topic: 744 Message: 744

This article is from internet site on History of Early Radio. this one goes into Amateur Radio, later to become Ham Radio and take the formal name of Amateur Radio. In early radio Amateur Radio operators were anyone like SWLs, Hams, etc, anyone getting into radio. Note in this article broadcast radio reception was still done with CW that is some just listened to the news and other programs from what would be the broadcasting industry, but used CW for AM and other voice modes had not been invented yet. The Navy, after trying to take over all radios after WWI (effort failed) then encouraged all to learn CW and actually put on programs to teach the code.

At the site are another 22 articles of radio between 1900-1940. Also mentioned was the influx of Hams as CW ops at beginning of WWII, over 20,000 signed up;

This is most important meeting in that we will be discussing our Field Day at Sims Park in downtown NPR June 24 & 25.

We will need all wanting to work Field Day to give their input.
